Eastern tells independents: join up or get axed

BY CURT HARLER

SOUTH WAVERLY — astern Milk Producers operative of Syracuse Y. is putting pressure on dependent members of armland Dairy shipping to e cheese facility in South averly to join the Co-op or se their market.

No deadline has been set to t off shippers who decline to join Eastern. But Eastern General Manager Howard McDonald indicated fieldmen would be completing their visit schedule in the near future and the termination notices would be sent soon thereafter.

Pennsylvania Milk Marketing Board regulations require 28 days notice be given shippers before they could be cut off. Other than that regulation, PMMB has no jurisdiction in the matter.

Some observers say they feel the move is a big bluff to scare independents into the Co-op. Because of the flush market and surplus of milk it would be a good time for such a move.

Eastern needs members, money, and milk. Last week at its annual meeting, the Co-op assessed its members an average of $625 each to bring its accounting books into line.

Eastern's ploy could backfire if those Farmland dairymen find another market and Eastern loses their milk. The Co-op has a large contract for cheesemaking at South Waverly to fulfill with Leprino Cheese Company of Denver, Colorado.

Many dairymen question whether Eastern can make that quota without an additional large infusion of milk from somewhere. Many other dairies currently are flooded with milk.

McDonald maintains the 125 to 130 independent shippers will be required to join so they can contribute to the marketing expenses of their milk.

"They had a free ride for long enough," he said.

The termination notices would come from Farmland Dairy, not Eastern, since the independents actually ship through Farmland.

Farmland, in a letter to the shippers, told dairymen "As you may know, Farmland is entering into a long-term agreement with Eastern."

If the dairymen were to sign up, Farmland's Vice President David Goldman told them, "You will never

Among new state FFA officers elected this week, from the left front row, James Tretter, Lehigh County, Eastern Regional Vice President; Judy Zimmerman, Lancaster County, secretary; Larry Shrawder, Berks County, president; back row, Bob Kreider, Lebanon County, treasurer; and Gerald Reichard, Franklin County, Southcentral vice president.

14 top awards to area FFAers

BY DICK ANGLESTEIN

UNIVERSITY PARK — Amidst bright and crisp weather, more appropriate for October than mid-June, Future Farmers of America chapter members from Southeastern Pennsylvania harvested a bumper crop of top state awards on the Penn State Campus this week.

When the sea of nearly 2,000 blue corduroy jackets coverged on Eisenhower Auditorium Thursday for the awards ceremonies, FFA chapter members from area schools captured championship first-placings in 14 of the 24 contests and accumulated more than 80 gold awards in the statewide competition.

In addition to the outstanding showing in the annual FFA Activities Week contests, the southeastern area also will be well represented in directing the Pennsylvania FFA Association during the coming year.

Five area students were elected to State FFA Officer posts, including Larry Shrawder, Kutztown, Berks County, president; Bob Kreider, Little Dutchman Chapter, Lebanon County, treasurer; Judy Zimmerman, Cloister Chapter, Ephrata, Lancaster County, secretary; Gerald Reichard, Blue Ridge, Franklin County, Southcentral Regional Vice President; and James Tretter, Lehigh County, Eastern Regional Vice President.

Among the 14 contest championships won by area FFA chapter members, six went to schools in Lancaster County, two to Berks County and Philadelphia County and one each to Delaware, York, Dauphin and Chester Counties.

One of the stablemates of Grand View's Farm Show champions upset the ribbon-winners by bringing a price double the figure paid for the Grand Champion Guernsey and 60 percent more than their 1980 Supreme Champion and Grand Champion Holstein, pictured here with Max Perry, left, Norman Craig, center, and Marvin Miller.

At Grand View dispersal

Guernsey brings more bucks than supreme champ Holstein

BY SHEILA MILLER

LANCASTER — Buyers om Canada, Kentucky, irginia, Delaware, Indiana, aryland, New Jersey, onnecticut, and Pennylvania left the Guernsey le Barn, along Route 30, ith a Grand View buy.

The Branstetters traveled l the way from Edontown, Kentucky to ailer home two of the topelling cattle at Grand iew's herd dispersal. They ought a total of four head.

Roy Fowler Branstetter, e son, bought the topriced cow and Guernsey at uesday's sale. A price tag $9000 went attached to ollow View Hornet Amy.

The three-year-old aughter of a very good dam nd grand dam out-sold rand View's 1980 Farm how grand champion uernsey, and their Supreme Champion and Grand Champion Holstein.

Fowler Branstetter, father of Roy, bought the 1980 Farm Show Supreme Champion and Grand Champion Holstein, Savage-Leigh Angels Magic. She was the top-selling Holstein, bringing $5600.

Rankin Farms Golden Brown, the 1980 Farm Show Grand Champion Guernsey, sold to Jerry Berstein of Davidsonville, Maryland for $4500.

An excellent Vernon daughter, Walhowdon Vi M Wrill, will be travelling to Canada. Kenneth Empey, of Shore Holsteins, Brownville, Ontario, purchased this cow bred to Facemaker for $5200. She was the second high selling Holstein at the sale.

A spokesperson for Remsburg Sale Service said the sale average for the 11 Guernseys sold was $2672.73. The Holstein average was $1533, which she explained was not representative because there were 34 open heifers and some grade animals included in this figure.

The sale average for the total 82 head sold at Tuesday's sale was $1700.

Legislative roundup

Truck bill, budget move through Senate

HARRISBURG — In what is regarded as a victory for the Thornburgh Administration, and also for northeastern dairy farmers, the Senate Wednesday night approved SB 10

The bill raises maximum truck weights in Pennsylvania to 80,000 pounds along with increasing many road user fees.

Dairy farmers in Northeastern Pennsylvania have long prayed for SB 10's passage since it will allow larger tankers on state highways. At least one dairy had threatened to drop Pennsylvania shippers if the situation were not resolved.

Strongest opposition came from those who said the trucks will destroy the highways and cost more in repairs than the added fees will provide.

Maryland also has approved the 80,000 pound limit effective July 1.

The Senate also passed the state budget and sent both packages along to the Governor for his signiture.

About $2 million in state lottery funds are in the budget, earmarked for rural transportation.

Sharing money-making ideas in milk production.

(Top) Dairyman John Barley discusses the latest developments in herd management with Penn Pro Salesman Bob Gregory (Bottom) Pennfield Feed marketing management conducts continuing educational programs for salesmen and dairymen

When it comes to dairy farming a little learning can be a profitable thing. Milk production can soar. Butterfat can jump higher. Profits can increase. That's why Pennfield spends so much time educating its own Penn Pro salesmen as well as dairy farmers in the latest nutritional, herd health, and farm management developments. These educational programs are, of course, an excellent supplement to the Pennfield Computerized Total Ration Service. And here's how the service works: **1.** We collect samples of your forage. **2.** Then we evaluate the quality of your forage. We determine the total digestible nutrients. The fiber content. The protein content. The amount of carbohydrates. **3.** The computer quickly spots any nutrients lacking in the forage. For your milking cows. And for your dry cows. It immediately points out the overfeeding of nutrients. Underfeeding, too. Both, of course, may be different at different times of the year. And the printout will tell you what you need. And when. **4.** Your Penn Pro Professional advises you on the quantity and type of nutrients that should be added, to balance your total feeding program to your cows nutritional requirements.

Try the Pennfield Computerized Total Ration Service. For better milk yields. For better profits. There's no cost or obligation. Just phone us today at Pennfield Feeds. Local calls: Lancaster 299-2561, Red Lion 244-4511. In 717 and 215 areas dial toll-free 800-732-0467. Pennfield Feeds, Rohrerstown Road, Lancaster, PA 17604.

Penn Pro is a total feed program from Pennfield Feeds.

Peoria Cattle

Thursday, June 12
Report supplied by USDA

51 Weekly cattle summary: Compared to last Wednesday: Slaughter Steers sold 1.00-1.50 higher. Heifers finished 1.00-2.00 higher. Cows 1.00-2.00 higher. Bulls steady. Trade on Slaughter Steers and Heifers closed the week on an active note with yield grade still the main pricing factor. Consignments of yield grade 2 and 3 found broad buyer demand; however those consignments carrying a sizable percentage of yield grade 4 and 5 sold under narrow demand. Receipts this week 3400, last week 2738, last year 4247.

SLAUGHTER STEERS: Choice and Prime 3-4 1250-1375 lbs. 61.00-62.50. Load Choice 2-3 1125 lbs. at 66.00. Choice, few Prime 2-4 1050-1250 lbs. 63.50-65.00. Closing mostly 64.50-65.00. Mixed Good and Choice 2-3 1000-1150 lbs. 63.00-64.50 late. ½ load Good and Choice 1500 lbs. Holsteins at 58.50. Good 60.00-63.00. 1200-1400 lbs. Holsteins 54.00-56.00.

SLAUGHTER HEIFERS: Choice and Prime 2-4 900-1000 lbs. 63.00-64.50. Choice 2-4 900-1050 lbs. 61.50-63.50, closing 63.00-63.50. Mixed Good and Choice 2-3 800-1050 lbs. 61.50-63.00 late. Good 59.00-61.50.

COWS: Utility and Commercial 2-3 42.00-47.00. Cutters 41.00-45.00.

BULLS: Yield Grade 1-2 1000-1900 lbs. 48.00-55.00.

Omaha Cattle

Thursday, June 12
Report supplied by USDA

Midweek prices on Slaughter Steers and Heifers ranged 1.00-1.50 higher under a generally good demand by all buying interests. Cows were 2.00-3.00 higher and bulls 1.00-2.00 higher.

Four Day Receipts: 15,600; Last week 14,300; a year ago 10,700.

Slaughter Steer and Heifer prices trended higher in reflection of advancing prices on carcass beef at the wholesale level. Most interests came into the period in need of cattle for immediate requirements and were aggressive for numbers. Trading was active most days on fairly liberal supplies and some price advance was noted on three successive days. Midweek prices were generally at the highest level since late March. Further stimulation was provided at midweek by a moderate feeder buying demand for 1025-1125 lb. Steers suitable for a short turn in the feedlot. The consist again included a fair percentage Choice Steers and Heifers and a number of loads Choice and Prime. Slaughter Steers made up approximately 48 pct and Heifers 29 pct. Cows comprised 12 pct and Feeders 7 pct.

STEERS: At midweek, load and part load Choice and Prime 3 with end 4 1188-1257 lbs. 66.50, few loads Choice with end prime predominantly 3 1125-1205 lbs. 66.25. Choice 2-4 1025-1300 lbs. bulked 65.00-66.00, some predominantly 3 66.25, some with increased percentage 4 1200-1300 lbs. 64.50-64.85. Mixed Good and Choice 2-3 1000-1250 lbs. 64.25-65.00. Good 2-3 61.50-63.75. Good and Choice 2-3 1200-1586 lb. Holsteins 57.50-60.00.

Average of LS-214 detailed quotations for Choice 900-1100 lb. Steers this week 65.55; Choice 1100-1300 lbs. 65.22. Average cost Slaughter Steers this week 64.86 Average weight 1170 lbs. as compared 63.78 and 1167 lbs. week ago. Average cost Heifers 62.72, average weight 1017 lbs. as compared 62 00 and 1016 lbs. week ago.

HEIFERS: Several loads Choice and Prime 3-4 and Choice 3 939-1129 lbs. 64.75-65.00. Choice 2-4 900-1100 lbs. 63.25-64.50. Mixed Good and Choice 2-3 875-1050 lbs. 62.00-63.50. Good 2-3 58.50-61.50.

COWS: Utility and Commercial 2-4 43.50-46.50, some high-dressing Utility 47.00. Cutter 43.00-46.00. Canner and low-cutter 42.00-44.00.

BULLS: 1-2 1200-2200 lbs. 52.00-57.00, individual 1 58.00-60.00.

FEEDERS· Approximately 10 loads Medium Frame 1 981-1143 lb. Steers 64.85-66.50.

Lancaster Farming says...

Stop erosion of state's mushroom industry

It wouldn't be too difficult to get to know every mushroom grower in the United States on a first-name basis. There are fewer than 700 of them in the country. At their current rate of demise, they may join the Golden Eagle on the endangered species list.

Monday the U.S. International Trade Commission heard testimony on the current status of the U.S. mushroom industry. A sad report it was.

Foreign mushrooms now represent 55 percent of the processed mushrooms consumed in this country. Eight years ago the figure was 19 percent.

Unless action is taken, it seems likely the Peoples Republic of China and the Dominican Republic will join Korea and Taiwan in exporting mushrooms to the United States

Square foot for square foot, domestic growers are more efficient than overseas producers, but they are hamstrung by minimum wage guidelines, workers compensation and unemployment compensation taxes, restrictions on growing materials they can use, and a host of other problems.

What the growers asked the ITC on Monday was for a recommendation to the President that they be given both temporary and long-term relief from overseas competition.

A tariff rate quota would fit the bill nicely. As Senator John Heinz pointed out in his testimony, "Voluntary restraints by South Korea and Taiwan have been ineffective, in some years simply exceeded, and more recently circumvented through the Hong Kong chanel."

Under Section 201 of the Trade Act the ITC can recommend the President take such action. In fact, the ITC made just such a recommendation twice in the early 1970s, only to have the president turn his back on the proposal.

Meantime, imports grew and voluntary restraints asked of the other nations became no more valuable than the paper they were written on.

While we continue to believe in the principle of free trade, it would be well to point out that mushrooms do constitute a somewhat special case.

Take the auto industry and its much-publicized import woes, for example. While car makers can change their product, mushroom growers can't.

There's no difference between a U.S or Korean mushroom.

Auto makers made themselves non-comptetitive because they put out inefficient products; U S mushroom growers are the most efficient in the world

While big auto firms wheel and deal around the world, mushroom growers depend on local markets and canneries.

In Chester County, for instance, there once were 30 mushroom processors. Today there are six and some growers say half of them are ready to close.

There is precedent to aid the mushroom growers. The beef industry has a quota. The textile industry has one. There is no reason why the mushroom industry should not have a measure which would limit imports to a specific percentage of domestic production.

There also should be a duty on all processed mushrooms imported.

The President must take the necessary steps to assure the erosion of Pennsylvania's $160 million mushroom industry is halted.

It's not just for the 700 mushroom growers, but also for the millions of Americans who can't imagine a steak without mushrooms or a plain-topped pizza

---

THE BIBLE SPEAKS

BY LAWRENCE W. ALTHOUSE

PROPHET OF THE YEAR!

Lesson for June 15, 1980

Background Scripture:
Jeremiah 7 1 through 8 3; 26
Devotional Reading;
Psalms 15

In our society there are annual awards in many endeavors Academy Awards for motion picture people, Emmy Awards for television, Drama Critics Awards for the legitimate stage, Pulitzer prizes for literature, Nobel prizes for a whole spectrum of human achievement, "Most Valuable Player" in most sports, Miss America in feminine beauty, and the list seems endless.

But, no one has ever proposed — or is likely to — an award for "Prophet of the Year" The reason, of course, most awards are popularity awards and the prophet's role is usually the antithesis of popularity In fact, if there ever was such an award, it would probably have to be given to the prophet who is most unpopular.

Maybe They'll Listen

That doesn't mean that the prophet's purpose is to make people angry and himself unpopular — it just usually works out that way. The purpose of the prophet is to speak for God to his people People usually react to the message with anger and hostility because they don't like the message God has sent. There are exceptions in the Old Testament, but Jesus summed up accurately the prophetic experience when he said· "O Jerusalem, Jerusalem, killing the prophets and stoning those who are sent to you!" (Luke 13:34)

Still, when God sent the Prophet Jeremiah to the Temple, it was not intended to be an exercise in futility or symbolic gesture to a lost cause The doom which Jeremiah was to proclaim was not inevitable, for the prophecy was preceded by a very important "if" "If you will not listen to me, to walk in my law which I have set before you, and to heed the words of my servants the prophets whom I send to you urgently. .**then** I will make this . city a curse for all the nations of the earth" (Jeremiah 26 4-6) The doom could be avoided if the people would respond and repent The people, not Jeremiah or even the Lord, would determine their fate "It may be they will listen, and everyone turn from his evil way, that I may repent of the evil which I intend to do to them because of their evil doing' (26:3)

What Hezekiah Did

The response to Jeremiah's prophecy was not unanimous. To be sure, the majority of the nobles called immediately for the prophet's death. But after Jeremiah reminded them that his death would bring "innocent blood upon yourselves and upon this city and its inhabitants," (26 15), there was with some a change of heart and some warned ". .we are about to bring great evil upon ourselves" (26.19), and Jeremiah escaped death — for a time.

If you are really interested in naming the "prophet of the year" or even just concerned about bringing "great evil" upon yourself, look to the prophet who makes you angry It easily could be that person who is speaking for God

---

NOW IS THE TIME

By Max Smith, Lancaster County Agricultural Agent
Phone 394-6851

TO SLOW DOWN COMBINE SPEED

It will soon be time to harvest winter barley, and then in a few weeks, the winter wheat should be ripe Both of these crops require mechanical harvesting equipment and good weather From the volunteer grain seen growing following winter barley or wheat harvests, it is evident that too much of the grain is being left in the field

I fear that too much speed with the combine might be the reason that grain is thrown out with the straw The recommendations of the manufacturer should be followed in this respect Also, at times the grain may be too tough to combine This is often the case when the crop is quite weedy The big thing is to have the combine adjusted to the best of your knowledge and then drive at recommended speed Producers need every bushel of grain and every bale of straw that they can get from their winter grains

TO FEED DRY MATTER ON PASTURE

Pastures are very lush this spring due to favorable growing conditions This means that livestock can utilize some dry matter while on pasture. This can be hay, straw, or silage When the dry matter is present they will often consume a moderate amount along with the fresh grass

The dry matter slows down the passage of the lush forage through the digestive system Also, it reduces the danger of bloating when there is clover or alfalfa in the forage mixture If the animals are out all of the time, then a portable hay rack would be the way to feed hay or straw Dry matter intake is important when pastures are lush and high in water content

TO CLEAN PESTICIDE SPRAYERS

The use of various kinds of spray materials in one sprayer is risky. This is especially true when you are using any type of weed killer In too many cases the sprayer carries sufficient weed killer material to injure a susceptible crop. Farmers who are spraying corn fields with weed killers one day and then spraying alfalfa or tobacco plants the next day with the same equipment had better do a real thorough job of cleaning the sprayer

The degree to which the weed killer will stick in the sprayer depends upon the material. Most chemicals can be cleaned by using warm water and soap detergent However, materials such as 2,4-D had better be cleaned with one pint of household ammonia in 25 gallons of hot water Allow this mixture to remain in the sprayer overnight and then spray it out through the system on the lane or driveway Don't be guilty of harming good plants One of the best practices is to have one sprayer for weed killer chemicals and another sprayer for other purposes

TO ENCOURAGE WATER CONSUMPTION

In the managing of any type of livestock or poultry it is very important to get maximum water consumption Some animals such as a heavy milking cow will drink 30 gallons of water per day All animals should have free access to water at all times In the summer the water should be as cool as possible, and in the winter warmed water will increase consumption. Open troughs might be kept covered unless the water is flowing through the trough.

One way to encourage good water intake is to provide access to loose salt and minerals These items will not only help water consumption but will balance the ration and help promote more complete digestibility When the weather gets warm and humid, we humans drink more liquids Livestock and poultry will do the same when given the chance This is good management and will increase efficiency in production

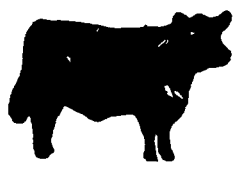
Record number of Angus heifers enter national show

ST. JOSEPH, Mo. — A record number of Angus heifers have been entered in the 12th National Junior Angus Heifer Show, reports Jerry Lipsey, director of Junior activities for the American Angus Association.

A total of 399 youths from 27 states have entered 730 heifers in the show set for July 21-22 in Wichita, Kansas.

The national heifer show is part of a four-day event jam-packed with national Junior activities, including the 14th National Showmanship Contest, organization of the National Junior Angus Association, and election of the first national Junior directors.



State groups also will team up for national Angus Bowl competition, and will be in the spotlight for a talent show contest. Activities will take place at the Kansas Coliseum and Livestock Facility in Wichita.

This year the Kansas Junior Angus Association also will sponsor cow-calf classes for cows that are bred-and-owned, enrolled in the AHIR program, halter-broken and exhibited with their most recent calf. Four classes will be offered in this division, with premium money of $100, $50, $40, $30 and $20 awarded to the first five in each class.

Show judge will be Jim Gillooly, Washington, Indiana.

Snyder to show at Nat'l Jr. P.H. Heifer Show

COLUMBUS, Oh. — Gail K. Snyder, New Tripoli, will be among the over 400 exhibitors from 31 states and Canada showing Polled Hereford heifers at the 7th National Junior Polled Hereford Heifer Show in Columbus, Ohio, July 14-18.

Nearly 700 registered beef heifers have been entered in this event that has come to be recognized as the largest show of its kind in the world.

Nationally known cattle authorities judging the show will be Lloyd Clarkson, Winfield, Kan., Russ Danielson, North Dakota State University, and J.W. Brune, Ottawa, Kan.

A former Polled Hereford "Herdsman of the Year", Robert Botkin of Lexington, Ky., will serve as showmanship judge, choosing winners in both junior and senior competition.

Conducted annually with a family vacation atmosphere, the National Junior Polled Hereford Heifer Show is the culmination of months of work at home as young cattle enthusiasts converge on Columbus, representing the tops of rural youth.

New insect discovered to combat grain fungus

WASHINGTON, D.C. — A new insect that might help farmers fight a poisonous fungus in grain has been discovered in a Michigan wheat field.

Bisham P. Singh of the U.S. Department of Agriculture's Animal and Plant Health Inspection Service said he found the new insect–a tiny, dark beetle–during a routine survey in St. Clare county for plant diseases of economic importance in Michigan crops.

James O. Lee, APHIS deputy administrator, said the new insect is one of an obscure specie of beetles never before detected or described in scientific literature anywhere in the world.

He said the insect was found feeding on ergot, a common fungus of grain often fed to livestock.

Scientists of the USDA's Science and Education Administration now are taking steps to identify, describe and name the insects.

Ergot is a poison to warm-blooded animals, including people. Some of its components are said to be related to LSD, Lee said.

Ingestion of the fungus in great quantities, Lee said, can kill humans or livestock, frequently posing a problem for farmers. However, the newly-discovered insect, in both immature and adult stages, appears to consume large quantities of the ergot components without any side effects.

Researchers will evaluate whether the insect helps spread the poisonous fungus as it moves from field to field whether it could be developed as a parasite to control ergot.

They also will look at the enzymes in the insect's digestive tract to learn what substances break down the poisonous compounds, a determination which could lead to a possible cure for ergot poisoning, Lee said.

International Livestock Show schedules two weeks at Kentucky

LOUISVILLE, Ky. — Harold Workman, general manager for the Seventh Annual North American International Livestock Exposition, scheduled for November 8-22 this year, said he is expecting record crowds to turn out for the two-week long show.

He announced that for the first time, the Kentucky Department of Agriculture will hold its Food Fair and Trade Show at the North American International. The fifth show of its kind in the state, it is scheduled to be held November 14 and 15.

Other events include:

November 8:
Junior Dairy Shows.
All American Junior Jersey Show.
National Junior Guernsey Show.
Ayrshire Junior Show.
Holstein Junior Show.
Southeastern Regional Brown Swiss Junior Show.
Jersey Pot-O-Gold Sale.

November 9

Eastern No. American Murray Grey Sale.
National Red Poll Sale.
National Chianina Sale.
National Gelbvieh Sale.

November 21
Sales of Champions Breakfast.
Limousin Show.
Brahman Show.

Top Hereford cows recognized

KANSAS CITY, Mo. — A listing of 1234 registered Hereford cows have been afforded special recognition by the American Hereford Association.

Cows in this elite group have combined the single most important economic trait of fertility, with the second most important trait of growth of her offspring.

To be selected, a cow must meet very high criteria. She must be four years of age or older, must have had her first calf at 25 months of age or younger, have a calving interval of 370 days or less, and her calves must have weaned at least 5 percent above the average of her herd.

Only about one-half of one percent of the nation's registered Hereford breeding cows can meet the rigid standards to attain listing.

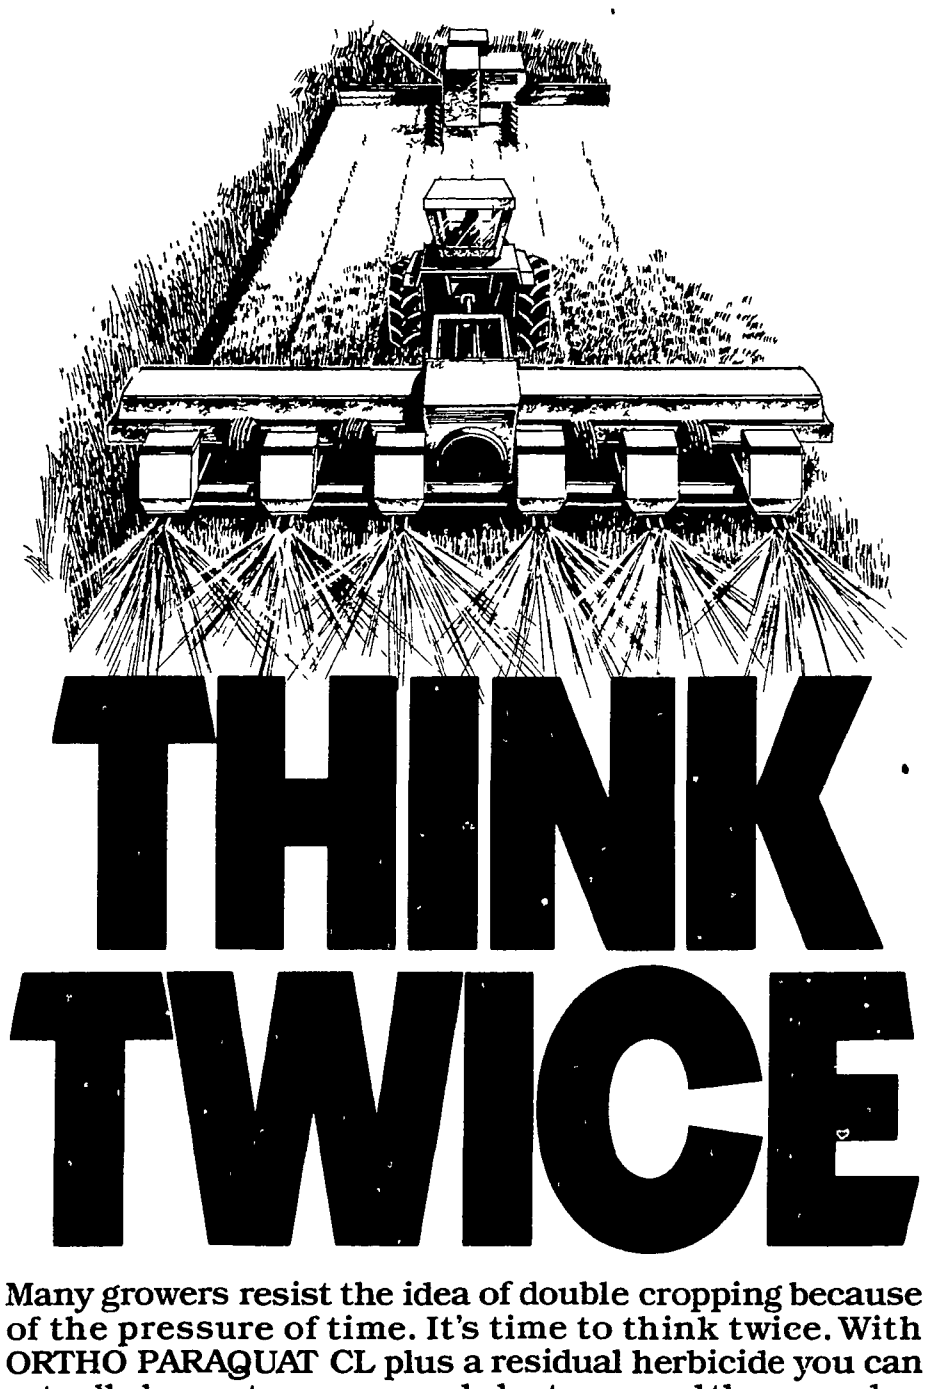
"Because of different management programs, many cows do not have the opportunity to be listed, however those making the list are efficient, productive cows and are deserving of the special recognition" state H. H. Dickenson, executive vice president of the AHA.

There are cows from 314 breeders from 30 states shown on the list. "This widespread distribution in numbers and areas further reflects the Hereford cow's ability to adjust to different climates and management programs," Dickenson added.

South Dakota Hereford breeders ranked first in both the number of breeders and the number of cows, with 259 head from 47 breeders meeting the standards.

Montana ranked second in both categories with 185 cows from 45 breeders, and North Dakota ranked third with 24 breeders and 132 cows.

Two cows listed are 16 years of age, have weaned 14 calves, and still maintain the 5 percent above average for growth on their offspring. They are Alva Aster Zatone A, owned by Russell E. French, Oelrichs, S.D., and RC Evan Heiress, 53, owned by Ned Ray Purtle and Son, Hope, Ark.



THINK TWICE

Many growers resist the idea of double cropping because of the pressure of time. It's time to think twice. With ORTHO PARAQUAT CL plus a residual herbicide you can actually harvest one crop and plant a second the same day. PARAQUAT is a fast-acting herbicide that kills a broad spectrum of unwanted weeds and grasses. You can plant land treated with PARAQUAT immediately. You plant right into the stubble of the preceeding crop with no fuel consuming plowing or discing.

The savings on fuel are sizeable. You also save on time, labor, and equipment usage costs. For best results, apply PARAQUAT with ORTHO X-77® Spreader.

DANGER: PARAQUAT is highly toxic if swallowed and should be kept out of the reach of children. To prevent accidental ingestion, never transfer to food, drink, or other containers. Read the label carefully and follow all directions, danger statements, and worker safety rules. Restricted Use Pesticide. Use all chemicals only as directed.

Shenk named 4-H strawberry champ

LANCASTER — Glenn F. (Buddy) Shenk, R2 Lititz, got back into his customary winning ways at the Lancaster County 4-H Strawberry Roundup Wednesday at the Farm and Home Center.

His twin boxes of gigantic Jersey Bells won him the championship honors among 16 competitors from throughout Lancaster County.

This marks his fourth championship in six years of competition. After three consecutive championships, he placed third last year.

Member of the Penryn-Elm Club, Shenk has one more year of competition remaining before he turns his patch over to younger brothers and sisters. He is the son of Mr. and Mrs. Glenn F. Shenk.

In the auctioning of the berries at the annual roundup luncheon hosted by the Lancaster Rotary Club, his boxes sold for $47.50. Purchaser was Andy Gianapoulos.

Reserve champion at the roundup was Gini Lou Nissley, R5 Manheim, also a member of the Penryn-Elm Club.

Other clubs participating in the annual event were Penn Manor, Solanco, Manheim Township, Ephrata and Elizabethtown.

Serving as judges for the competition were County Agent Arnold Lueck and Karen Masters, summer assistant in horticulture.

The entries were of good quality, according to Lueck, even though the event missed the peak of the season by about a week or 10 days.

Other exhibitors included Phil Nissley, R5 Manheim; Wanda Kay Hershey, R5 Manheim; Gina Oberholtzer, 207 S. 11th St., Akron; Kim and Alex Hartzler, R1 Mount Joy; Ed Nissley, R5 Manheim.

Also, John Loeffler Jr., 333 Hershey Mill Rd., Mountville; Mike Kleinz, R1 Nottingham; Betsey Royer, R1 Stevens; Martha Turnbauer, R1 Ephrata; Cindy Risser, R1 Leola; Karen Mullen, R2 Peach Bottom; Bev Buckwalter, 122 Brusser Dr., Lititz; and Debbie Martin, R1 Conestoga.—DA

These gigantic Jersey Bells grown and exhibited by Glenn Shenk, R2 Lititz, won grand championship at Lancaster County 4-H Strawberry Roundup and brought $47.50 at Lancaster Rotary Club auction.

Perry County 4-H Dairy meets

LANDISBURG — The Perry County 4-H Dairy Club met on June 5, 1980, at the Duane Richard Farm, Landisburg.

The topic for the meeting was showmanship. Teen leaders Brian Rock, Duane Richard, Jon Reapsome, Nancy Stephens, and Kim Kriebel demonstrated proper showing techniques.

The 4-H members were urged to join the newly-formed Perry County Junior Holstein Club. Members can do so by sending an application to the Holstein-Friesian Association of America, Brattleboro, Vermont.

The next meeting will be a splash party at the new Bloomfield Pool. Members will be notified concerning the meeting date and time.

Hearings on state proposals affecting storm water scheduled

HARRISBURG — Public hearings on the state's proposed index of watersheds designated for storm water management will be conducted by the Pennsylvania Department of Environmental Resources and the Environmental Quality Board in DuBois June 24 and in Reading June 26.

Following EQB approval, DER will use the index to implement provisions of the Storm Water Management Act of 1978.

Both hearings will feature afternoon and evening sessions and will be held at community campuses of Penn State. They will be chaired by Eugene E. Counsil, chief of DER Storm Water Management Division.

Three-hour afternoon sessions will get underway at 1 p.m. and two-hour evening meetings are to begin at 7 p.m.

The June 24 hearing will be in the auditorium of the Study Learning Center on PSU's DuBois Campus. The June 26 hearing will be in the Student Center Forum of PSU's Berks Campus, Reading.

Persons interested in testifying at the hearings should contact Gilbert E. Kyle, director, DER Bureau of Dams and Waterway Management, Box 2357, Harrisburg, PA 17120, telephone (717) 783-1384, prior to the hearing date.

Those interested in submitting written comments, suggestions or objections should send them to Kyle prior to or within seven days after each hearing date.

Single-page summaries of written comments and/or oral testimony also may be sent to Kyle within the same time limit to be considered.

Copies of background information may be obtained from Kyle's office.

Lancaster's executive Board announces project

YORK — How well are families managing? How can families make their concerns known? Who is listening?

President Jimmy Carter has convened The White House Conference on Families this summer to "examine the strengths of American families, the difficulties they face and the ways in which family life is affected by public policies." He has labeled the state and national activities as a long overdue assessment of how government and the major private institutions help, hurt, or neglect families.

Pennsylvania is preparing for The White House Conference through a series of public forums on families. Four regional hearings will be held in February. Through April, local family forums or meetings will convene across the state. To facilitate discussion, a statewide committee chaired by James E. Van Horn, Extension family sociologist at Penn State, has identified four major issues affecting families. The issues are:

Strengths of families. What can families do best to meet the needs of their members? What resources and skills do families need to carry out their responsibilities? What can be done to help the family deal with inflation?

Availability and accessibility of services to meet the needs of families. What community services are available to the single parent; the elderly? What can be done to permit two-earner families to be successful as both parents and as workers?

Impact of government policies on families. What are the social and economical costs of unemployment to families? How do tax or zoning laws affect rural families? The present tax structure places different tax burdens on different families, the married, nonmarried, small and large families. What can be done to make the tax burden equitable?

Impact of private institutions on families. Should private institutions counsel families on money management? Do religious institutions and groups play a major part in counseling families with problems?

45 cows can do work of 96

LITITZ — DHIA records show that 45 high producing cows can return as much money over feed costs as 96 low producers. An analysis of the records in herds on DHIA in 1979 shows that 45 cows producing at the rate of 17,700 pounds of milk yearly nets the same income after feeds costs as 96 cows producing 10,100 pounds per year.

Herbert C. Gilmore, Extension dairy specialist at Penn State, explains that 53 cows producing at a 15,300 pound level and 68 cows at a level of 12,700 pounds return the same income over feed costs. Cows producing at lower levels require so much additional labor to take care of the added number that this level of production is not profitable.

There are cows at these levels of production in many herds, says Gilmore.

Only by keeping records can the unprofitable ones be culled out and greater returns be realized by dairymen.

Dairymen considering sources of more income should carefully study the levels of production and ways to improve it before deciding to increase the number of animals in their herds, adds Gilmore.

June is dairy month

Dairymen . . .

Milking and dry cows rations, formulated according to recognized nutritional standards, are **always** the most profitable rations. These balanced rations, over a period of time, produce the most milk and maintain the best herd health. Our nutritionist, Dr. Walter S. Kennett, is available to help you. Contact your Brown's Sales Representative or call his Birdsboro Mill office (215-582-2741) for appointment.

Hunting seasons, bag limits set for 1980-81 sportsmen

HARRISBURG — Pennsylvania's hunters will be returning to the traditional four-week small game hunting season this year and generally follow established patterns in other seasons and bag limits under dates established this week by the Game Commission.

This year's regular fall archery deer season will open on Saturday, October 4; the early small game season will start on Saturday, October 18; and the four-week general small game season will begin on Saturday, November 1.

The regular two-week antlered deer season will open on Monday, December 1; the two-day statewide antlerless deer season will be held on Monday and Tuesday, December 15 and 16; and the winter small game and archery and flintlock deer seasons will begin on December 26.

One day for hunting bears has been scheduled for Monday, November 24, in 29 counties.

Only one change of significance was made from earlier proposals for the upcoming hunting license year. The season for raccoons and furbearers as originally envisioned would have been split, starting in October and concluding six days later, then resuming in November.

Because of concern for "blue" or unprime pelts in juvenile raccoons in October, the Game Commission eliminated the early opening, and established a single season for taking of raccoons, skunks, opossums, coyotes and weasels, opening November 5 and concluding January 31.

The fox trapping season will also open November 5 and close on January 31, but the fox hunting season will begin on November 5 and conclude on February 28.

The 410,600 antlerless deer licenses proposed earlier have been authorized for issuance. It is hoped that this allocation will result in a reported antlerless deer harvest of about 60,000 whitetails.

For the first time this year, hunters will be permitted to harvest bears of all ages. Earlier, the Game Commission had proposed that hunters be permitted to take bears under one year of age, a class of bruins that was previously protected.

Originally, the Game Commission had proposed a five-beaver limit in seven counties (Bradford, Crawford, Monroe, Pike, Sullivan, Susquehanna and Wayne).

High population levels and serious nuisance and damage problems have led to including Erie County in the list of those where five beavers may be taken.

The Game Commission has reserved the right to extend the fall turkey, the antlerless deer and the beaver seasons.

Snap beans make snappy yield under no-till

UNIVERSITY PARK — Farmers can produce high yields of certain vegetables without plowing or otherwise tilling the soil, experiments at Penn State indicate.

This no-tillage farming seems to work best with short-season crops such as snap beans with vine crops and other vegetables that compete vigorously with weeds, says Doyle W. Grenoble of the Department of Horticulture at the University.

"Our experiments showed that snap beans gave the highest yields of any vegetable we tested under no-tillage conditions," Grenoble stated recently. "Yields of no-till snap beans were nearly double those on land plowed or disked," he added.

The advantages of either minimum or no-tillage soil treatment for vegetable crops include the chances for early planting and better harvesting conditions on wet soils, savings of time and energy, and less soil erosion, Grenoble pointed out.

No-tillage planting was compared with use of a moldboard plow, chisel plow, and heavy disk. Where the plots were tilled, each plow or disk was followed by one cultivation with a power-driven rotary harrow.

Wheat straw residue made yields of potatoes and sweet corn equal to yields with conventional tillage. Without the mulch, yields of sweet corn and potatoes decreased for no-till crops.

Muskmelon yields from no-tillage soil were equal to those from tillage methods.

Grenoble suggested that vegetable growers try no-tillage cropping on a limited basis. For farmers, this could include a rotation of tillage methods, as with other crops, perhaps using a moldboard plow one year, a chisel plow the next year, and no-tillage management the third season.

Tomato yields decreased with no-tillage in the Penn State experiments. The trial evaluated tomatoes seeded directly into fields, a technique used in commercial production. However, as at Penn State, land can be too wet for direct seeding and the second year trials were not planted.

KROLL

No. 1 in sales of Waste Oil Heaters World Wide

LOOKING FOR CHEAP HEAT?

Buy a Kroll Waste Oil Heater

★ 5 models from 24,000 to 280,000 BTU ★

Kroll of West Germany, is the world's largest manufacturer of heaters that are specifically engineered and designed to burn waste oil as a fuel

Heating with a Kroll saves dollars by permitting you to burn waste oil, a fuel you already have (or may purchase at a fraction of the cost of standard fuels) It also means you have an important new independent fuel supply

Waste oil is crankcase drain oil or automatic transmission drain oil from cars, trucks, buses, equipment, etc

Installation is simple and you can do it yourself Clean heat is produced with no smell or smoke

Europe's technology in using waste oil as a heating fuel is very advanced Standard fuel oil has cost more there for many years There are approximately 50,000 Kroll waste oil heaters in use

A German product that has just come on the market in this country.

- Saving Energy
- Trouble free operation through superior design
- One-heating season and your waste oil heater has paid for itself

Berks names 4-Hers for leadership conference

LEESPORT — Berks County 4-H members will learn specialized leadership skills when they take part in Pennsylvania 4-H Leadership Congress, June 23 to 26, at Penn State's main campus.

The county delegation will join with about 1000 other 4-H members from all counties in the Commonwealth to share and contribute ideas which will improve local community programs.

At Leadership Congress, they will take part in assemblies, discussion and interest groups, and recreational activities.

Members participating in the event are: DELEGATES — Erica B. Adams, Shoemakersville; Harold E. Dietrich, Hamburg; Kim K. Gasser, Fleetwood; Gary K. Hauseman, Boyertown; James R. Heffner, Fleetwood; Janis A. Heffner, Fleetwood; Sharon L. Mengel, Hamburg; Cathie J. Ohlinger, Mohrsville; Rhonda L. Scheidt, Kutztown; Tammy A. Schlappich, Mohrsville; Kevin G. Shollenberger, Hamburg; Andrew M. Shrawder, Kempton; Carol A. Strause, Hamburg; and John Andrew Zollers, Mertztown.

LEADERSHIP SCHOOL - Pamela B. Keeney, Bethel; Barbara L. Schroeder, Kutztown; Larry M. Stratton, Kutztown; and Donna M. Stump, Bernville. STREET CAMPING - Jamie E. Batz, Richland; Sally A. Hensel, Shoemakersville; Pamela L. Imes, Fleetwood; William W. Lesher, Bernville; Connie E. Ohlinger, Mohrsville; Christine M. Rebman, Rehrersburg; Clark R. Sattazahn, Womelsdorf; and Kerry L. Schwoyer, Fleetwood.

LEADER FORUM - Roger W. Imes, Fleetwood; Gail L. Malsbury, Rehrersburg; Karen R. Sattazahn, Womelsdorf; Dorothy E. Stricker, Robesonia; and Debbie L. Stump, Bernville.

"This year's conference will include six different programs of leadership orientation and development," says Mae D. Bleiler, Extension Home Economist. "A Leadership School for 16-17 year olds; a Leadership Council for 18-19 year olds; a State 4-H Leaders Forum for adult volunteer leaders; delegate workshops for 13-15 year olds; street camping leadership training; and county 4-H reporters training are aspects of the program."

Selected teen leaders will attend a special school designed to increase skills to work effectively in planning and conducting county youth programs. Topics will include communication skills, understanding social concerns and group processes, and recreation.

Leaders and Extension staff members will meet with College of Agriculture officials and participate in educational workshops involving the understanding of leadership principles, working with groups, communications, and subject matter related to selected 4-H projects.

Also scheduled during Congress will be a street camping leadership program. Youths between the ages of 14 and 17 will be involved in this educational experience which will assist them in organizing similar programs in local communities.

Five county 4-H members have been named to serve as a Leadership Council representatives. They include: Darlene Dietrich, Hamburg; Dorene L. Hertzog, Kutztown; Judy Malsbury, Rehrersburg; Kevin Sattazahn, Womelsdorf; and Glenn D. Yanos, Douglassville. These teens who attended a previous 4-H Congress, will provide leadership for activities along with 55 other selected 4-H members from throughout the state.

Another county 4-H member, Steve Imes of Fleetwood, has been named to serve as a Leadership School Advisor. Steve who has attended last year's Leadership School was chosen by his peers to provide leadership for activities for the 16-17 year old segment of Leadership Congress.

Leadership Council delegates and Leadership School Advisors will arrive on the Penn State Campus June 20 for three days of counseling, orientation, and instruction to prepare them for their duties the remainder of the week.

Save seven times ag budget

Grangers ask reduction in state welfare rules

HARRISBURG — Charles E. Wismer, Jr., Master of the Pennsylvania State Grange, called for the immediate passage of House Bill 2044, a welfare reform bill that would reduce the state's welfare rolls, in a hearing of the Senate Health and Welfare Committee, in Harrisburg today.

The Welfare Department estimates that if they grant a one-time grant to a "transitionally-needy person", it will save $96 million in the first year.

"To place that figure into proper perspective," Wismer continued, "it equals almost seven times the amount appropriated to the Pennsylvania Department of Agriculture this year.

"We applaud the effort of House Bill 2044 in its attempt to pare down the welfare rolls to those who truly need the assistance," Wismer said.

"Like many on both a state and national level, it has been broadened and expanded to include much more than the original intent of the law."

According to the Pennsylvania Department of Public Welfare, over 19 percent of the City of Philadelphia's total population is presently receiving some form of public assistance.

"That figure represents well over a quarter of a million people." Wismer stated. "Was this the original intent of the legislation?" he asked. "To subsidize the lives of almost one-quarter of the population of that city.

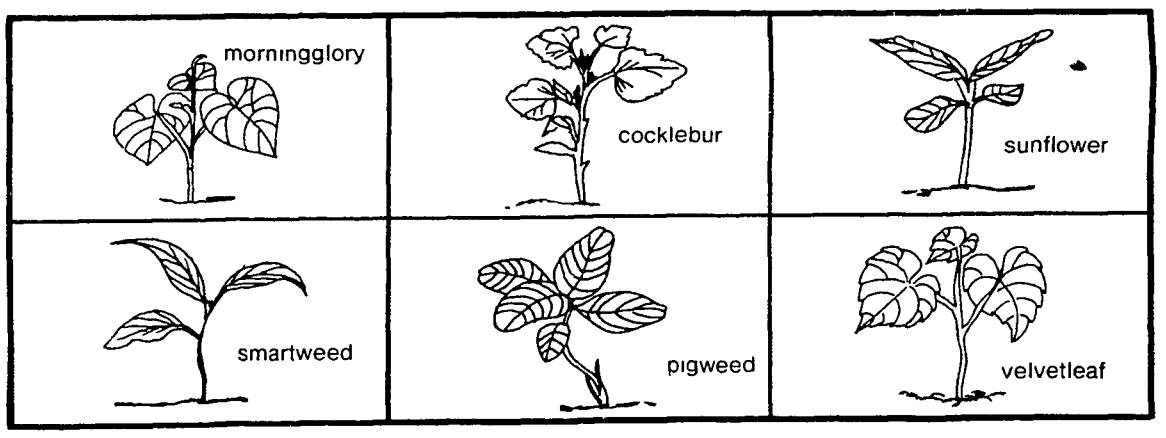
The legislation also provides that no CETA positions could be filled in a geographic until all the transitionally-needy persons in the CETA prime sponsor's area are neither employed or enrolled in a training program.

Wismer commended this provision by saying that "it is a giant step in providing waiting employment for those classified as transitionally needy persons."

He further commented that it "would go a long way towards solving the dis/incentive to return to work after receiving welfare."

AGWAY

DID THESE WEEDS GET PAST YOUR CORN SPRAYING PROGRAM?



For post-emergence weed control on corn...

Banvel® herbicide...

...alone or tank-mixed with 2,4-D (depending on your weed problem):

...to control tough, late-germinating broadleaf weeds,

...to cover misses of pre-emergence herbicide application,

...to get control where weather or other factors make earlier application impossible,

...to make sure that late weeds cannot mature to become the nursery for next year's weed crop.

Ask us for application details about Banvel herbicide...from Velsicol.

Note: Before using any pesticide, read the label.

Kempton County Fair slated for next weekend

KEMPTON — What's a good country fair made of? At the Kempton Country Fair, scheduled for Friday evening, June 20 through Sunday, June 22, it's many traditional things — and then some. Like sugar-dusted funnel cakes and hot chewy pretzels...the best weekend, this side of Nashville, in musical entertainment...more than 100 exhibitors and attractions...and a midway with whirling rides.

And then, more. Tractor pulls, a baking competition, jeep rodeos, a fireman's water hose contest, Children's Day with a magical act aimed to delight the small fry.

Topping it off, there is the crowning of Es Lieblischt Maedel, the Pennsylvania Dutch Queen who for three nights has been one of the contestants in various on-stage programs.

In its 26th year, it's a mighty project planned and manned by volunteers with all proceeds returned to the Kempton Community Center — and a fair with something new every year.

Opening Friday evening at 5 p.m., visitors are encouraged to bring their own chairs or blankets for watching many of the events. Highlight of the evening is the musical program of Big Al Downing who will perform at 7, 9 and 11, followed by two programs, a casual and a costume fashion show, presented by this year's entrants in the Queen Contest.

Friday's schedule also includes the moderate and super stock class B pulls held under the auspices of the Pennsylvania Tractor Pullers Association. Competitions start at 6:30 and last until midnight.

Events on Saturday include the 16th annual baking contest beginning at 1 p.m. Entries are submitted by boys and girls up to 16 years of age in the junior division, and in the senior division, from cooks of both sexes. Samples of their culinary skills will be on sale during the remainder of the afternoon for fair-goers to sample.

Children's Day, a highlight of the fair for youngsters, is planned for 2 until 4 p.m. with rides on the midway offered at a reduced rate and a very special entertainment planned for them at 4 p.m. Gennaro and Jane, skilled in sleight of hand with their doves, will captivate an audience of all ages.

Tractor pulls in the farm tractor class (for Berks and Lehigh counties only) start at 1 p.m. and Saturday evening, the farm sanctioned class tractors will take over from 6:30 until midnight.

Other events include atrractions and exhibitions of more than 100 craftspeople and specialized vendors who will bring mini-flea market items, handmade crafts, local products and other such items.

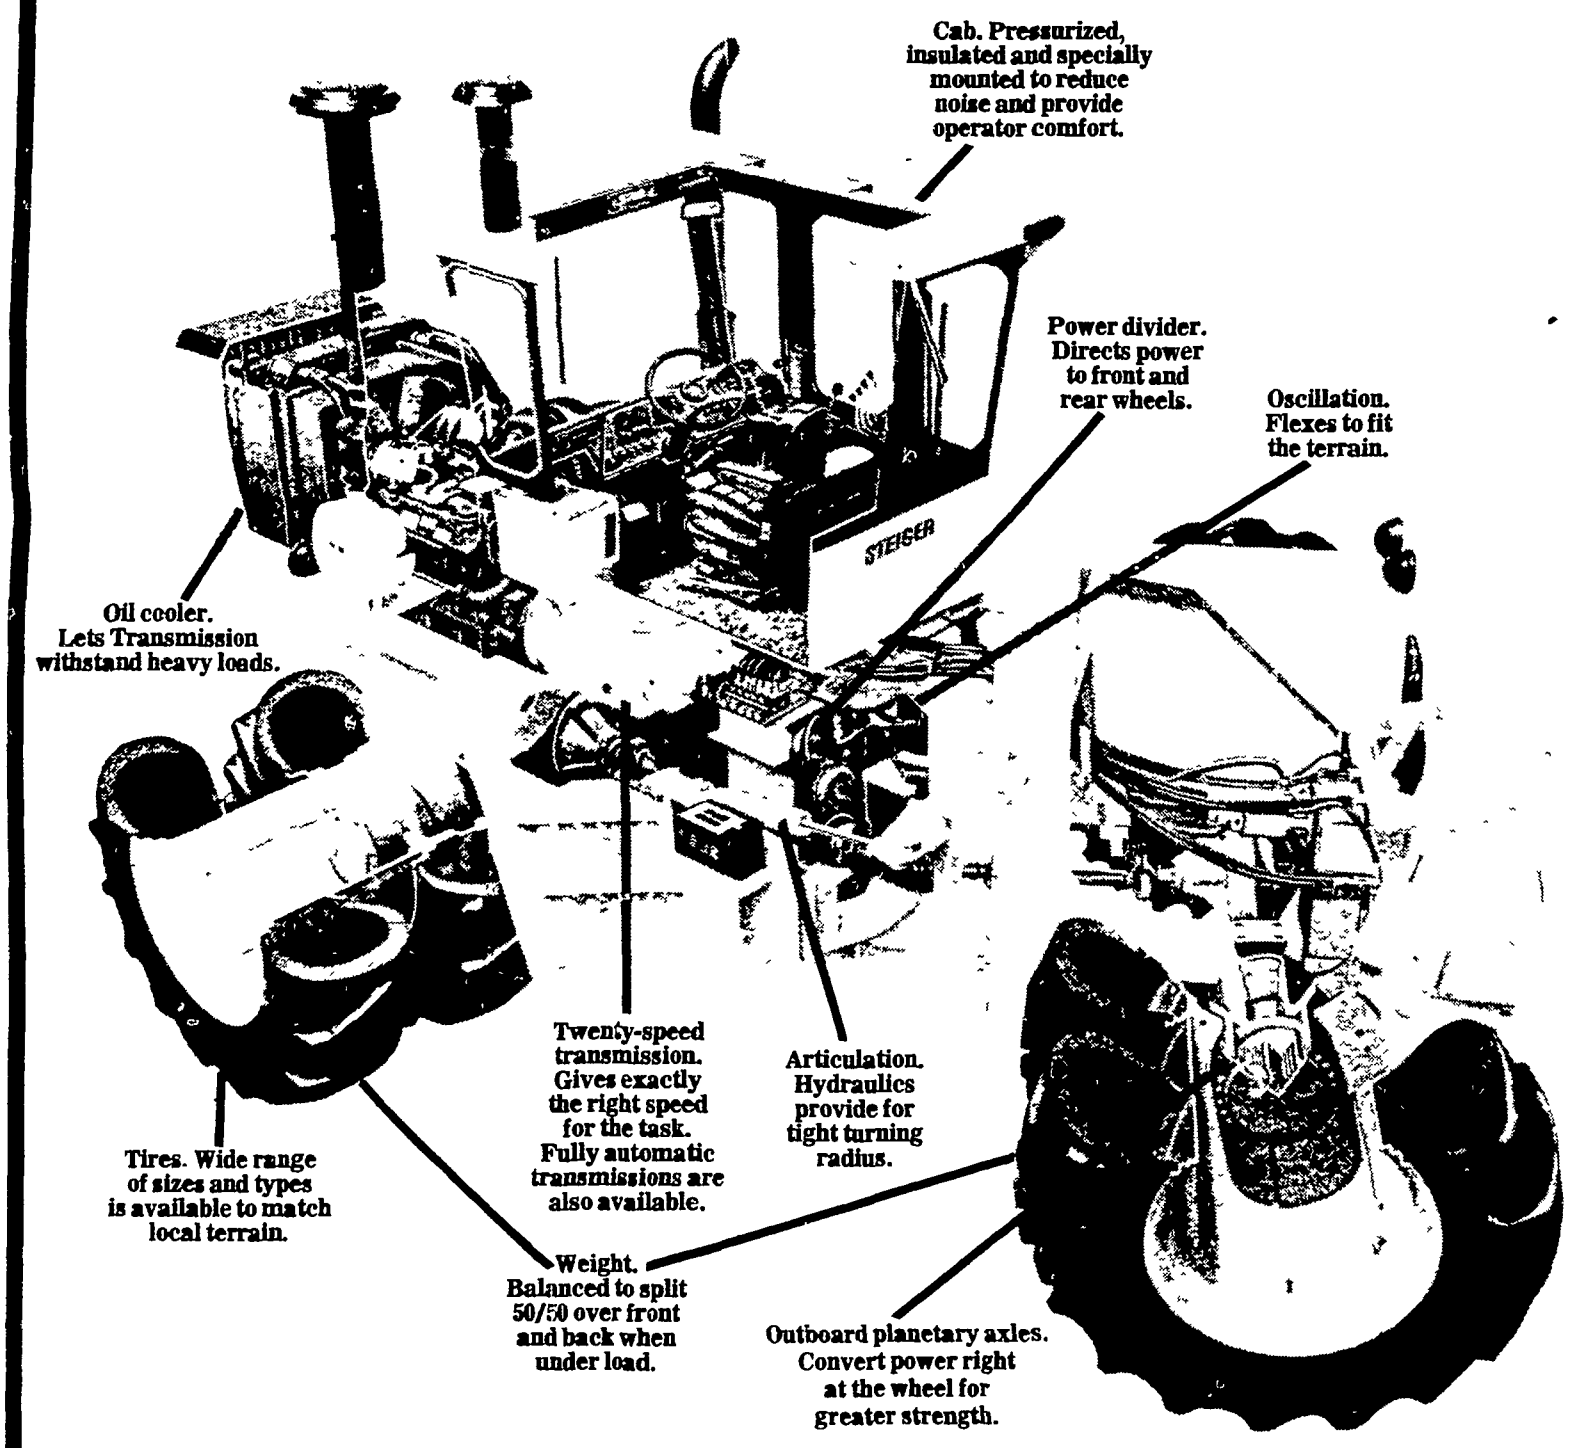
BIG FARM POWER AND EQUIPMENT

WHAT TO LOOK FOR IN A FOUR-WHEEL DRIVE

COMPARE STEIGER:



Cab. Pressurized, insulated and specially mounted to reduce noise and provide operator comfort.
Power divider. Directs power to front and rear wheels.
Oscillation. Flexes to fit the terrain.
Oil cooler. Lets Transmission withstand heavy loads.
Twenty-speed transmission. Gives exactly the right speed for the task. Fully automatic transmissions are also available.
Articulation. Hydraulics provide for tight turning radius.
Tires. Wide range of sizes and types is available to match local terrain.
Weight. Balanced to split 50/50 over front and back when under load.
Outboard planetary axles. Convert power right at the wheel for greater strength.
STEIGER

THE KEYS TO COMPARING 4WD TRACTORS.

Drawbar horsepower The most basic criterion is how much can it pull as measured in horsepower at the drawbar This is more important than engine horsepower because the drawbar is the working end of the tractor

Cost per drawbar horsepower This is the real way to measure what you're getting for the money Just divide the cost by the tested drawbar horsepower and you've got a figure you can use to compare all makes and types of tractors

Fuel consumption How much work can the machine squeeze out of a gallon of diesel fuel? While many people gauge fuel efficiency by gallons per hour this is not the the best measurement The best way amount of work per gallon or more scientifically horsepower hours/gallon

Drive train ratio Divide the drawbar horsepower by engine horsepower The result expressed as a percentage indicates how much power is actually available to do work at the drawbar

Weight to horsepower Generally speaking the higher the weight to horsepower ratio the more power the tractor will ultimately deliver You might ask why doesn't everyone build them real heavy? The answer the cost of steel But like in everything else you can find quality if you look for it

Noise All manufacturers have a decibel rating on their cabs One Steiger four wheel drive has been proven to be as quiet as 75 5 decibels under full power and load That's about as quiet as a pick up truck A quiet tractor reduces operator fatigue improves productivity

FINANCING A STEIGER IS NO PROBLEM!

Lehigh asks milk price boost at Scranton hearing

SCRANTON — Lehigh Valley Farmers urged an increase in prices to dairymen at a hearing held last Thursday in Scranton.

The cooperative's vice president in charge of member relations, John C. York, testified on behalf of the co-op's membership urging an increase in the class 1 price of $.18 per cwt.

York said, "The current level of prices to dairy farmers in the area has not been sufficient to assure a viable dairy farm enterprise."

His testimony indicated that in the Northeastern region of the state 230 dairy farms discontinued operations from the period 1975 through 1978. He further pointed out there was a reduction of 2400 dairy cows for the same period in the same area.

York said the full impact of inflation has not yet been totally felt by the dairy farmers.

This year's effect of inflation will break the back of many existing dairymen. In a time when energy supplies are short and costly, then need, for producing milk where it is consumed is essential and basic. This area cannot depend upon supplies of milk from the Midwest or any other distant region, he said.

Skyrocketing costs of feed, fuel, and machinery, along with other necessary milk production items, hit by inflation, is reducing dairy farmers' ability to continue. Dairy farm families are sacrificing as a result of this situation York said.

What does this all mean to America – once known as a land of abundance? It simply means a need of greater awareness by the general public of the real issues down on the farm, he said.

We must not wait until that final moment when food is not available at any price. Food and water are the most necessary items in the preservation of human life. Agricultural facts must be related through all lines of communications to the non-farm consumers, he said.

There must be a complete understanding of our nation's farm problems to impede an impending food crises. The decade of the 80's will see that crises if the current trend is to continue, York concluded.

Order 2 promotion plan again receives approval

NEW YORK, N.Y. — A plan whereby dairy farmers contribute money for milk promotion activities of the American Dairy Association and Dairy Council, Inc., was again approved Monday by Thomas A. Wilson, Market Administrator, New York-New Jersey Milk Marketing Area.

These milk promotion activities include advertising, nutrition education, publicity for dairy products, marketing and product research, and informational services.

Noting that New York and New Jersey have mandatory milk promotion plans, the Market Administrator stated that no dairy farmer will be subject to deduction under this program if he is making mandatory contributions under a state plan.

Wilson said that the action allows handlers regulated by the marketing orders to send "positive letters" to their dairy farmers suppliers.

A dairy farmer who receives a letter will be considered to approve for one year deductions of eight cents per hundredweight from his monthly milk checks, unless he notifies his handler in writing that no deduction should be made.

Money deducted from payments for milk delivered on or after June 1, 1980, will be paid directly by the handler to the American Dairy Association and Dairy Council, Inc.

The Market Administrator explained that participation is voluntary for both handlers and producers, and a participating producer may have deductions stopped at any time by notifying the handler. A producer who does not want to participate and who receives no letter need not notify his handler since no deductions will be made.

In approving the plan for the coming year, Wilson pointed out there has been no substantial opposition to the use of the positive letter procedure by producers.

Use of the positive letter approach was requested by Dairylea Cooperative Inc., Eastern Milk Producers Cooperative Association, Inc., and Northeast Dairy Cooperative Federation, Inc.

York Co. 4-H Council holds family night

YORK — Vice-president Lisa Dobrosky presided over the June 4 York County 4-H Council meeting.

Roy Thompson and Sue Janney led the American and 4-H Pledges respectively.

On June 6 Family Movie Night was held in conjunction with the Strawberry Round Up. The movie shown was "The One And Only, Genuine, Original Family Band" At intermission, popcorn, strawberries, and ice cream were served.

Leadership Congress will be held on June 23-26.

The 4-H Chicken B-B-Q will be held at the center on June 21.

4-H camp will be held from June 10 to 13.

Our July 2 meeting will be a slide presentation with refreshments served by Airville and Davidsburg Clubs.

Kempton fair

(Continued from Page A18)

Scads of food — much of it homemade and hearty — the midway, bingo, but most of all, the location nestled among fresh verdant hills, make this country fair a real and wholesome experience.

Admission is $2.50 per carload daily (no restriction on the number of passengers which encourages energy conservation). All entertainment in the fair is free and will go on as scheduled, rain or shine.

The Kempton County Fair can be reached from Rt. 22 either on Rt. 143, north of the Hamburg interchange, or 737, north of the Kutztown exit. It is located about 25 miles west of Allentown and 35 miles north of Reading. For information, interested persons may call or write the Kempton Community Center, Box 42, Kempton, Pa. 19529.

Manheim auctioneer to compete in world championship

BY DICK ANGLESTEIN

MANHEIM — Like hundreds of other interested onlookers four years ago, John Stauffer, of R6, Manheim, watched and listened attentively at the World Livestock Auctioneer Championship held at the New Holland Sales Stables in 1976.

But something special separated the 20-year-old youth from the remainder of the packed audience at the competition, which attracted the top auctioneers from throughout the U.S. and Canada.

"As I listened to the auctioneers, I told myself that in 1980 I want to go to it," Stauffer said.

"That's the goal I set for myself."

And, it was quite a goal for a young man only a few years out of high school who had as yet to conduct a sale of any type or auction off his first item.

But shortly after attending the 1976 championship, Stauffer began a four-year quest toward that goal, which will be attained when he takes part next Saturday in the 1980 championship competition at Templeton, Cal.

His initial step toward the goal was enrollment in Reppert's Auctioneering School in Decatur, Ind. about a month after the 1976 championship. Since completing that instruction, he served his year's apprenticeship and has been auctioneering at various area livestock and car auctions, along with conducting some public sales.

Actually, Stauffer's interest in auctioneering goes back quite a bit earlier than the 1976 championship.

"I was raised on a farm near Conestoga," Stauffer said.

"I'd go along with my father to sales and just got more and more interested in them.

In the spring, there wouldn't be too many Saturdays that we didn't go to at least one sale.

"I just always liked sales and auctioneering. But it was attending the 1976 championship that was the final factor in deciding to become an auctioneer."

Stauffer works as a livestock auctioneer at New Holland Sales Stables on Mondays and Thursdays and at Vintage Sales Stables on Tuesdays and Saturdays.

On Wednesdays, he works the car sale at the National Auto Dealers Exchange in Bordentown, N.J. Also, he conducts occasional public sales.

"All types of sales are interesting," he said.

"I enjoy working with cattle and other livestock because I was raised with them.

"But public sales are fun to conduct, too. I'd like to build up this part of the business in the coming years.

"Actually, anything is fun to sell as long as there are people who want to buy it."

In California, Stauffer will be competing against top auctioneers from throughout North America.

"I'm going there to compete and enjoy the competition," he said.

"It will be a chance to see how other auctioneers work and it will be good experience. It's something I decided to do and I'm looking forward to it."

The contestants will sell cattle consigned to a special sale arranged especially for the competition. A group of market owners and managers who sit throughout the audience will judge the competition.

"From what I remember from 1976, they sounded awful good and awful fast," Stauffer said.

He's not sure how many cattle each contestant will sell. It will likely depend on the number of contestants and the number of livestock consigned.

"I kinda hope we get a crack at two or three lots," he explained with a smile.

"That will give one lot to get your bearings, a second to get unnerved and then a third to really get to selling."

Vintage Sales Stables is Stauffer's sponsor for the competition.

On a typical Tuesday there, he auctions his way through about 1200 head of cattle, starting with the bulls at 11 a.m. and ending up with calves at about 9 p.m.

Since each animal is in the ring a half-minute or less, it's a continuous, fast-paced task for Stauffer,

The ringman starts the bid off and Stauffer works the price in 25-cent or even 10-

(Turn to Page A21)

Looking over program from 1976 World Livestock Auctioneer Championship held in New Holland are Mr. and Mrs. John Stauffer, R6 Manheim, with their daughter, Jennifer. Attendance at championship helped launched Stauffer into auctioneering career.

Manheim auctioneer

(Continued from Page A20)

cent increments, his eyes flicking from buyer to buyer.

In addition to the obvious vocal qualities an auctioneer must display, attentiveness is another important attribute.

Each buyer has an individual way of acknowledging a bid, which can range from a slight nod of the head to a twitch of the thumb.

"But you're dealing with professional buyers," Stauffer said.

"Once you get to know them and their different gestures to make a bid, it becomes a lot easier."

An auctioneer must also know the value of the item which he's selling in order to get the bidding started in the right price range. This is important particularly in public sales where the auctioneer moves from one item to another rapidly.

Stauffer worked at the recent Mennonite Relief Sale at Harrisburg and enjoyed helping with the auctioning of the quilts.

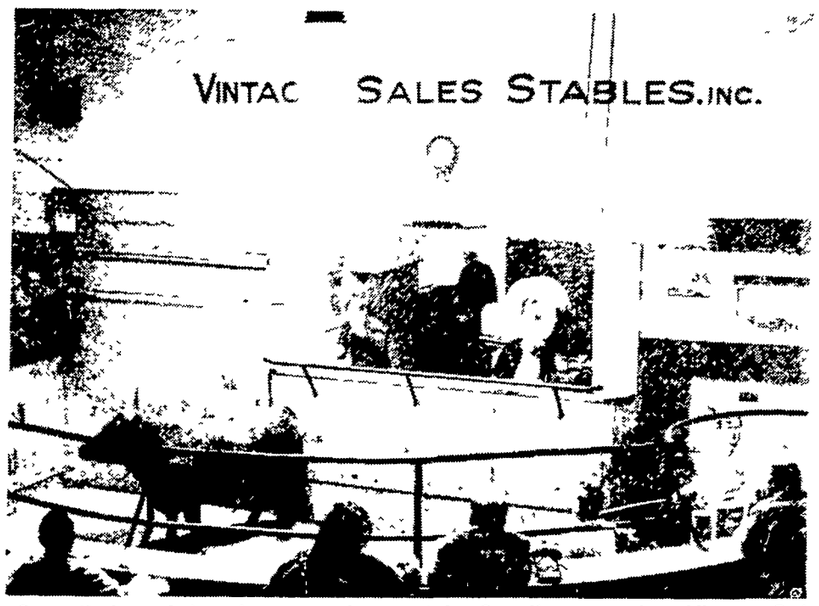
Stauffer will face some formidable competition in the national championship.

Some contestants may have an edge in that they competed in previous championships. But last year's winner was a 24-year-old first-timer, though.

And there has never been a top winner from the Northeast since the competition began in 1963.

But Stauffer is looking forward to the challenge of competing with considerable enthusiasm

And why not. That enthusiasm has helped to take him from the top spectator row to the center of the livestock ring in just four years.



Overall view of ring shows auctioneer John Stauffer at work at Vintage Sales Stables as he prepares for upcoming competition in California.

4-Her named top equestrian

CLEMENTON, N.J. — Nikki Darcy, a seven year 4-H'er from Waterford was chosen Camden County 4-H Equestrian of the Year last Friday evening.

For her selection Darcy received a sash, plaque and corsage. Alpine Florist of Pine Hill, served as official florist for the event.

4-H Equestrian of the Year is selected on the basis of a personal interview, an oral presentation on "their most meaningful 4-H Horse Project experience", and a question about Horse Management.

Darcy, a member of Silver Sprus, is now eligible to represent Camden County at the "State 4-H Equestrian of the Year" on June 26 held at Cook College in New Brunswick.

MaryAnn MacIntosh, of Long-A-Corning 4-H Club was first runner-up. Judges for the evening were Donald Wickman, Atlantic Co. 4-h Agent and Patricia Mueller former county Equine Princess.

Dairy Princess creams Commissioner Huber in cow milking contest

BY SALLY BAIR
Staff Correspondent

MT. JOY — It was clearly no contest when County Commissioner James Huber challenged reigning Lancaster County Dairy Princess Lucinda Landis to a milking contest as a way to garner publicity for the county's dairy industry.

In the end, Huber was forced to admit, "She creamed me!" Although Huber said he has some practice on his uncles' farms as a youngster, he didn't have what it takes to beat Lucinda who gets daily practice on her father's farm, although not usually by hand.

The contest took place at the farm of Elvin and Marian Brenneman, Mount Joy R2, and a very placid, cooperative cow named "Love" allowed herself to be the object of some very unprofessional pulling and squeezing.

Huber gamely sat by the cow and massaged her udder, saying, "I'm warming my hands," but as the milk refused to flow, he questioned, "Are you sure she's not dry?" When "officials" offered to expand the length of milking time allotted, Huber said, "That's all right."

Even a get-acquainted visit to the Brenneman farm the night before the contest did not give him the necessary advantage. There was a lot of encouragement for the Commissioner from the small crowd which gathered to watch, including four of the six contestants in this year's county contest.

There was also a lot of advice, most of it to no avail. "You have to pull a little harder," someone was heard to say. Another said, "How would you like to milk 20 cows that way?"

When Lucinda sat down the milk flowed easily and she quickly had the milk foaming in the bucket. Although there was only an eyeball measurement, there was no doubt of the winner. Huber conceded, saying "I know when I'm outclassed. She just didn't like a politician's hands."

Even a rematch staged a half hour later for the benefit of television cameras left Lucinda a clear winner, although Huber's form had improved somewhat and he got slightly more than a trickle. He asked for, but was not granted, "a pint handicap" in the second contest. He mentioned that perhaps his problem was that he didn't have a stool.

When Huber jokingly opened his mouth as Lucinda milked, she accommodated him by squirting a stream of fresh warm milk in his direction. As he mopped his face, he inquired, "Is milk good for your complexion?"

All in all, it was a lot of laughs for the participants and each received a large piece of cheese for his efforts. And Commissioner Huber had a chance to show his knowledge of the county's dairy industry by telling reporters that Lancaster County is first in the state in dairy production value and second in the nation. In terms of cow

(Turn to Page A23)

No question, Lucinda beat the Commissioner.

"You sure she's not dry?"

numbers, it is first in the state and third in the nation.

The contest for the new Lancaster County Dairy Princess will be held Saturday, June 21, beginning with a reception at the Farm and Home Center at 6:30 p.m. Dinner and the program will follow at 7:00 p m Tickets are available through today by calling contest chairmen Mr. and Mrs. Earl Stauffer, Ephrata R1, or Peter C. Witmer, Willow Street.

"Good two-handed technique fills the pail..."

Order 4's May price set at $13.09

ALEXANDRIA, VA — Middle Atlantic Order Market Administrator Joseph D. Shine Tuesday announced a May 1980 base milk price of $13.09 per hundredweight and an excess milk price of $11.49.

The weighted average May price is $12.87 and the butterfat differential for the month is 15.7 cents. The May base milk price is up 10 cents from April 1980 and is 92 cents higher than last May.

Order 4 prices are announced for 3.5 percent milk f.o.b. plant location within 55 miles of Philadelphia, and also within 75 miles from the nearer of Washington, DC or Baltimore, MD. There is a 6-cent direct-delivery differential applicable to producer milk received at plants located within 55 miles of Philadelphia.

Shine said producer receipts totaled 498.4 million pounds during May, an increase of 1.7 percent from the previous month, on a daily basis, and 2.3 percent above last May.

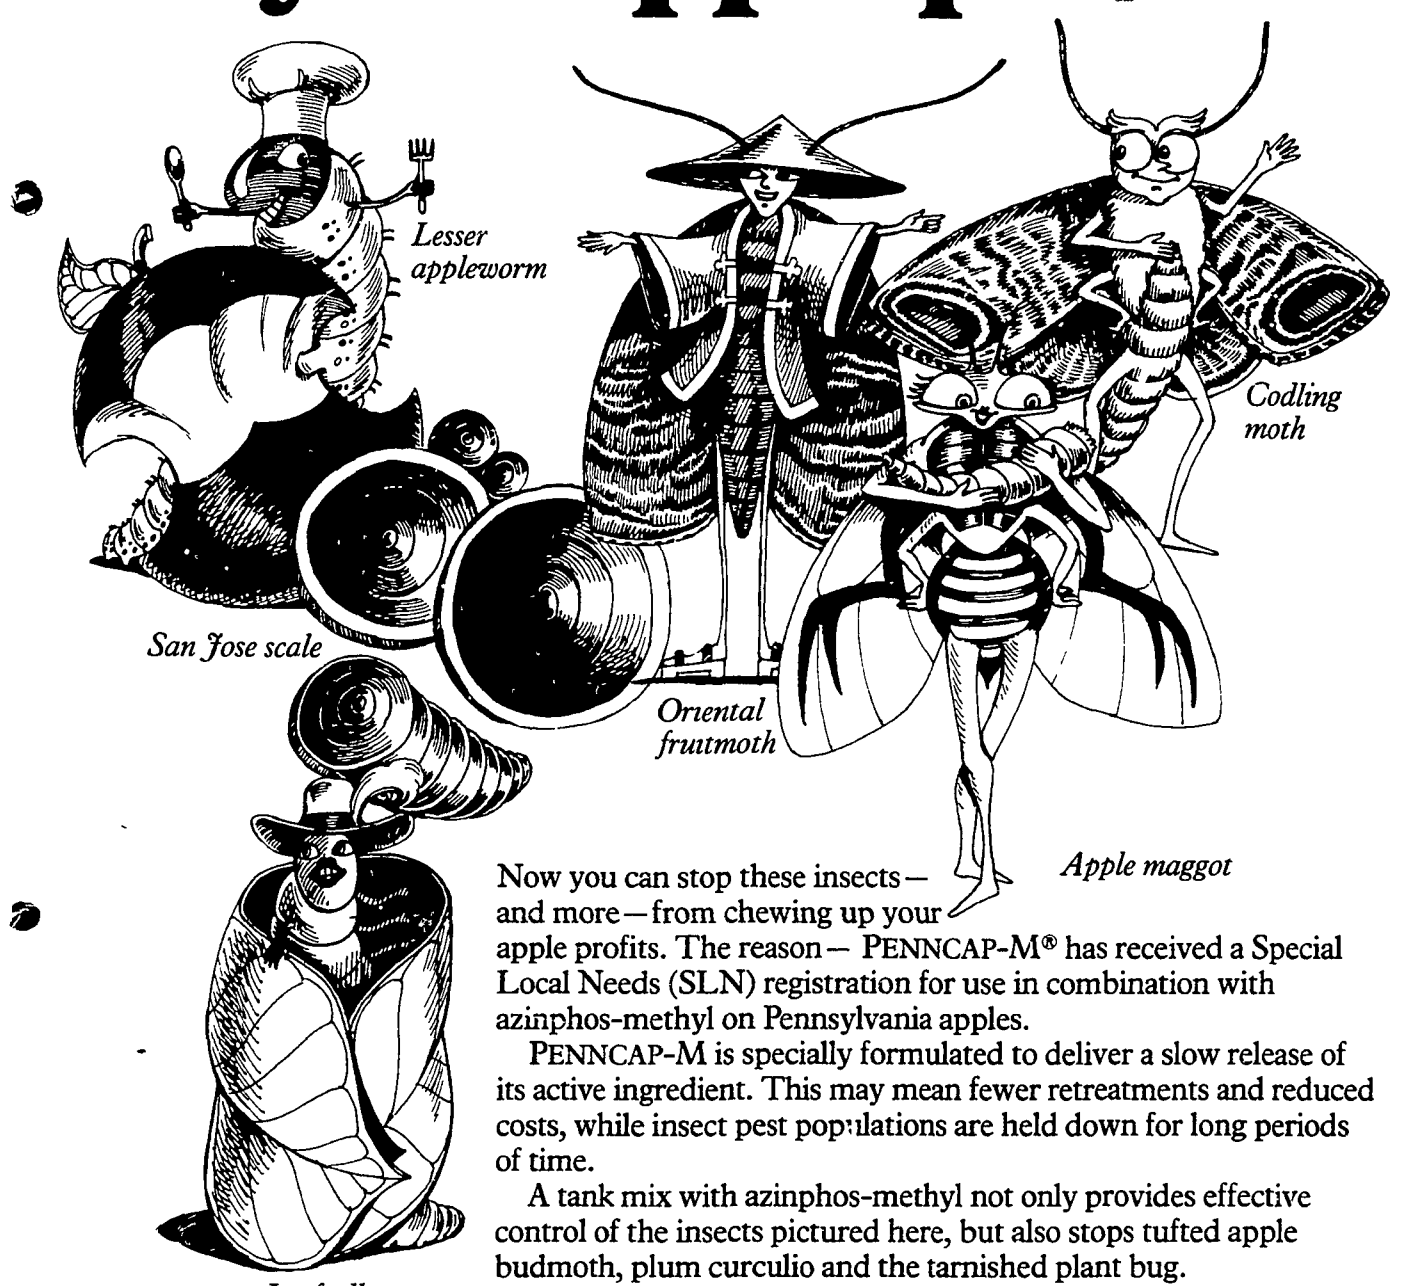
Class I producer milk totaled 242.5 million pounds and accounted for 48.66 percent of total producer milk receipts during the month, down from 49.96 percent in April and below the 50.02 Class I utilization percentage last May.

Base milk accounted for 86.90 percent of total producer milk receipts in May, nearly the same percentage as a year earlier. There were 7315 producers supplying Order 4 handlers during the month and the average daily delivery per producer of 2198 pounds was up 16 pounds from April and was 22 pounds or 1.0 percent above last May.

The average butterfat test of producer milk was 3.60 percent in May compared to 3.58 percent last year.

Middle Atlantic Order pool handlers reported Class I in-area sales of 6.9 million pounds per day during May, an increase of 1.2 percent from last May, after adjustment to eliminate variation due to calendar composition.

Don't let 'em put holes in your apple profits.



Now you can stop these insects—and more—from chewing up your apple profits. The reason— PENNCAP-M® has received a Special Local Needs (SLN) registration for use in combination with azinphos-methyl on Pennsylvania apples.

PENNCAP-M is specially formulated to deliver a slow release of its active ingredient. This may mean fewer retreatments and reduced costs, while insect pest populations are held down for long periods of time.

A tank mix with azinphos-methyl not only provides effective control of the insects pictured here, but also stops tufted apple budmoth, plum curculio and the tarnished plant bug.

There may be a lot of insects heading your way. Get them before they get your apples. Ask your local Pennwalt dealer for economical PENNCAP-M. Pennwalt Corporation, Three Parkway, Philadelphia, PA 19102.

Official Dairy Month proclamation

IN THE NAME AND BY AUTHORITY OF THE

COMMONWEALTH OF PENNSYLVANIA
GOVERNOR'S OFFICE
HARRISBURG

PROCLAMATION

DAIRY MONTH
JUNE 1980

Pennsylvania's great wealth comes from its people land and industry Agriculture is the keystone of Pennsylvania's economic stability, and the keystone of our nation's heritage

The dairy industry is a billion dollar industry in Pennsylvania As an agricultural state Pennsylvania ranks among the top five states in the nation in the number of dairy farms, cows on farms, amount of milk produced marketed and sold to processing plants, in the top five states for production of milk milkfat, evaporated and sweetened and condensed milk, and ice cream

Milk's importance to the human diet has been recognized since prehistoric times Milk is nature's most "nearly perfect food" and provides many essential nutrients for good health at a minumum cost to the consumer Two eight-ounce glasses of milk provide 2/3 of the calcium and 1/3 the protein an adult needs daily Milk is also a primary source of riboflavin and contributes phosphorus, magnesium niacin thiamin and vitamins A B_6 and B_{12} for a balanced diet

Pennsylvania's dairy industry and the family farmers who have made the industry grow are a source of pride for us all It is fitting that we set aside a time to seek a renewed awareness of the importance of milk to our diets and to our economy

Therefore I Dick Thornburgh Governor of the Commonwealth of Pennsylvania do hereby declare June 1980 as "DAIRY MONTH" in the Commonwealth I urge everyone to observe the month with appropriate activities in recognition of the fact that Pennsylvania's dairy industry is truly "Growing Better "

GIVEN under my hand and the Seal of the Governor at the City of Harrisburg this second day of June in the year of our Lord one thousand nine hundred and eighty and of the Commonwealth, the two hundred and fourth

Dick Thornburgh
Governor

This is the Dairy Month proclamation signed at the bottom by Governor Dick Thornburgh and issued in the name and by authority of the Commonwealth. It cites the importance of milk products and the contribution of dairymen to the state economy.

Berks Ag Expo set for this week

BY LAUREL SCHAEFFER
Staff Correspondent

WYOMISSING — The second annual Berks County Agricultural Expo will be featured at the Berkshire Mall, here, during the week of June 16 to 21.

Special programs and demonstrations will be featured throughout the week giving the public the opportunity to observe and learn more about the agricultural industry of Berks County.

Scheduled events included a Grand Opening Ceremony, June 16th at 6 p.m. with Reading City Mayor Karen Miller featured during the Ribbon Cutting Ceremony, followed by a Kick-off dinner at 7 p.m. at John Wanamakers Restaurant.

The Foggy Mt. New Liberation Art Unit featuring the sounds of Bluegrass music will be appearing Thursday evening and the Annual Dairy Princess Fashion Show is scheduled for Friday evening at 7 p.m. Saturday evening is devoted to the 1980 Berks County Dairy Princess Pageant at the Sheraton Berkshire Inn, 7 p.m.

Many other displays and demonstrations will be on-hand throughout the week including; wool spinning and weaving, butter making, beef cook-out, and honey processing. Also scheduled for appearances are the Apple and Honey Commodity Queens.

The executive committee coordinating the Expo is; Donald Duncan, Expo Chairman; Feryl Treichler, Master Berks County Pomona Grange; Jack Kooker, President Berks County Farmers' Association; and Ellen Dietrich, Secretary/Treasurer of the event.

Ticket and dinner information can be obtained by any of the above or by contacting Ellen Dietrich at the Berks County Agricultural Center, phone 215/372-4655. Featured speakers during the kick-off dinner will include Charles Wissmer, Master of the Pennsylvania State Grange and Richard Newfer, Executive Secretary of the Pennsylvania Farmers Association.

Organizations participating in the Expo include: Pennsylvania Jersey Cattle Club, Berks County Sheep and Wool Growers, Agricultural Stabilization and Conservation Service, Soil Conservation Service, Berks County Mushroom Growers, Berks County Pomona Grange, Pennsylvania Dept. of Agriculture, Berks County Dairy Goat Club, Berks County Guernsey Breeders Association, Berks County Holstein Club, Berks County Dairymen's Association, Eastern Pennsylvania Pork Producers, Dairy Council Inc., Berks-Lehigh Valley Farm Credit Association, Farmers Home Administration, Federal Crop Insurance Corporation, Berks County Conservation District, Berks County Farmers' Association, Berks County Extension Service, Berks County Beekeepers, Ontelaunee Orchards, Fruit Growers Assn., Pennsylvania Bureau of Forestry, and Berkleigh Equipment Company, Inc.

York 4-H Beef Club meets

YORK — A fitting and showmanship demonstration was the program for the June 2 York County 4-H Beef meeting.

Leader, John Hausner gave helpful tips on fitting beef cattle. Chris Sunday, Brenda Walter, Chris Shive, and Bill Wise demonstrated the right and wrong ways of showing cattle.

There was a short business meeting when some dates to remember were discussed.

June 14 is Jr. Livestock Field Day at Penn State. Participants will judge beef, sheep, swine, and meats. Following this will be a showmanship contest.

On June 21 there will be a chicken barbeque at the 4-H Center.

The Lehigh County Judging Contest will be held on July 1.

On July 4-5 the Northeastern Angus Preview Show will be at Timonium Md.

York County will be hosting a livestock judging contest on July 9.

Will diet change prevent heart attack?

LANCASTER — What is the exact relationship of diet and heart disease - and cancer, and what changes are needed in the diet of a heart attack patient?

These were among the frequent question submitted to Ask a Dietitian, a cooperative project of the Central PA Dietetic Association and the Lancaster Pennsylvania Chapter of the American Heart Association, in their observance of National Nutrition Month.

A few of the questions were: What proof is these that reducing the amount of cholesterol and saturated fats in my diet will really prevent a heart attack?

ANSWER: No one can guarantee that any individual will, or will not, develop heart disease or have a heart attack. However, numerous clinical studies in America and around the world have proven that there is a strong relationship between the amount of cholesterol and saturated fats in our diet and the development of atherosclerosis, or hardening of the arteries, which sets the stage of heart attack, stroke and other conditions. High levels of cholesterol and saturated fats increase your risks. If you have a history of heart disease in your family, then diet modification is especially important.

My husband had a heart attack, and the doctor said to limit cholesterol, saturated fats and salt. Do I have to buy special foods?

ANSWER: Talk with your doctor. In most cases, you won't need to buy special foods if you follow these suggestions: reduce your use of red meat and substitute chicken, turkey, veal and fish; avoid butter and whole milk and use polyunsaturated vegetable oil, margarine and low-fat milk; use no salt in cooking or at the table, substitutue herbs and spices. Maintaining ideal body weight also is important, so avoid sweets and substitute fresh fruits and other low-calorie foods. Remember that all processed foods are higher in salt, fats, and sugar than their homemade counterparts. Happy eating!

QUESTION: I keep hearing about diet and heart disease. Is there a relationship between what we eat and cancer?

ANSWER: Recent studies have indicated that, indeed, there may be a link between excessive levels of some foods and the development of various kinds of cancer. For instance, high levels of carbohydrates like white flour, which have little or no fiber, are associated with an increase risk of bowel cancer. Excessive amounts of saturated fats may contribute to an increased risk of breast cancer in women. Although the issue has not been resolved yet, there may be an increased risk of bladded cancer among persons who consume high amounts of sugar substitues. It would be prudent, then, to restrict consumption of saturated fats and use polyunsaturated vegetable oils and margarines and low-fat cheeses and milk; eat high-fiber grain products such as whole bran bread and whole grain cereals; and avoid heavy use of sugar and its substitutes. These suggestions will promote good health.

Do you have a question? Sent it to Ask a Dietitian: American Heart Association, Lancaster Pennsylvania Chapter, P.O. Box 3026, Lancaster, Pa. 17603.

Joins Farm Credit

YORK — Richard Zook, General Manager of the Federal Land Bank Association of York and Associate Manager of the Production Credit Association of York, announced that Bruce W. Miller has joined the York Associations as a loan officer.

Bruce W. Miller

Miller, a native of York County, was graduated from the Red Lion Area High School in 1974. He majored in vocational agriculture and was the recipient of many FFA awards. He received his B.S. Degree in Food Services and Ag. Education from Penn State in 1978.

Since graduation from college, Bruce has been employed by the Southeast Farm Credit Association. Bruce will be working out of the York Branch and will be responsible for serving the agricultural producers of south central York County, east of I-83.

WHAT'S NEW

Accurate planting at 8 mph

CHICAGO, Ill. — International Harvester's Agricultural Equipment Group has announced its new line of 800 Series Early Riser Cyclo Air and Plate Planters with advanced electronic controls for faster, earlier planting, and earlier rising crops.

In announcing its new line for last 1980 production, the company said its new models represent the most significant advancement in planter technology since the IH Cyclo Planter was developed in 1971, using air to meter seeds into the ground.

Developed at a cost of more than $25 million, with more than 30 patents pending, IH has tested the new units in over 35,000 acres of crops in four countries since 1977, including 20 states in the U.S.

Equipped with an improved metering system plus a new row unit, IH's Cyclo air models have up to 30 percent improved "in-row" seed spacing, at speeds up to 8 mph, in most crops, even in trashy conditions. This is at least 33 percent faster than the recommended speeds of most competitive models, IH said.

Calling its new plate planters the most productive in their class, IH said they have many of the new features found on the air versions.

Other features on the plate units include the row unit for faster, more uniform, seed germination and emergence; new and improved features that don't require tools for greater ease of operation and faster adjustment; and new electronic controls for "worry free" performance.

Featuring a dramatic new look, IH said that the new line retained only 113 parts from the previous models, but significantly increased parts commonality between models, up from 13 to 43 percent. Including new row units, new frames, and new electronic markers, increased parts standardization also contributes to better quality control and parts availability to customers, IH said.

"With today's rising costs, the importance of timeliness, and concern about weather, there can be little room for error in planting," said Stanley F. Lancaster, vice president and general manager for IH's Agricultural Equipment Group, North American Operations.

"That's why these planters are designed for faster, earlier planting, earlier rising crops."

In discussing its new row unit, IH said that this assures superior seed placement and soil/seed environment.

Providing a new planting system based upon the principle of "the last soil out is the first soil in", IH said this leads to faster, more uniform seed germination and emergence, because moist soil is returned to the area surrounding the seed.

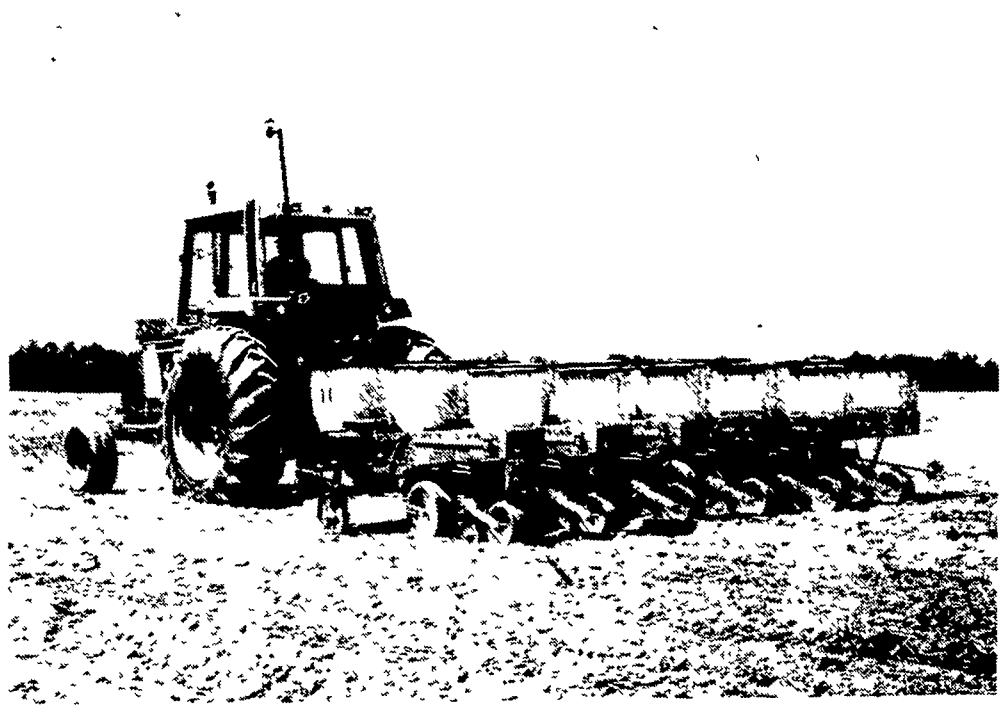
"These new row units represent a dramatic advancement in the art of creating an optimum environment for seed placement," said Harold Boyanvosky, manager, Crop Production, who heads IH's team of engineering, manufacturing, marketing and finance representatives that developed the new line.

Essentially, the new row unit refines the principle of placing seed into the ground, utilizing exclusive staggered 14-inch double disc openers, exclusive equalizing gauge wheels with unique "moisture saving" tires, an IH patented replaceable furrow firming point, new twin inverted covering discs and wide, flexible press wheels.

New on the unit are the equalizing gauge wheels which gauge furrow depth equally, plus a special feature on the tires. Special "moisture saving" grooves trap moist soil along side the trench for uniform soil cover.

The exclusive furrow firming point provides the narrowest "V" furrow in the industry, another new benefit. This is a result of using narrower openers, and a new and exclusive metal seed shoe for better depth control, he said.

Additionally, new twin covering discs redeposit the moist soil directly over the seed, assuring that "the last soil out is the first soil in," another IH exclusive.



New from IH is this Early Riser Cyclo Air planter, which can plant with 30 percent improved "in-row" seed spacing accuracy up to eight mph in most crops, depending on population needs. Early Riser models are also available in plate version.

2250 psi pressure washer

Warwick Pump, Inc., Baltimore, MD, offers a line of hot and cold water pressure washers with performance up to 2250 psi.

With this kind of power, these pressure washers are capable of handling the toughest cleaning jobs faster, better and with lower energy and detergent use per job than with lower pressure machines. Tough, reliable and simple to operate, Warwick pressure washers are available electric or gasoline powered.

The heart of the Warwick pressure washer is the patented diaphragm pump which operates at 90 percent efficiency. The pump is oil operated and has no mechanical attachments to cause wear at the diaphragm. The diaphragm cannot be damaged by suction blockage.

The pump, which is direct-coupled to the motor, can run dry without damage. It will also operate with boiling water and will handle most corrosive chemicals safely.

Warwick Pump, Inc. is headquartered at Box 18236, 5408 East Drive, Baltimore, MD 21227.

NAIL 'EM ALL

Protect your tobacco leaf quality all the way from the plant bed to the curing shed with ORTHENE.

ORTHENE® Tobacco Insect Spray is deadly on every major tobacco-damaging insect—tobacco budworm, green peach aphid, hornworm, cutworm, cabbage looper and grasshopper. Yet, ORTHENE is so gentle to tobacco plants, you can spray for flea beetles right in the plant bed!

Don't let any insect cut into your leaf quality. Nail 'em all with a full-season program of ORTHENE.

Avoid accidents For safety, read the entire label including cautions Use all chemicals only as directed

Letters To The Editor

Dear Editor:

Your editorial, "Beware The Ordinance", struck a sensitive nerve with me. The statement about people, especially farmers, attending Township meetings is mostly a fallacy.

In the last 20 years, but especially in the last ten years, I have attended the majority of township meetings. This has not helped me or the proper direction for government zoning and ordinances.

It seems that the human nature in people with power takes an opposition point of view to other people's plans. This is especially true at the local government level vs. the local residents. The way I tried to explain my situation at these meetings seems to have been translated in reverse.

I feel that ordinances should only control soil erosion problems, roads and new road right of way, pure water conditions and sewage disposal conditions. The nuisance ordinances and anti property rights ordinances should be completely eliminated.

It has always been that if a neighbor feels offended by a situation that person can civil sue the person responsible for that situation, for damages and an order to correct the problem.

It is not fair that because one person has a grudge against another person, to have the township intervene with Township funds to settle that neighbor dispute. What would be agreeable, in my opinion, is to use the services of the township solicitor, at a reduced rate, to help a person file this type claim and to explain both the pro's and con's to all parties affected.

If a person or a group of people don't approve of a situation, they can always buy out that situation and change it. Every day we see ads expressing how valuable a property is because it is zoned commercial. Zoning is an inequitable way of distributing the land, resources, and wealth.

With all the professional help and planning available through government agencies, there is no reason to have local authorities dictate specific details for every person to live by. Authority at the local level should be made clear by state and national legislation. It should be made clear that we either do have property rights or that we don't have property rights.

One of the downfalls of people in government is that they want to eat the cake and have it too. They play both sides of an issue and therefore lose the proper perspective.

A simple solution is to direct laws toward individual decisions and allow time to solve the problem. There isn't any political problem that has claimed to have solved that was not really solved by time and changing elements.

Daniel M. Groff
Lititz

Dear Editor:

Good editorial on "Farm Ordinances" even if it only scratches the surface.

The very fact that politicians are considering a "Right To Farm" bill makes by blood boil. It is indicative of just how far down the 'socialist' road we Americans have strayed.

As a member of PFA and Dauphin County Chairman of the Political Action Committee I wonder how thoroughly we have examined SB 10. As an ex-highway Engineer I must raise the question of the very survival of our Pennsylvania Highway System with the new heavy truck limits. The Interstates, maybe-take a ride across I-80. But the secondary routes, that serve all the Rural area, never, never.

There is no way to keep those trucks off the secondary streets and highways. And the bridges-who will ultimately pick up the tab for all that maintenance, Pennsylvanians, and that includes 'farmers' in a very big way.

The trucker who is not willing to limit his loads to our fair limits is a bandit who threatens dairymen to submit to HIS limits or else.

Back to the editorial. It is good to attend meetings but we need to encourage "Farmers" to become **candidates**. That's where he has the opportunity and platform to 'cry out' against the evils of bureaucracy and politicians who would deny his right to farm.

Keep on — persevere.

Andrew J. Watson,
Harrisburg

Dear Editor:

May I congratulate you on the series of articles you are currently publishing on items related to estates and estate settlement. Sheila Miller is to be commended for her successful venture into the art of reducing legalize into the common language of the "man on the street", or more pointedly "the man behind the plow"

In conjunction to my adult law programs at Goldey Beacom College, I have distributed photocopies of several of the discussions presented by Ms. Miller, as an aid to my students now engrossed in covering the area of real property and wills.

My own teachings always conform to the practice of presenting little understood legal theory in a manner that will be useful and applicable to the students' lives and occupations. Thus, you will understand my grateful appreciation to your publication in removing doubt and difficulties that lay in the path of the farmer who toils so many years, often generations, to provide an estate for his wife and children.

We are long-time subscribers to LANCASTER FARMING. It provides a "textbook" course in the farmer's dilemma. As "city cousin" consumers we never trace the problem of increasing prices and inflation to the farmer's door. Again, thank you for an interesting and intelligently written farm journal.

May I add that the contribution of the "farmer's will", in your editorial of May 24, although humorous, does give a tongue-in-cheek indication of what could possibly remain to be passed along to one's heirs and family in 1980.

William G. Ott
Professor of Law
Goldey-Beacom College
Wilmington, Del

Dear Editor:

In regards to your article on sludge in Londonderry. Mr. Lutz is a builder not a fulltime farmer. The land that the sludge is being dumped on and left for months, at a time in piles is on rented land bought for speculation and not owned by Lutz. There is no house, no barn, just piles of sludge.

No one was at the township meeting because the township does not notify the people only Mr. Lutz and the DAR. If you would have called the DAR, you would have been informed that there were violations.

The only reason this sewerage is being used is because it is free and on rented land.

I raise hogs on a small farm on Newberry Road. All winter we take the blame for the stink. It takes a lot of time to show the neighbors where the real stink is coming from.

I realize the good in sludge used right but this is not a case of being used right, this is a case of greed.

Ben Housman

Horse disease panel favors equine piroplasmosis test

WASHINGTON, D.C. — Based on statements presented at a recent open meeting, a panel of U.S. Department of Agriculture veterinarians has concluded that horses should continue to be tested for equine piroplasmosis before being allowed into the United States.

USDA's Animal and Plant Health Inspection Service had proposed dropping requirements for this testing April 27, 1979.

Considerable differences of opinion were expressed on the pros and cons of such action, according to W. Q. Nelson, an APHIS veterinarian. Therefore, he said, Assistant Secretary of Agriculture P. R. Smith called for a panel to receive statements from people who had first-hand experience with the disease and were considered experts in their field.

The panel decided the weight of evidence presented to them during public meetings March 18 and 19, indicated a need to continue the present import testing procedure, Nelson said.

Equine piroplasmosis is caused by a tick-borne microscopic parasite that destroys red blood cells. Although the disease rarely is fatal and some infected horses may never show symptoms, under certain circumstances, it can weaken horses through anemia and liver damage.

The panel's report is available from the APHIS program services staff, room 870, 6505 Belcrest Rd., Hyattsville, Md., 20782. Written comments on the report should be sent to Room 734 of the same building by August 5.

PPHA plans summer show

DAYTON — The Pennsylvania Polled Hereford Association has scheduled their summer show for Saturday, August 16 at the Dayton Fairground.

The Association activities will get underway at 1 p.m.

The PPHA show will be held in conjunction with the local Armstrong County Fair.

For more information, contact Eugene Stockdale, R1 Dayton, PA 16222.

Baldwin, Ailes family farms highlight tour

BY JOYCE BUPP
Staff Correspondent

DELTA — A Century farm owned by the Joe Ailes family and the cow-calf operation run by the family of John Rush Baldwin III are the livestock highlights of the Delta centennial farm tours set for next Saturday.

Two tours covering six area farms are scheduled as part of the opening day activities when Delta begins its eight-day-long centennial salute on June 21. Two-hour hayride tours will leave from the community building periodically from 9 a.m. through 2 p.m.

Barbara and John Rush Baldwin III's livestock setup at R1 Delta is scheduled as the final stop on Tour 1.

Charolais-Angus crosses are king here, with a 65-head cow-calf herd maintained and about 35 steers fattened and direct-marketed to customers annually. Some 660 acres of owned and rented land goes into crops, with some of the yield of the corn, hay, oats, barley and wheat earmarked for the livestock herds.

As part of the original Cooper family land grant, the Baldwin's 160-acre farm lies in the heart of farmland rich in the culture and history of the hardy people who settled the plateau high above the Susquehanna.

One bit of local lore focuses on the Baldwin's double-decker barn, reportedly one of the few remaining of its type.

Basic building material for the sturdy structure was white pine and chestnut, which local legend says was retrieved when the lumber floated down the Susquehanna from somewhere upstate. While details are vague after years of passing along the story, the Rush family speculates that those timbers may have come downstream during flood, to be salvadged by the thrifty York County pioneers on the Cooper grant.

Baldwin's father purchased the rolling farmland in 1951 from Thomas Galbreath, with the land having been farmed for many years by Caleb Beard.

Agriculture had long been in the Baldwin heritage, with the family's earlier roots in neighboring Harford County, Maryland, where John's grandfather once operated a gristmill.

When the younger Baldwin was discharged from the service in 1954, he took over the operation of the place.

A graduate of the University of Maryland's ag college, and member of the winning livestock judging team that had competed in national competition at Chicago, Baldwin had a solid interest and background in beef production. Although a flock of sheep roamed part of the pasture for awhile, the cow-calf herd has been a mainstay of the livestock and grain farm

Truly a farm operation, the Baldwin's and their three children are the management and prime labor force.

Their oldest daughter Cathy is graduating this year from Millersville State College with a library science degree. John is 19 and training as a farm equipment mechanic at Miller's Sales in Stewartstown. Steve is a senior at Kennard-Dale High School.

"Farm children learn the value of work while they're youngsters," reflects Barbara, originally from the suburbs of New Jersey. "They like being part of something important — something worthwhile. Ours have especially enjoyed the outdoor physical work of farming and feel so satisfied when they finish making hay or hauling out manure."

Other stops on Tour 1 include the dairying operation of David and Barbara Stewart and the Cooper Boyd family's Susquehanna Orchards.

While the Baldwins are explaining to their guests the intricacies of silage preservation and direct marketing steers, Tour 2 participants will be winding up their look at the Joseph Ailes farm at R2 Delta.

Family roots go deep on the Ailes Century Farm, where Joseph F. and his son Ed are in business raising crops and Holstein dairy replacements.

Joe's father, Joseph H., and an uncle, Edwin Hollingsworth, ran the farm in years past; while before that, their grandfather had been raised on the homestead.

The 156 acres previously supported a dairying operation, when milk cans were loaded up and hauled away for processing in nearby Delta.

For about the first dozen of their 26 years on the Delta farm, Joe and his family kept up the dairying operation. Later the facilities were converted for beef and hogs; and for several years, pork production was the main commodity.

again in the spotlight, but only until they reach milking age. Ailes buys in young Holstein heifers, settles them at breeding age and then sells them to dairymen as milking string replacements at freshening time.

Some steers and hogs remain for market diversification.

Corn and hay are the prime crops on the rolling farmland, but this year the Ailes' are experimenting with their first plantings of soybeans. For several years, sweet corn had been raised for the nearby Whiteford Packing Company.

Son Ed is continuing the family tradition on the Delta farm and will marry and settle on the homestead in a few weeks. Daughters Lisa Dawn, 13, and Dena Kay, 10, will also be helping to greet visitors to the Ailes family operation when the first wagon rolls in on Saturday morning.

Other farms included on Tour 2 are Dave and Kate Thompson's dairy production and processing plant and the Sleepy Hollow pick-your-fruit and vegetable establishment.

Farm labor force slips slightly

HARRISBURG — Pennsylvania's farm labor force during the survey week of April 6-12 was estimated at 109,000, a decrease of three percent from the 112,000 farm workers during the same week in 1979, according to the Pennsylvania Crop Reporting Service.

The number of farm family workers declined 14 percent to 72,000, but hired workers increased by 32 percent to 37,000 workers.

Farm family workers include farm operators working on farms one hour or more, plus other family members working 15 hours or more without receiving cash wages during the week. Hired workers include all persons working one hour or more for cash wages.

The average work week for Pennsylvania farm operators was 49.0 hours, 14.0 hours more than in January 1980 and 5.7 hours more than the same survey week in 1979. Pennsylvania's hired workers averaged 39.9 hours, 3.0 hours more than the national average.

Nationally, the farm work week averaged 35.8 hours for farm operators, up 4.6 hours from January 1980 and 1.2 hours from April 1979.

The total number of farm workers in the United States decreased about one percent from 1979. Farm family workers continued to decline from 2,424,400 to 2,239,000, while hired farm workers increased from 1,056,200 to 1,196,400 from the previous year.

Nationally, farm wage rates for all methods of pay, converted to an hourly rate, averaged $3.61 during the survey week. This was 21 cents above the average of $3.40 per hour paid a year ago. These wages do not take into consideration room and board or other benefits.

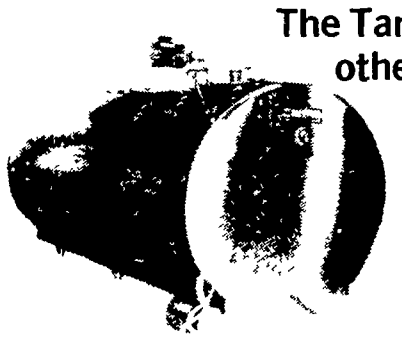
THINKING . . . OF BUYING A MILK TANK?
DON'T DELAY! - CONSIDER TEMP-MATIC by Dari-Kool

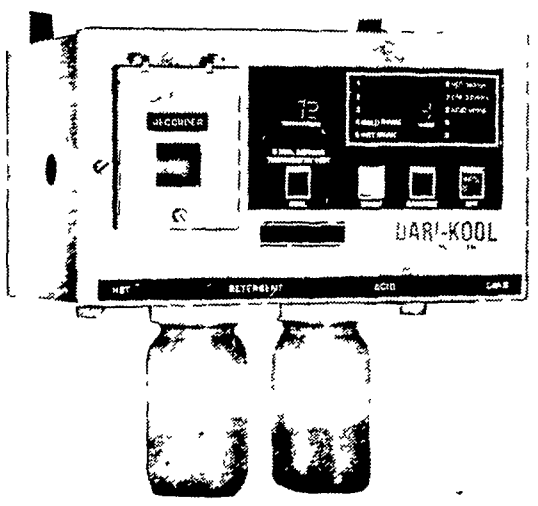
DARI-KOOL® BULK MILK COOLERS

WOULD YOU LIKE A TEMP-MATIC® SOLID STATE RECORDER/CONTROLLER IN YOUR MILK HOUSE?

The Tank with Features no other tank can offer



Pump shroud shown removed for detail



Featuring:
- Built-in recorder
- No Problems with Interval times
- Interval timer agitates milk 4 different times in one hour
- Built-in warning system - A horn or light warning signal is given when milk temperature rises two degrees or when milk temperature drops to 34 degrees
- Built-in automatic washer.
- Milk agitates 1½ minutes out of every 15 minutes
- Automatic washer is built in
- Full flood refrigeration system
- Can operate the tank manually in time of emergency

Features:
- Temp-Matic shows the temperature and records it every hour.
- Identification light signals when the temperature being monitored rises above 45°, Falls below 34°, or when the controller is switched off.
- Solid-state six-cycle washing and sanitizing assures dependable, complete cleaning of the tank interior.

More pounds per acre with Bravo®.

Start the season with Bravo 500 fungicide. Stay with it right up to harvest (in California, up to 24 hours before harvest).

That's the Bravo 500 formula. Follow it and you'll control all 8 major tomato diseases and start getting better yields and profits.

Bravo effectiveness is backed by 7 years of testing against other leading fungicides in university trials. Crops sprayed with Bravo on a full and regular schedule produced an average of over 2800 more pounds of high quality tomatoes per acre.

It just confirms what a lot of tomato growers have known for a long time. You start with Bravo 500 and stick with it all season long.

Because spray for spray. . .acre for acre, Bravo 500 flowable fungicide is the most effective way to control disease and get bigger yields.

Bravo 500. Wherever healthy tomatoes are grown, it's the name that keeps cropping up.

How to become a dairyman

Dairy specialist promotes international exchange program

NEWARK, Del — Delaware extension dairy specialist Dr. George Haenlein believes in the value of international exchange programs. Born and reared in Germany, now a U.S. citizen, Haenlein himself has benefited from first-hand experience with two distinct ways of life.

He encourages his agriculture students at the University of Delaware to spend time working and studying abroad so they can find out how people on the other side have dealt with problems similar to their own.

Six University agriculture students will spend the summer in Germany doing just that. Five will live and work with farm families in South Germany, while one will work at the Agricultural Experiment Station at the University of Munich.

These six Delaware students are among a group of about 300 from the entire United States who will be working on German farms this summer. Some German students will be coming to U.S. farms as well, in an exchange program sponsored by the Student Government Association of the German Universities on the European side, and by interested individuals such as Haenlein on the American side.

Last year, as part of the same program, Haenlein found spots for four University of Delaware students in Germany and placed four German students on Delaware farms, to the delight of everyone concerned.

For years, Haenlein has also been encouraging University of Delaware students to spend a semester of study in Vienna, Austria. Twenty from the University, including three from the College of Agricultural Sciences, spent the recent spring semester there taking a standard 15 credit course load.

Though the classes were offered in English, the students still found the experience challenging.

"It's a maturing experience," Haenlein explains. "Many of these students have never been away from home before. Not only do they learn the subject matter, they also gain confidence by learning how to get around and communicate in a foreign environment."

For these reasons, Haenlein would like to see summer school for credit in Europe established as a regular study and/or training-abroad program of the University of Delaware.

Whether or not such a formalized program is ever established, sending American students to spend a summer working on German farms is an education in itself. There are real differences in the American and European ideas of farmer training.

In the United States, as long as someone has cash or bank credit, farming and most trades are easy to enter. For instances, if you can bake a cake, and you can find someone who is willing to buy it, you are in business as a professional baker.

In Germany, as in a number of other Old World countries such as Switzerland and Sweden, it can't happen that way. Before you can call yourself a farmer, a baker, a chimney sweep, or a cow milker you must survive a rigorous program of training, practical experience and certification examinations.

It's a system that dates back to the Medieval craft guilds, and it has few parallels in the United States.

Before a student can even enroll in most colleges of agriculture in German universities, he or she must have already had a specified amount of experience working on a farm, and not just any farm, but a certified farm.

University of Delaware animal science professor Dr. George Haenlein helps U. of D. students David Perry, left, and Larry Webber make plans for the summer. The two will be living and working on farms in Germany.

In contrast, many University of Delaware agriculture students have had no prior agricultural experience. It isn't required.

In the United States, farmers generally milk their own cows, perhaps with some hired help. In Germany it's customary to hire a milker just to care for the animals. A professional milker would be like a subcontractor for the cows, being paid monthly by the farmer on the basis of performance.

Here's how one becomes a milker in Germany. (The system is similar for becoming a farmer or for entering any trade.)

First the young man or woman must be apprenticed to a master milker. The apprentice works along with the master while also attending evening school sponsored by the trade association. After a couple of years the student must pass an examination to be admitted to the next level of training.

At this point, the student is still a journeyman. Haenlein describes the promotion as similar to the military promotion from private to private first class.

After another two or three years as a journeyman, the student may be admitted to the master's examination. Only those who pass this examination may go into business for themselves as milkers.

By the time German people can call themselves milkers, or farmers, or plumbers, Haenlein says, they know their trade inside and out. In America, the land of opportunity, he says, the young plumber you hire may be learning on your kitchen sink.

Also, in America, couples from big cities are free to try their hands at farming as long as they can find the money for land, machinery and supplies. They may not have the slightest idea of what they're doing, but they have every right to try.

That's why the extension service is a must in this country, Haenlein explains.

Those farmers with a lack of experience especially need the county agents and specialists to show them what to do. In Germany a farmer already knows the basics, so the German

USDA announces options to change food grading

WASHINGTON, DC — The U.S. Department of Agriculture last Friday asked for public comment on a number of proposed options to change its food grading program. The changes would affect the grade names USDA applies to the foods it grades for quality.

Carol Tucker Foreman, assistant secretary of agriculture for food and consumer services said, "Our grading program should be one that consumers can understand and use. Research indicates that the program may not be meeting consumers' needs. We will evaluate public comment on our options and propose changes in our grading regulations later, if warranted."

To gather public comment on the options, USDA officials will hold three public hearings:

July 1 at Fisher Theater, Iowa State University, Ames, Iowa, from 9 a.m. to 5 p.m.;

July 16 at the Multi-Service Senior Center, 330 Fifth St. North St. Petersburg, Fla., from 10 a.m. to 8 p.m.; and

Aug. 7 at the Jack Tar Hotel, 1101 Van Ness Ave., San Francisco, Calif., from 10 a.m. to 8 p.m.

Spanish translators will be available at the St. Petersburg hearing.

Under the present system, USDA commodity graders determine levels of quality for foods such as meat, poultry, eggs, dairy products, fruits and vegetables, and apply a variety of official grade names such as U.S. Prime, U.S. Fancy, and U.S. Grade AA. The grading service is voluntary and paid for by food producers.

The wide variation in grade names has been criticized by consumer groups and by a number of Congressional and other reports, Foreman said. A recent nationwide consumer survey done for USDA confirmed that the present system of grade names is confusing to consumers, she said.

She said the options for change are:

Adopt a completely uniform grade name policy by using U.S. Grades A, B, and C or U.S. Grades AA, A and B for all graded foods;

Keep the present system of grade names for meat and fresh fruits and vegetables and use U.S. Grades A, B, and C or U.S. Grades AA, A, and B for all other graded foods;

Retain present grade names for adopt a separate consumer color coding system in which one color would represent each quality level for all graded foods;

Require grade labeling at the retail level if a product is graded and labeled at the wholesale or packer level. (Such lableing, even when the product has been officially graded at the wholesale level, is now voluntary).

The options under consideration will be published in the May 30 Federal Register, which is available at most local libraries.

"Since public opinion is of vital importance at every step in the process of change," Foreman said, "we are making efforts to provide adequate opportunities for all citizens to participate. For example, we've planned evening hearing sessions for those who work, and will provide Spanish translators for the St. Petersburg hearing."

To testify at the public hearings, individuals should send their name and address to Public Participation Staff, Food Safety and Quality Service, USDA, Room 1168-S, 12th and Independence S.W., Washington, D.C. 20250, at least two weeks before the date of the hearing at which they want to testify.

However, each hearing will include an "open mike" session, so that all those who want to testify may do so.

Western Pa. milk order to get assessment boost

PITTSBURGH — An order issued by the U.S. Department of Agriculture will change payment, pooling, and other provisions of the Eastern Ohio-Western Pennsylvania federal milk market order.

P.R. Smith, assistant secretary of agriculture for marketing and transportation services, said the changes have been approved by over 90 percent of the dairy farmers voting in a referendum on the matter. Their approval was necessary before the changes previously recommended by USDA could be put into effect. The USDA recommendation was based on the record of a public hearing.

A major change in the order, Smith said, will base advertising and promotion assessments on the average price handlers pay farmers for their milk instead of the fixed rate previously used. Initially, this will increase the assessment to nine cents per hundredweight (45 kilograms) of milk from five cents.

The change, which is designed to keep pace with increased costs of operating the advertising and promotion program, will not affect the price consumers pay for milk at retail outlets in the market order area.

Smith also said that another major change will modify the requirement that the market administrator collect all handler obligations and then pay the dairy farmers. This imposed on handlers buying milk directly from individual farmers and added cash flow burden that was found unnecessary.

The amended order was published in the May 30 Federal Register.

Berks youth sponsor steer show

READING — On May 24, Berks County held their first spring show. It was a big success, held at Ken-Rose farm. The show had a total of 18 steers.

The ribbons were handed out on the Danish systems. The judge was Greg Snyder from Lehigh County. After the show, Greg gave a brief demonstration on showing and fitting.

The following are the results:

16-17 Year Old Fitting

Darlene Dietrich, Blue, Lianne Haas, Blue, Ronald Heffner, Red, Carol Strause, Red.

Showing

Darlene Dietrich, Blue, Lianne Haas, Blue, Ronald Heffner, Red, Carol Strause, Red.

13 Year Old Fitting

Kirk Fisher, Blue, Kenianne Rarick, Blue, Lynn Lorah, Blue, James Heffner, Red.

Showing

Kirk Fisher, Blue, Kenianne Rarick, Blue, Lynn Lorah, Blue, James Heffner, Blue.

12 Years Old Fitting

Troy Werley, Blue, Greg Zook, Blue, Karen Rabenold, Red, Michelle Harley, Red.

Showing

Troy Werley, Blue, Greg Zook, Blue, Karen Rabenold, Blue, Michelle Harley, Blue.

10-11 Years Old Fitting

Andy Haas, Blue, Greg Strickler, Blue, Marianne Yanos, Red, Glenn Heffner, Red.

Showing

Andy Haas, Blue, Marianne Yanos, Blue, Glenn Heffner, Red, Greg Strickler, Red.

8-9 Years Old Fitting & Showing

Both classes received Blue. Kent Fisher, Blue, Lori Rabenold, Blue.

On behalf of the Berks County Beef Club a real big "thank you" went to Herby Heffner for the loading chute and Greg Snyder for judging.

(Continued from Page A1)

have to worry about a market for your milk regardless of what happens to fluid sales in the city.

"It is only right and proper that you should strongly consider joining Eastern...we strongly recommend that you join the Cooperative," he concluded.

But the dairymen are not sure they can afford a $5 stop payment 15 times a month, plus eight cents per hundred, plus dues, plus assessments like those Eastern levied last week.

McDonald confirmed Eastern has an arrangement with Farmland to accept milk produced close to the South Waverly plant from Farmland while Farmland takes Eastern milk produced closer to its dairy. Such agreements are common to avoid shipping expenses, he said.

No one from Farmland was available to comment.

Early this week rumor spread in the farm community that Eastern fieldmen were claiming to have an agreement with local co-ops not to accept milk from the affected shippers. Both NEDCO and Eastern denied any collusion in accepting or rejecting members

Fenton Murphy, treasurer of NEDCO, said it was simply a matter of everyone being full of milk.

"No way is there an agreement between us," he said.

He said some shippers had called NEDCO co-ops looking for a market, but because of the supply situation they were being turned down.

Eastern's McDonald denied rumors that the Co-op is picking on smaller dairymen, saying the notice will be served down the road.

Nevertheless, farmers in the northern part of the state are running scared. Several said they were worried about not having a market at all—a fear that runs deep for anyone with a perishable commodity.

Nothing is being said by the fieldmen visiting the affected dairymen to ease that fear.

In fact, many of the farmers report the opposite . . . that they are being told by the Eastern fieldmen that unless they sign up there will be no place else to go.

The message delivered, by implication, the farmers say is "sign up or sell out."

Making matters easier for Eastern is the fact most milk produced in the area goes to its South Waverly plant.

Dairymen say they were told that even should NEDCO agree to allow them to join that Eastern would not let its drivers pick up the milk. And Eastern would levy an additional $1.95 per hundredweight charge to process the milk.

At least one dairy official outside of Eastern has suggested it would be best for the farmers to wait until the last possible moment to take any action.

Since notice has not been served, he pointed out, the farmers still have at least a month's leeway. And, he said, a lot could happen in that time to open up alternative markets for dairymen hesitant to follow the crowd.

Producers will have to have the backbone to hold off, though, he concluded.

Among positive signs are the passage Wednesday of SB 10 which will allow big milk tankers to travel the roads. One of Farmland's major problems was geting the 80,000 pound tank trucks they felt were economical on state highways.

The Governor is expected to sign the bill into law Tuesday. At present, though, it is just one glimmer of hope.

Other producers said they thought Eastern seemed pretty sure of its getting a loan guarantee from Farmers Home Administration to run the operations at South Waverly.

Should that loan guarantee fall through, they point out, Eastern could find itself flooded with milk producers.

Speculation is that Eastern is waiting for final word on their FmHA request before having the letters sent out.

Even should the Farmland shippers join Eastern now it remains likely, some say, that they would bale out at the first opportunity.

"We don't like the way they are doing business," a dairyman's wife concluded

Congressman charges FmHA with loan interest gouging

WASHINGTON, D.C. — U.S. Congressman Tom Harkin has asked President Carter to "immediately" reduce interest rates for emergency loans to financially troubled farmers under the Economic Emergency Assistance loan program from 14 per cent to 10 per cent.

In a letter to Carter the Iowan said the loans are supposed to carry an interest rate pegged to the cost of money to the government. The current rate being charged for the loans by teh Farmers Home Administration, 14 per cent, is well above the government's cost of money. That cost has been steadily declining since early April and is now just 9.23 per cent as measured by the interest it pays for three year U.S. Treasury certificates.

Harkin is the author of legislation which extended the EEA loan program an additional two years and authorized an additional $2 billion in emergency loans under the program. He told Carter Congress never intended the government to make a profit on loans to hard-pressed farmers.

Harkin noted the Administration promptly raised interest rates for the emergency loans when government borrowing costs began to rise in March.

"To be quite frank, Mr. President, I find it very disturbing that the Department of Agriculture would be so quick to increase interest rates and to be so slow in reducing them," Harkin wrote.

Harkin made a similar request last week in a letter to U.S. Agriculture Secretary Bob Bergland. Harkin said he was not taking his request to the President because conversations he's had with officials at USDA have convinced him "there's no sense of urgency about this at all at USDA."

No-till oats, alfalfa on Schuylkill tour

HEGINS — A tour of no-till oats and alfalfa spring seedings will be held Tuesday. June 24th, 1980 (raindate - June 26th). The tour will begin at 7:00 p.m. at George Rebuck's oat fields on the Kauffman Farm Rt. 25 — one mile east of Hegins — look for signs.

The second stop on the tour will be at Ron Dietz no-till alfalfa seeding on the Schwalm farm. The tour will conclude at the Jim Shadle farm for another look at no-till oats and also to view slides of the equipment and methods used in the seedling establishments.

The demonstration plots and the tour are the result of a cooperative effort of the above named farmers, Chevron and FMC chemical companies and the Schuylkill County Extension Service.

Landisville sewing and crafts

LANDISVILLE — The Landisville Klassy Klippers Klub held its reorganizational meeting on June 4 at 6:30 p.m. at the Amos Herr Community Park in Landisville.

The following officers were elected: Nancy Mays, president; Amy Mays, vice-president; Suzanne Ayars, secretary; Sharon Landis, treasurer; Barbara Todd, news reporter. Brenda Brubaker, Rajni Singal and Marilyn Landis were elected game and song leaders.

Michelle Skiles, assistant home economist from the Lancaster County Extension Service, explained 4-H activities on the county level.

The next meeting will be held on June 12 from 9 a.m. to 12 noon at Centerville Junior High School in the home economics rooms for the sewing club and from 1 to 3 p.m. at 1212 Nissley Road, Lancaster, for the crafts club.

Project leaders are Mrs. Emily Nendza, Mrs. Gloria Grube, Mrs. Marion Harper, Mrs. Miriam Irwin, Mrs. Shirley Miller, Mrs. Arlene Miller, Mrs. Jane Witman, and Mrs. Joan Mays.

MERLE STOLTZFUS, Elverson, Pa.

"Harvestall Chillcuring® works. It's this simple: Harvestall gives me a better product for less."

"We've had our 48 foot Harvestall® bin for three seasons now and I really couldn't be much happier with it. Before the Harvestall® we used a batch dryer. Now it's for sale. We found you just can't batch dry corn as cheap as you can cure it with the Harvestall®. Last year I know it didn't cost more than 4¢ a bushel for Chillcuring®. Most of the corn went in at 26% to 27%. Some was over 30%, but we had no mold problem. As a matter of fact our test weight was up around 56 lbs. Some was as high as 58 lbs.

"The farmer really needs storage if he's going to be able to market his crop to his advantage. The Harvestall® system gives him not only storage, but eliminates the need for drying equipment and expensive fuel. Plus at harvest I can fill the bin as fast as the combine brings it in.

"It's really as simple as this: Harvestall® gives me a better product at less cost. So I'm not afraid to recommend the Harvestall because it works so well for me."

HARVESTALL

The Harvestall Chillcuring System

It's simple When grain comes out of the field it's a living seed So instead of destroying the seed with high heat, moisture is removed with natural air ventilation The grain keeps all its feed value, there is less shrinkage than with heat drying because only moisture is removed, not dry matter You ll never see white dust in Chillcured corn You actually save half of what you're used to losing in heat shrink

There's no gas or oil to buy Natural air carries away heat and moisture as the corn releases it

Harvestall Chillcuring is a back-to-basics system that just simply makes good sense Find out more about it

State FFA awards

(Continued from Page A1)

Lancaster County schools with first-place finishers included Eastern Lancaster County with three in Parliamentary Procedure, Wildlife and Poultry Judging; Solanco with a pair in Dairy Foods and Farm Management and Mount Joy Vo-Tech in Floriculture.

Twin Valley students from Berks County finished first in Pleasure Horse and Dairy Judging.

W. B. Saul High School in Philadelphia County had the top placers in Meats Judging and Agricultural Salesmanship.

Other area school chapters with single first-place finishers included Aston Vo-Tech, Delaware County, in Ornamental Landscape; Red Lion, York County, Interview; Upper Dauphin, Dauphin County, in Land Judging; and Octorara, Chester County, in Small Gasoline Engine team competition.

The competition opened on Tuesday afternoon on the Penn State Campus with the public speaking and parliamentary procedure contests.

On Wednesday, the FFA members scattered far and wide to take part in the remainder of the contests, which ranged from sitting behind a desk to review farm management procedures, to climbing into the show ring for dairy and livestock judging to stealthily trailing game tracks through virgin forests in the new wildlife contest.

Finally it all came together on Thursday with the closing session, which featured the passing on of the cloaks of office to the new state officers and the awards presentations.

From the opening strains of the National Anthem by the State FFA Band to the final award, the final session was one of liveliness and inspiration. Several selections by both the band and State FFA Chorus, some with a lively upbeat tempo the some more traditional, set the mood for the close, which sent the jacket-clad audience scattering in as many directions as there are gold-lettered locations spelled out on their backs.

Among speakers at the final session were Donald Trimmer, of Woodsboro, Md., national FFA vice president; Kevin Holtzinger, Windsor, Pa., Star Farmer of America; and Glyn Boone, retiring state FFA president.

Among top area finishers in various contests were:

Public Speaking

Doug Hershberger, Solanco, Lancaster County, second; and Deborah Miller, Conrad Weiser, Berks County, third.

Conservation Public Speaking

Barry Geib, Manheim Central, Lancaster County, third; Steve Kearns, Twin Valley, Berks County, second.

Parliamentary Procedure

Eastern Lancaster County, first; and Northern Lebanon, second.

Eastern Lancaster County team includes Kevin Devine, Glenn Yoder, Glenn Hartz, Wanda Weber, Brian Martin, Leonard Snader, Larry Martin and Darlene Horning.

Members of the Northern Lebanon team are Dean Patches, Don Miller, Marilyn Deaven, Paul Stoltz, Mark Brehm, Doug Blauch, Mike Bare and Jeff Allison.

Extemporaneous Speaking

Bruce B. Latshaw, Kutztown, Berks County, third.

Meats Judging

Iris Hall, W.B. Saul High Philadelphia County, first; Robert Livingston, Dover, York County, second; and Darryl J. Wilson, W.B. Saul, third.

Ornamental Landscape

John Ryan, Aston Vo-Tech, Delaware County, first; Kevin Rice, E. Northampton, Northampton County, second; and Karen Silvius, Willow Street Vo-Tech, Lancaster County, third.

Interview

Beth Holtzinger, Red Lion, York County, first; Robert B. Marchesani, W.B. Saul, Philadelphia County, second; and Bonnie Lamborn, Oxford, Chester County, third.

Floriculture

Cathy Best, Mount Joy Vo-Tech, Lancaster County, first; Deborah Grube, Mount Joy Vo-Tech, second; and Holly Eshby, W. Montgomery County, third.

Forestry

Dean Long, Warwick High School, Lancaster County, second.

Wildlife

Lowell D. Graybill, Eastern Lancaster County, first; and Martin Miller, Twin Valley, Berks County, third.

Dairy Foods

Bryan Dickson, Solanco, Lancaster County, first; Brian Ressler, Penn Manor, Lancaster County, second; Melvin Marks, Red Lion, York County, third.

Agricultural Mechanics

Jim Harnish, Penn Manor, Lancaster County, second; Timothy High and Marvin Horst, both Ephrata, Lancaster County, fifth and sixth.

Pleasure Horse Judging

Linda Robinson, Twin Valley, Berks County, first.

Land Judging

Lynn Buffington, Upper Dauphin, Dauphin County, first; Charles Brown, Penn Manor, Lancaster County, second; and Joe Harvatine, Annville-Cleona, Lebanon County, third.

Agricultural Salesmanship

David Anderson Hecht, W.B. Saul High School, Philadelphia County, first.

Farm Management

David Holzhauer, Solanco, Lancaster County, first; and Christina Bucher, Solanco, second.

Poultry Judging

Cliff Horning, Eastern Lancaster County, first; Stephen Smith, Ephrata, Lancaster County, second; and Paul Garner, Red Lion, York County, third.

Small Gasoline Engine

Octorara High School team, Chester County, first.

Dairy Judging

Twin Valley team, Berks County, first; Oxford team, Chester County, second; and Manheim Central, Lancaster County, third.

Members of the top Twin Valley team are Tim Kurtz, Steve Snyder and Don Stoltzfus.

Livestock Judging

Jay Frey, Penn Manor, Lancaster County, second; and Jerry Myer, Lampeter-Strasburg, fourth.

Members of the winning parliamentary procedure team from Eastern Lancaster County include, from the left front row, Glenn Yoder, Darlene Horning, Wanda Weber, Glenn Hartz, Leonard Snader; back row, Larry Martin, Brian Martin and Kevin Devine.

Top floriculture winners are, from the left, Cathy Best and Deborah Grube, both of Lancaster County, and Holly Eselby, Montgomery County.

First three finishers in wildlife competition include, from the left, Lowell Graybill, Lancaster County; Paul Work, Jefferson County; and Martin Miller, Berks County.

Trio of dairy foods contest winners are, from the left, Bryan Dickson and Brian Ressler, both of Lancaster County; and Melvin Marks, York County.

Major winners in farm management are, from the left, David Holzhauer and Christina Bucher, Lancaster County; and Kevin Moore, Washington County.

Poultry judging's top winners are, from the left, Cliff Horning and Stephen Smith, both of Lancaster County; and Paul Garner, York County.

Legislative roundup

(Continued from Page A1)

No trouble is expected from Gov. Thornburgh who has pushed both SB 10 and the budget all along.

Passage of the budget means the road is opened for congressional action on several ag bills.

Among high priority items is the Milk Security Fund legislation which is on the adjenda for this coming Friday.

Representative Reno Thomas is expected to introduce a bill which would make Johnsongrass a noxious weed.

The other Noxious Weed bill is sidetracked for the moment, awaiting resolution of who will be on the panel to declare a given weed noxious. The Game Commission and several conservation groups seek representation not provided under the current bill.

HB 1794, the right to farm legislation which would prohibit municipalities from making any law forbiding generally accepted farm practices, was reported out of the Senate Ag Committee Monday.

The major block to any of these bills passing is time. The lawmakers were to keep at their job until July 2.

But observers on the Hill have noticed signs of unrest, and are speculating the solons will close up shop early, perhaps as soon as the end of next week.—CH

Acid rain meeting scheduled for June 19

HARRISBURG — Acid rain may affect the safety of drinking water supplies, the productivity of crops and forests as well as soils, the water quality of streams and lakes, the finishes of automobiles, buildings and monuments, and the amount of fish and other aquatic life found in bodies of water.

Many people believe that acid rain is our next environmental crisis while others feel that sufficient information about the problem does not yet exist, according to the Capitol Region Planning and Development Agency.

Individuals and groups concerned about his issue are invited to participate in a meeting where available information on the subject will be presented. This meeting will be held at 7 p.m. on Thursday, June 19 at the Swatara Township Municipal Building, located at 599 Eisenhower Boulevard, near Harrisburg.

James Lynch of Penn State will give a brief background of the issue, along with suspected effects on water quality, agriculture and forests.

James Salvaggio of the Pennsylvania Department of Environmental Resources' Bureau of Air Quality will discuss alternative solutions and costs to reduce this problem.

Time will be reserved for questions and for discussion of possible solutions.

This meeting is being sponsored by the Capitol Region Planning and Development Agency in its effort to provide a forum for residents to express their views on water quality issues.

For more information about the meeting, contact CRPDA at Suite 124, 4751 Lindle Road, Harrisburg 17111, or telephone 939-7827.

John Deere Lawn Tractors make mowing and pickup easy

Take care of your mowing and bagging chores in one simple operation with a John Deere Lawn Tractor and optional 4-bushel rear bagger

John Deere Lawn Tractors are available in two models — the 8-hp 108 with 30-inch mower and the 11-hp 111 with extra-wide 38-inch mower Both models feature color-coded controls for quick identification And a 5-speed transmission with on-the-go shift conveniently mounted on the right fender deck.

These tractors are designed for your safety and comfort. A triple-safety system guards against accidental starts And a safety switch automatically shuts off the engine if you leave the seat with the PTO engaged. There's an adjustable, padded seat mounted on two springs for an easy ride. And a roomy operator's area with 2-position footrests.

Take care of mowing and bagging chores the easy way with a 108 or 111 Lawn Tractor. For snow removal and light grading, a 32-inch snow thrower and 42-inch front blade are also available.

How to reach peek output 60 days after freshening

LANCASTER — Reaching peak milk output within 60 days after freshening is one of the challenges faced by dairymen striving for top herd production.

Michael E. Hutjens, extension dairyman, suggests several calving-time and early lactation feeding strategies to help dairy cows reach maximum milk production as soon as possible after calving.

"Dairy cows are forced to make major adjustments throughout the gestation and lactation cycle," Hutjens explains. "The cow shifts from low nutrient needs for maintenance and growth during the dry period to high nutrient requirements in order to produce large quantities of milk shortly after calving."

Hutjens says losses occur when dairymen cannot control metabolic and nutritional disorders during the critical early lactation period.

A sound feeding program for the dry period and controlled transition to the milking ration can reap an extra 500 to 3000 pounds of milk per cow per lactation, he says.

During the dry priod, cows should be fed a ration especially formulated for dry cows, to allow for adequate conditioning and fetal growth without causing excess weight gains. To ease the transition to milking rations, two weeks before calving Hutjens recommends feeding dry cows a blended ration containing feeds received by high-producing cows.

"At calving time, maintain rumen digestion with long forage, since cattle consume less feed at that time and rumen function decreases," he says. "Any major ration changes at calving time should be made gradually."

Hutjens suggests adding sodium bicarbonate to the feed to stabilize rumen fermentation and increase dry matter intake while making ration changes. Bicarb is recommended at a level of one to two percent of the grain mix or a top-dressing of one to four ounces per head daily to ease ration adjustment.

Careful nutritional management is important during the early stages of lactation, since dairy cows require more nutrients than the feeding program can provide, according to Hutjens.

Most cows reach peak milk production at about eight weeks after freshening, but don't reach their highest dry matter intake until 14 to 16 weeks. Hutjens offers several tips to insure maximum milk production during this critical period:

Challenge cows to reach their maximum milk production. each one pound increase in peak daily milk production correspons to a 200-pound increase in milk output for the lactatioan.

Meet protein needs with naturla proteins that are low in rumen degradability. Top-dress protein or increase the level int he total ration to meet milk production demands and utilize fat reserves in the cow's body.

Insure maximum dry matter intake with top quality forages, palatable grains, and blended rations. Avoid rations with moisture content over 60 percent.

Maintain optimum rumen digestion by feeding 6.5 to 7 pounds of crude fiber. Feed mineral forage (1.5 percent of body weight dry matter) and limit use of finely chopped or pelleted forages.

Increase grain to a maximum of 55 percent of the total ration on a dry matter basis (50 percent with corn silage), with high quality forages.

Minimize the amount of nonprotein nitrogen fed during early lactation. Illinois research indicates that urea-supplemented rations result in lower peak milk production than protein-equivalent soybean meal rations.

Adjust the nitrogen-to-energy ratio int he ration to insure optimum protein and energy utilization and maximize milk production. The energy and protein balance should reflect the needs of the rumen and the cow.

Evaluate rations by the total amount of nutrients they contain, rather than by percentages. Incorrect intakes of dry matter may result in nutrient imbalances.

If milk fat content drops, check the cause. If the problem remains, consider adding a butterfat-enhancing feed ingredient such as sodium bicarbonate, bentonite, magnesium oxide, methionine hydroxy analog, or calcium carbonate.

"Sodium bicarbonate neutralizes rumen acids, favors the production of acetate, (a volatile fatty acid) and helps the growth of microbes in the rumen," Hutjens says.

He cites research at Kansas where the greatest response to feeding bicarb occured in the first 120 days of lactation; and at Penn State University, where researchers reported an average of 6.2 pounds more fat-corrected-milk during the first nine weeks after calving when sodium bicarbonate was fed.

For increased butterfat production, Hutjens recommends a level of one to two percent sodium bicarbonate in the grain mix, or a top-dressing of two to four ounces per cow per day. Research from Wisconsin suggests using a grain mixture with five percent sodium bicarbonate, to correct a serious drop in milk fat, he says.

The extension specialist recommends that individual dairymen compare the cost of any feed ingredient with their own production responses before making long-term ration changes

Acreage request cut for canal park site

NEWTON HAMILTON — The National Park Service and local citizens of this Mifflin County town came away from a Tuesday night meeting with a compromise which may save much of the farmland which could have been taken for a park site.

The meeting, which remained fairly low-key throughout the evening, was called to inform citizens about NPS's land acquisition plan for the Allegheny Portage Railroad National Historic Site.

A citizen's group read a statement condemning the taking of highly productive bottomland used for farming. Three farms and part of a fourth are involved in the condemnation procedure.

The group still voiced opposition to having to pay taxes and upkeep on property which they will not be able to develop or will to heirs.

They also said they were concerned about the impact of the park site on the small boro of Newton Hamilton. They questioned not only the cost to the town of providing services and protection to the visitors but also the loss of tax revenue to the community.

The National Park Service representatives outlined their plans to acquire lands and waters in a fee or less-than-fee interest within the areas they had outlined.

The latter alternative "places development and use restrictions on the owner of a piece of property to insure that private use of the land is compatible with the preservation objectives and public use of the park," NPS said.

NPS representatives explained, for the first time to many of the Newton Hamilton area residents, exactly which properties would be involved and which would not be taken.

They also said owners of condemned land will be permitted to reserve the use and occupancy of residential properties, including dwellings and up to three acres of land, for a period of 25 years or less.

Dairy

(Continued from Page A32)

equivalent of the extension service is just needed to help keep farmers up-to-date.

Agriculture students at the University of Delaware learn a great deal about plants and animals in the laboratory and classroom. but actual work experience on a farm is not a requirement for graduation.

Of course, not all students in the College plan to work on farms, but for those who do, Hanelein strongly recommends such experience, particularly experience abroad. Germans aren't quite sure where to fit the American students into their ordered trade structure.

Does an American animal science sophomore have lower or higher status than a 19-year-old German apprentice?

But farmers generally solve that problem by welcoming the student into the family as a son or daughter, and the question becomes irrelevant.

Even experienced American farmers can benefit from a few weeks in Europe, Haenlein believes. That's why he's going to lead an expedition of Delaware farmers on an educational farm tour of several European countries this summer.

Some of America's newest and most talked about methods of energy conservation have been used for years in Europe, where energy has always been relatively scarce and expensive.

He's taking the group to see on-farm distillation of alcohol fuel, methane production from animal wastes, and intensive farming of very small acreages.

At the same time, Haenlein is the first to admit that not all the progress comes from one direction. Many German dairy breeders improve their stock by artificially inseminating their cows with U.S. semen imported, for example, from the Lancaster dairy county, Pa.

"The world is so small and so mutually involved," Haenlein points out. "These exchanges can help make all of us aware of how much we can learn from one another. And by really getting to know one-another one a one-to-one basis, especially our young people, we may be able to prevent some of the terrible world problems that are caused by misunderstanding."

Some pool plant rules suspended

LANCASTER — The U.S. Department of Agriculture has suspended temporarily the limitations on the type of pool that is eligible for automatic pool status during March through August under the Middle Atlantic federal milk marketing order.

Herbert L. Forest, dairy official with the Agricultural Marketing Service of USDA, said the suspension will permit pool status for May through August 1980 for any plant that was a pool plant during the prior September through February period.

The suspension was requested by Lehigh Valley Cooperative and by Michaels Dairies, Inc., which said that present marketing conditions make it nearly impossible for them to meet the regular processing plant and pool distributing plant requirements of the order.

They contended that as a result the dairy farmers supplying their plants were threatened with loss of pooling status which could result in lower returns for their milk, Forest said.

The suspension order was published in the June 10 Federal Register.

PUBLIC AUCTION

COMBINATION STORAGE STRUCTURE AND GRAIN DRYING EQUIPMENT

WEDNESDAY EVENING, JUNE 25

7:00 P.M.

Location - 65 High Street, Mullica Hill, New Jersey.

Consisting of (2) 3 h.p. electric fans; (2) 6000 bu. grain bins; (2) upright and roof ladder kits; (2) transition rings; (1) 3200 bushel wet tank; (1) valve boot and slide w/auger; (2) under bin unloader tubes; (2) incline heads with motor drive; (1) grain dryer with auto panel; (1) vertical auger 6x36; (1) vertical auger 8x36; (1) wet auger 6x38; Steel auger brackets & motors.

All equipment like new. Installed in 1978 and in excellent working condition

Inspection-Day of sale Terms will be announced at beginning of sale.

THIS EQUIPMENT IS BEING SOLD AT ABSOLUTE AUCTION WITHOUT RESERVE.

Sold by order of

Take heat off hogs

NEWARK, Del. — Poor reproductive performance this summer can add insult to injury for pork producers already reeling under the impact of low hog prices.

Research shows that heat stressed sows and boars are less fertile and produce fewer offspring, reports University of Delaware extension livestock specialist Dr. Dick Fowler. And right now hog farmers need every production efficiency they can get, just to break even.

Hot-weather stress on boars causes a reduction in sperm concentration, motility, and quality. Sperm production completely stops in some heat-stressed boars. Others may suffer only slight reductions. To maintain peak reproductive performance, keep boars cool.

This means keeping them at 86 degrees F or less, twenty-four hours a day, seven days a week. It can take from 3 to 12 weeks for a heat-stressed boar to regain normal fertility.

To keep animals comfortable, Fowler recommends providing them with heavy shade and cross ventilation. Also, use a concrete wallow or sprinkler system. A sprinkler can be operated 2-5 minutes every 30 minutes.

This allows time for evaporation to take place. Water evaporating from the pig's skin provides the cooling. Evaporative cooling pads, fans, and air conditioners are other ways to keep boars cool.

In a pen mating system, breed only during evening hours. Stress of breeding during the warmest part of the day can reduce a boar's fertility.

Recent research suggests that day length may have an effect on estrus in sows, but until more evidence is available, emphasis should be on sow comfort. Keep sows at 86 degrees or less during and for two weeks after breeding. This will help assure conception and implatation of the embryo to the wall of the uterus.

First litter sows do not rebreed as quickly as those that have had two or more litters. To compensate for this, maintain a larger gilt pool during summer months and cull females that are over 10 days returning to estrus after weaning.

Check sows and gilts for estrus activity early in the day. Pregnancy check those not showing estrus 30 days after breeding.

Reproductive performance is heritable in pigs, says the specialist. Unfortunately, little research is presently being done regarding this trait. But selection and good management are effective ways to achieve more than the 7.4 pigs per litter and the annual 1.6 litters per sow which are current national averages.

Summer comfort, hog-style, keeps young boar cool under small trickle of water. This and other evaporative cooling systems help keep pigs comfortable and improve hot weather reproductive performance.

Swaffar honored by livestock association

KANSAS CITY, Mo. — The National Society of Livestock Records Association has announced the election of Paul Swaffar to honorary membership in the organization.

"This honor is particularly significant since Paul Swaffar is only the second recipient of honorary membership in the 69-year-old organization," said Harold Boucher, secretary of NSLRA.

Swaffar, former executive secretary of the American Hereford Association, served as president of NSLRA from 1958 to 1965. He was instrumental in enlarging the organization to include all the livestock registry organizations.

Current membership in NSLRA totals 53 breed associations including dairy, beef, swine, sheep, goats and horses. Virtually all U.S. breed registry organizations are current members.

Serving the American Hereford Association for 13 years, from 1954 to 1967, Swaffar was recognized internationally as a leader in breed association activities. In 1961, the AHA installed a computer system for processing registrations, transfers and the business affairs of the Association, becoming the first breed association to utilize computer processing.

A native of Oklahoma and graduate of Oklahoma State University where he was a member of the livestock judging teams, Swaffar was the high individual in the Chicago and Fort Worth Contests, and second high in Kansas City.

He received his Master's degree from, and served on the staff, Virginia Polytechnic Institute. He served as Virginia's Beef Cattle Extension Specialist, was secretary of the Virginia Hereford Association, and was the first manager of the Atlantic Rural Exposition.

In 1947, Swaffar became the American Hereford Association fieldman in the Southeast and in 1949 became director of the AHA's field staff. In 1952, he was elevated to the post of assistant secretary and then became the AHA's seventh executive secretary in 1954.

In making the announcement, H.H. Dickenson, current NSLRA president and American Hereford Association executive vice president, said, "It is particularly gratifying to me to see the many contributions of Paul Swaffar recognized in this manner. While his principal role was that of secretary of the AHA, his dedication to the purebred concept and principles that guide it was never more evident than in the leadership exhibited in this organization.

"Those contributions established the basis on which this organization functions today. I hope the entire livestock industry will be made award of this recognition to a man who meant so much to all species of purebred livestock."

EPA to examine impact of sewer plant on farms

LEOLA — The Environmental Protection Agency will prepare an Environmental Impact Statement in conjunction with municipal planning of wastewater treatment facilities for Leola, Lancaster County.

In the planning study, Leola will consider the technical feasibility and cost of various treatment options. EPA's analysis will cover the environmental, social and economic impact of each alternative.

In particular, EPA will determine the affects on the local Amish community and prime agricultural land and how to avoid or reduce any negative impact that may result.

Both studies are expected to be completed within a year.

The EPA then can provide the Leola Sewer Authority with 75 to 85 percent of the funds for planning, designing and constructing the wastewater treatment facility approved through the Facilities Planning/EIS Process.

EPA invites public participation in the study processes. In order to explain the Facilities Planning and EIS Process, gather citizen input, and answer questions, a meeting will be held on Tuesday, July 15th at 7:30 p.m. in the Leola War Memorial Building, 54 West Main Street, Leola, Pa.

For further information, contact Jim Webb, EIS Preparation Section, U.S. Environmental Protection Agency, 6th and Walnut Streets, Philadelphia, Pa. 19106. Telephone: 215/597-8333.

CHEESE ON BURGERS
a picnic delight

WE BELIEVE THAT GOOD MANAGEMENT PLUS A HARVESTORE® SYSTEM WILL PROVIDE...

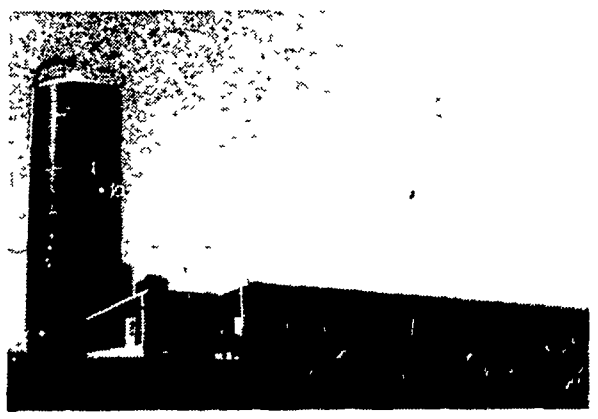
★ A Better Family Life
★ Extra Profits
★ Expansion Without Extra Acres

HERE'S WHAT PENN-JERSEY HARVESTORE® OWNERS SAY:

TITUS H. BEAM
Elverson, PA

Titus says:

"Comparing the building where I feed dry feed and the building where I feed wet feed, I find wet corn feeds pound for pound the same as dry."



"What I like most about HARVESTORE® system farming is that there are no drying costs and much less handling. Feeding High Moisture Corn to my hogs has eliminated my grinding. I know that my cost to feed a hog is less on High Moisture Corn."

JOHN A. BRUBAKER, JR.
Christiana, PA

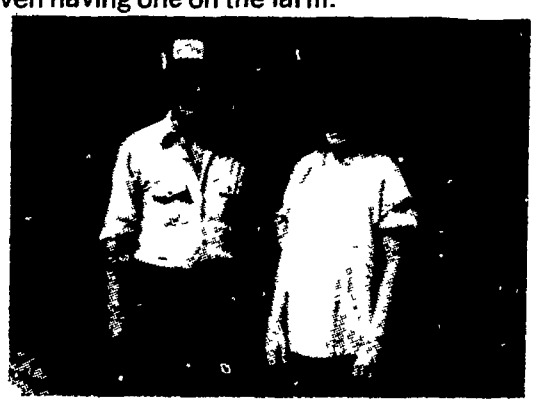
John says:

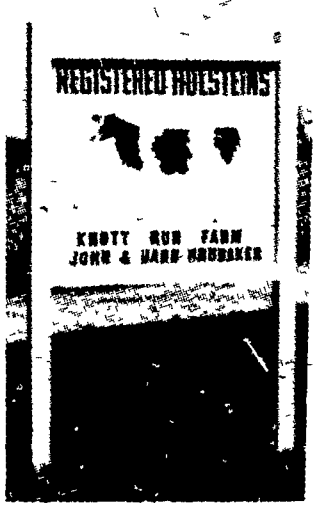
"Since starting on HARVESTORE® High Moisture Corn in November of 1979, I've saved $1,000 per month on feed bills."

"The cows tend to peak earlier in lactation and hold the peak production longer on High Moisture Shelled Corn. There's no separation of feeds like there was when I blew feed into the feed bin."

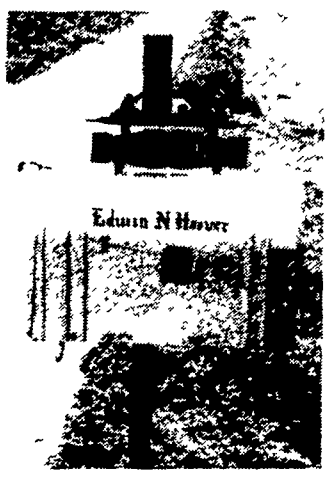
"In spite of lower quality forage, the production and butterfat levels stayed the same as last year, yet the feed bill dropped $1,000 per month."

"It appears I was paying for a HARVESTORE® High Moisture Corn unit without even having one on the farm."



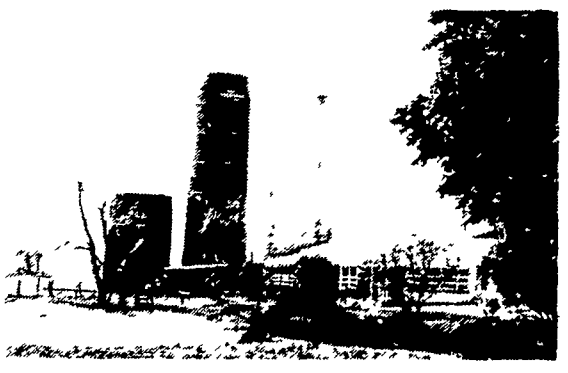


EDWIN N. HOOVER
Ephrata, PA



Edwin says:

"Since going to the HARVESTORE® System, we feed 70 cows for the same amount of feed dollars as we used to spend on 35 cows. Milk production has risen 8.75 lbs. per cow per day and butterfat is up 5 points. The increase is 3000 lbs. per cow per year in milk and 175 lbs. in butterfat."



"We fed High Moisture Ground Ear Corn from a conventional silo for years. It seems to smell good, but the butterfat never tested good. We switched to HARVESTORE® High Moisture Shelled Corn in the fall of 1979 and it appears that the HARVESTORE® Structure will pay for itself in one year in feed savings and increased milk production."

WITH RESULTS LIKE THESE . . .

Third in a series of interviews with Glenn Shirk

Lancaster dairy agent talks to young dairymen

BY PAT KAUFFMAN

LANCASTER — In this third in a series of interviews with Glenn Shirk, Lancaster dairy agent, the young farmer and the problems particular to him are discussed.

Glenn, what are the common problems many young dairymen face?

Pat, there are basically two categories of young dairymen. The first category is the young man whose family owns a farm and is brought into the family business. In this instance, his problems are setting up some sort of partnership agreement equitable to all parties, and assuring himself that the operation is large enough to support two families. Additionally, it's necessary to be sure the partners' goals complement one another.

The second category of young dairyman is the young man who has no family farm to remain on and must start basically from scratch.

Generally, each individual case in the first category is somewhat different. Because of the complexity of family and partnership arrangements, I think we're basically talking about the second category, the young dairyman who starts out on his own.

The most common errors these younger dairymen make are in a failure to set goals, a failure to budget out time and money, a failure to anticipate, and a failure to stick with proven practices.

"Young dairymen should plan flexibility into their goals..."

...if inflation continues, can he tolerate a 20 percent increase in production costs...

When it comes to goals, it's wise for the young dairyman to decide what it is he's striving for. Every successful person must have a dream. Perhaps his interest is the challenge of breeding cattle. This challenge can be both satisfying and financially rewarding.

However, frequently young dairymen fail to set realistic goals. For instance, to shoot for the top herd or the top cow in the county may not be realistic when you consider there are over 2000 dairymen in Lancaster County.

Young dairymen must constantly ask themselves why they want something. It is an ego trip? To strive for a herd with outstanding production is sensible. To strive for the top herd may put too much strain on family life.

Too, these young dairymen frequently fail to recognize the long-term financial pitfalls in what they do. It's common for these dairymen to overcommit themselves financially. As a result, they overwork to attempt to meet these financial obligations. The end result is mismanagement and a drop in production rather than a gain. Due to time pressures, certain necessary jobs go undone or are delayed.

Young dairymen are frequently impatient. They're tempted to jump into huge financial obligations in land, buildings, expansion and improvements to facilities, buildings, expansion and improvements to facilities, and machinery and equipment expenses without an

The financial and other burdens of a large operation are difficult enough for someone with experience to handle.

Young dairymen frequently fail to anticipate the effect their actions may have on personal and family life. They make themselves through their financial

Young dairymen

(Continued from Page B2)

overcommitments a slave to the business. This denies them the freedom to properly manage the dairy.

And lastly, young dairymen lack the experience of more seasoned dairymen. They need to use a strong base of proven practices as a foundation for the methods they use.

While a young dairyman lacks the foundation experience provides, he can observe before he plots his course and be sure to use adequately proven practices.

Can you give us, Glenn, an example of a young dairyman who has avoided some of these pitfalls?

Yes, Pat, I can think of one young man in particular. To start with, he invested in good cows. He spent his full time and attention managing the herd to the point where he had a high-producing herd in a few years.

Now he has his cows almost completely paid for He has a sound income base and has built up a lot of collateral. Now he's ready to invest in a farm or equipment. By setting goals, using experience and knowledge, he has built to a size and quality to give him sufficient equity to meet his other goals.

...with only a 10 percent increase in the price of milk."

Glenn, What recommendations do you have for young dairymen?

I think the avenue generally most successufl, Pat, is for them to build their income base first, before they take on a lot of overhead. Rather than getting strapped down so that he doesn't have time to get more than break even production from his herd, a dairyman should stay small enough to manage what he does have well enough to get top production from it.

Dairy farmers who double and triple in size for progress put a strain on the family that completely alters their way of living to the point of idsrupting or even breaking up families.

Young dairymen should plan flexibility into their goals. They must alwasy provide for the unseen. For instance, they should ask

12 Chester 4-Hers to attend conference

CHESTER — Twelve Chester County 4-H members will learn specialized skills when they take part in Pennsylvania 4-H Leadership Congress, June 23 to 26, on the Penn State main campus.

The county delegation will join about 1,000 other 4-H members from all counties in the Commonwealth to share and contribute ideas which will improve local community programs.

At Leadership Congress, they will take part in assemblies, discussion and interest groups, and recreational activities.

Members participating in the event are: Sue Martin, Downingtown; Beth Jenkins, Toughkenamon; George Renkest, Douglasville; Sarah Nothstine, Downingtown; Mike Weinstock, Phoenixville; Betsy Wollaston, Toughkenamon; Lynda Thompson, Kennet Square; Macie Myers, West Grove; Sue Rehrman, Spring City; Josh Weinstock, Phoenixville; Dean Nafzinger, Phoenixville; and Keith Stoltzfus, Morgantown

This year's conference will include six different programs of leadership orientation and development, Leadership School for 15-17 year olds; a Leadership Council for 18-19 year olds; a State Leader's Forum for adult leaders; delegate workshop for 13-15 year old; street camping training; and 4-H reporters training.

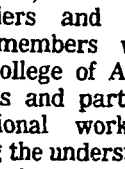
Selected teen leaders will attend a special school designed to increase skills to work effectively in planning and conducting county youth programs. Topics will include communications skills, understanding social concerns and group processes, and recreation.

Leaders and Extension staff members will meet with College of Agriculture officials and participate in educational workshop involving the understanding of leadership principles, working with groups, communications & information related to County 4-H projects.

County 4-H reporters will take part in communications training to promote the 4-H program at county, regional and state levels.

Also scheduled during Congress will be a street camping leadership program. Youths between the ages of 14 and 17 will be involved in this educational experience which will assist them in organizing similar programs in local communities.

Highlights of the four-day conference will include Craig Wallis, a magic act; and "We the people", a group of five young people presenting a unique combination of voice, guitar, banjo, bass, autoharp, and percussion.



Young dairymen

(Continued from Page B3)

themselves — if crop production or quality is poor can they sustain a 10 percent reduction in production and still meet payments.

If inflation continues, can he tolerate a 20 percent increase in production costs with only a 10 percent increase in the price of milk Young dairymen need to be wary of being over-optimistic. They need to be alert to the financial consequences of what they do

Where capital is limited, a young dairyman with an average herd could concentrate on raising his milk production and improving his genetic base. With the improvement it might be more profitable to raise more heifers depending on the comparative price of breeding stock of the same calibre. If he starts with a few good foundation cows, raising the best heifers as herd replacements, he can sell some of his heifers to increase the cash flow enabling him to afford the extra expense of raising a few more heifers.

On a farm with land for 100 cows but buildings for 50, and limited capital he can raise a lot of heifers and sell breeding stock or raise crops for sale with the extra acreage rather than expanding his buildings and taking on a lot of overhead right away. Then he can expand by putting income potential of crops through the cows and thereby build an initial base before the transition to 100 milkers

I keep stressing, Pat, that it's important for the family to set goals for the family and for the dairy and that the two must be compatible He must remember a 20,000 pound herd is not necessarily better than a 19,980 pound herd

In next week's interview, we will give guidelines to determine if your dairy operation is in trouble and possible remedies for financial problems if they exist.

Order 4 milk price $14.44 for July

ALEXANDRIA, VA — Middle Atlantic Order Market Administrator Joseph D. Shine Thursday announced a Class I milk price of $14.44 per hundredweight for July 1980. This price is two cents below the June price but up 99 cents from last July.

Order No. 4 prices are announced for milk testing 3.5 percent butterfat, f.o.b. plants located within 55 miles of Philadelphia, and also within 75 miles from the nearer of Washington, DC or Baltimore, MD.

There is a six-cent direct-delivery differential applicable to producer milk received at plants located within 55 miles of Philadelphia.

Shine announced a Class II milk price of $11.56 per hundredweight for May 1980 and a butterfat differential of 15.7 cents for the month. The Class II milk price dropped five cents from the previous month while the butterfat differential increased three tenths of a cent.

These class prices are based on the May 1980 Minnesota-Wisconsin manufacturing milk price of $11.66 per hundredweight adjusted to a 3.5 percent butterfat content.

The USDA reported that the wholesale price of Grade A butter at Chicago for May was $1.3688 per pound and the nonfat dry milk price was $.8916 per pounds, f.o.b. plants in the Chicago area.

Adams farmers hear anaplasmosis is $100 million disease

BY SHEILA MILLER

GETTYSBURG — Anaplasmosis is a disease that costs the cattle industry $100 million each year, said William Herberley, of Fort Dodge Laboratories.

Herberley was one of the guest speakers at last Thursday evening's meeting, sponsored by the Adams County Extension. Close to 75 concerned farmers listened intently to an update on the disease.

Anaplasmosis is an infectious blood anemia disease, explained Herberley.

"Anaplasma marginale, a blood parasite, takes the animal's red blood cells and causes their destruction," he said.

The sales manager for the Midwest company that manufactures a vaccine for the control of anaplasmosis told the group that the disease is spread from infected animals to healthy animals by anything that carries blood. This could be a biting insect, like horseflies, ticks, and mosquitoes, or man, when unsterile techniques are used when giving injections or castrating animals.

Herberley stressed that animals that recover from the disease remain carriers, and their blood is infective to susceptible animals.

This disease affects most ruminants, including cattle, sheep, goats, and deer. But, most of the work has been done on cattle due to their higher cost per head, and the fact that goats and sheep seem to be more resistant to the disease, he explained.

In their studies of the disease and the parasite that causes it, Fort Dodge has found that the parasite doubles in population in 24 hours, said Herberley.

"Considering there are 7 million red blood cells in a cubic millimeter of blood, it takes 21 days for the parasite to infect 1 percent of the cells. By the 28th day, 68 percent of the cells are infected and by the 31st day, 80 percent are infected."

Sometime after the 21st day, Herberley said, there will be noticeable clinical signs of the disease.

"In dairy animals, you'll notice a falling off of milk production and feed intake. The skin will also appear pale.

"In a beef herd, where you don't see the cattle twice a day as a rule, your first clue to a disease problem may be a dead animal."

Fort Dodge recommends that a farmer who suspects a disease problem should check the color of the cow's vulva and udder—if they're pale instead of pink, there may be a problem.

Also, the color of the urine is an indicator. "An animal with anaplasmosis has normal colored urine, where a sick animal with leptospirosis has urine the color of port wine."

The vaccine manufacturer stressed that any infected animals should not be excited or loaded in trailers—instead the healthy animals should be moved out. He added the farmer's main concern should be the health of the rest of the herd.

"If the infected animal is calm, it can be treated with tetracycline. But remember, this drug is only effective if the disease is still progressing.

"If the cow is constipated, give her a laxative. If she is dehydrated, give her water either through a stomach tube or intravenously. In severe cases, a blood transfusion can be given—slowly."

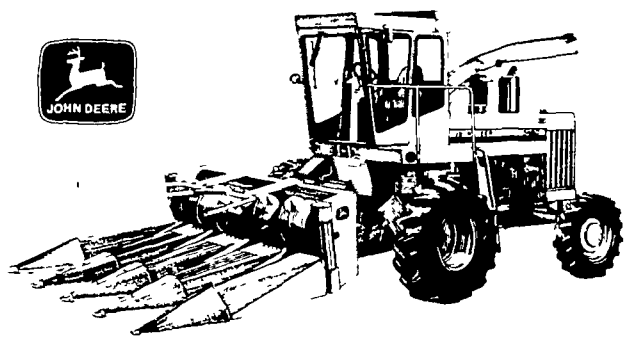
AFFORDABLE

A new drive system for even faster unloading

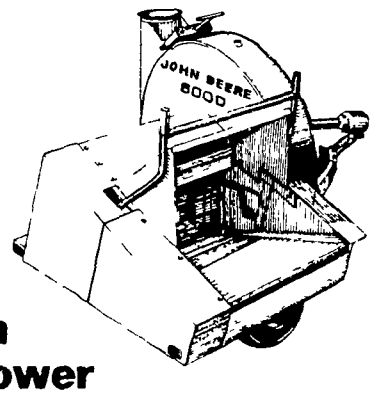
The new John Deere 714A and 716A Forage Wagons can now unload faster than ever Top speed has been increased to 11 5 feet per minute to keep your silage-making operation running smoothly Capacities of 593 and 677 cubic feet mean fewer trips to the silo See the 714A and 716A today



Here's why a move from pull-type to self-propelled forage harvesting can pay for itself

A self-propelled forage harvester is an investment, not a luxury You're purchasing the ability to harvest more of your silage at its nutritional peak. You're gaining the ability to open your own fields, and the extra maneuverability self-propelled harvesting offers You have in your hands the ability to keep your entire silage operation (from field to silo) running at full capacity Now you can use your high-horsepower tractors for other jobs You may be able to reduce manpower needed Adverse field conditions are no longer a major problem.

Come in and sit down with us Let's talk about your silage operation and why your next move should be to self-propelled harvesting.



No silo too tall... for this 1000-rpm forage blower

There are no bottlenecks at the silo with this heavy-duty blower, designed for 90-hp and larger tractors Just one continuous silage pipeline from field to storage as the 6000 Blower throws it home with a blazing fan-tip speed of 143 mph

Adams farmers

(Continued from Page B5)

A veterinarian attending the meeting pointed out that when giving a laxative, a farmer should not use a saline laxative because it will draw more water out of the animal. Instead, he recommended an oil laxative be used.

Herberley emphasized anaplasmosis' cost to the cattle industry is too high to be ignored.

"A dairy cow infected with the disease loses 30 percent of her milk production and 25 percent of her milkfat production in one lactation. If she recovers from the disease and stays in the herd, she will be culled one year earlier than her stablemates and will produce 7 percent less milk in her career than those cattle that never contracted the disease."

It was also pointed out that any dairy cow treated for long periods of time with the drug tetracycline will soon be considered a beef animal by the dairy farmer because her milk cannot be marketed.

Not only does the disease affect the milk production of the cow, it can also affect reproduction.

According to Fort Dodge, the microorganism that causes the disease can cross the placenta of the pregnant cow and infect her unborn calf. It can cause abortions, and can also reduce a bull's interest in breeding cows, resulting in his temporary infertility.

In 1965, a vaccine to combat the disease was developed by Oklahoma State University through research funds provided by the National Cattlemen's Association. The university also developed a reliable test to identify carrier cows.

Fort Dodge Laboratories recommends administering this vaccine when cows are open to avoid calf deaths from NI, neonatal isoerythrolysis.

Herberley explained NI is similar to the Rh factor in humans. "A mother produces antibodies against her calf's blood, transmitted through the colostrum in the milk. These antibodies result in the calf's death."

The vaccine program will require about four doses per cow in her lifetime, said Herberley. This would involve the initial treatments, followed by a booster shot the following year, and a booster every other year thereafter.

He pointed out he did not recommend vaccinating calves because he said he feels it is a waste of money.

According to William High, a field veterinarian for the Pennsylvania Department of Agriculture, young animals, up to a year old, generally don't have a problem getting over anaplasmosis.

Cattle between the ages of one and two, he added, seem to tolerate the disease better than older animals, where anaplasmosis results in high mortality rates.

The PDA vet told the group that the state first identified anaplasmosis in an Adams Co. dairy herd owned by James Angelaras.

"The attending veterinarian sent two carcasses to our lab for post mortem exams. We found the post mortems to be suspicious so we ran blood tests which showed a positive identification of anaplasma marginale."

After these positive cases were discovered, PDA checked herds within a 3 mile radius of the infected Angelaras herd. High explained that PDA contacted the owners and sampled the herds at the owner's request.

"We sampled 12 herds and tested 568 animals. Out of those tested, there were 54 positives and 13 suspicious.

"We also tested every fifth sample sent in for brucellosis tests by Adams County farmers—unknown to the farmers or their veterinarians. This involved 37 owners and 357 animals. The results came back 0 suspicious and 0 positive.

"We ran anaplasmosis tests on all of the Adams County owners who applied for health charts. Of these 11 owners, we ran tests on 43 animals, all with negative results."

The PDA vet said they have identified anaplasmosis only in one other herd outside of Adams County. This herd is in Westmoreland County.

"Our testing shows that the disease is not rampant in Adams County, but it is the state's hot spot," High said.

He explained the PDA policy does not require quarantining infected herds, and PDA does not pay indemnity for lost animals.

High said infected animals can be sold within Pennsylvania, but only if the buyer has prior knowledge of the cow's anaplasmosis problem. He noted that the state's health certificate does not mention anaplasmosis, just tuberculosis and brucellosis, so it is up to the seller to inform the buyer.

Interstate sales of infected animals require the prior approval of the state's veterinarian where the animals will be shipped. "Canada and Wisconsin require a negative anaplasmosis report, and many other states have similar policies," High added

For any Adams County farmer who wants to have a herd tested for anaplasmosis, High told the group PDA will do the testing free of charge. The normal charge is $1 per head.

He also pointed out that the PDA lab only runs anaplasmosis tests on Thursdays. Samples should be taken so that they arrive right before the testing day. The test results are mailed out Friday, he said, but farmers 'in a rush' can call in for their results.

If a farmer is retesting an animal that had been postive and was treated with tetracycline, High recommended waiting 120 days before sending in a new sample.

If the retest results come back negative, the animal is considered negative for anaplasmosis, said High, and can be sold without any special provisions. But, he pointed out, this animal is once again susceptible to the disease.

Concerning vaccinations, High said, "The state is not too keen on using the vaccine. Once a cow is vaccinated, she tests positive for anaplasmosis—if you want to ship her to a state that requires a negative anaplasmosis report, you might have trouble. We also don't know how long the vaccine gives an immunity for the disease."

The concerned farmers did hear some encouraging information on a new and improved treatment for anaplasmosis.

Herberley told the group there is research now underway to develop a drug called tetracycline L 200 which is four-times stronger than the tetracycline available on the market today.

"With the new drug, you'll be able to give ¼ the normal dose, and it will last two-times longer. You'll use less tetracycline, which will mean less pain for the animal because you won't have to treat it as often. Unfortunately, the drug is still under study and is not

Big bin capacities... faster harvests.

Big bin capacities and fast unloading speeds of *Gleaner* combines can mean fewer shorter stops for unloading. The L2's capacity is 200 bushels—largest in its class. The M2's bin is 180 bushels. Yet either of these giants can unload in barely more than 1' minutes thanks to the fastest tube in the west. Look into *Gleaner* combine productivity. See why their sure-feed system with down-front cylinder gives controlled feeding and threshing and puts more clean grain in those huge bins. Stop in!

Ag Secretary testifies for mushroom growers

WASHINGTON, D.C. — Pennsylvania Agriculture Secretary Penrose Hallowell testified Monday before the United States International Trade Commission in Washington, D.C. on behalf of the Pennsylvania canned mushroom industry.

Hallowell's testimony was in support of a petition by the American Mushroom Institute calling on the USITC for a tariff adjustment for imported canned mushrooms.

Hallowell noted that Pennsylvania Governor Dick Thornburgh has directed him to express "our concerns over serious declines in production in the industry." He told the Commission, "I strongly recommend that this Commission recognize the importance of the survival of the mushroom industry, to the Commonwealth of Pennsylvania, and to the nation as a whole, by recommending to the President effective and timely relief.

"Serious injury has been done to the domestic canned mushroom industry. Over one-third of all domestic plants have closed in the last ten years," Hallowell said. "Serious injury has been done to the 50 percent of the work force who have lost their jobs. These factors are clear evidence that the mushroom industry is being injured and deserves relief."

Pennsylvania dominates national production with approximately 70 percent of the nation's total canned mushrooms.

However, since 1967, imports have doubled their share of the national canned mushroom market, from 25 percent to more than 50 percent. Imports of mushrooms relative to domestic production have jumped from 65 percent to 139 percent in just four years (1975-1979).

Employment in the domestic canned mushroom industry has dropped from 1,780 in 1970 to approximately 900 in 1979, one-half of the total mushroom processing work force.

Likewise, the number of domestic mushroom canners has declined from 35 companies to 22 in the past ten years. An inability to operate at a reasonable level of profit has forced many of these companies out of business.

Three canners in Pennsylvania were forced to shut down in 1979, two of which were located in Chester County.

Hallowell told the USITC that the effect of the loss of production capability cannot be measured on the countless other businesses, from farm supply companies to banks and restaurants, that deal directly or indirectly with the mushroom industry.

He told the Commissioners that the resultant loss of jobs will continue to have an adverse effect on surrounding communities unless some relief can be granted to offset the troubles in the mushroom canning industry.

Berwick co-op to hold meeting

BERWICK — The Berwick Vegetable Cooperative will host its membership and area farm leaders on the occasion of its Twenty-Seventh Annual Dinner Meeting, June 14, 1980, at the Columbia-Montour Vo-Tech School, R5, Bloomsburg.

The Cooperative's guest speaker of the evening will be Ruth Hand, home economist, Schuylkill County Extension Service.

Hand earned a B.S. Degree in Home Economics from Mansfield State College. She taught a course in Home Economics in the High Schools of Schuylkill County prior to her present responsibility with the Extension Service. She is a recipient of the Distinguished Service Award in 1960 from the Pennsylvania Department of Public Instruction and the Distinguished Service Award in 1978 from the National Association of Extension Home Economists.

The evening's activities will begin with Registration at 6 p.m., Dinner at 6:30 p.m., and Hand's address entitled "The Upbeat Attitude" at 8 p.m.

Berwick Vegetable Cooperative was founded twenty-seven years ago to provide a produce marketing service and a farm supply purchasing service to the vegetable and potato growers of several counties surrounding Berwick.

BVC now services producers in 22 counties of Northeastern Pennsylvania and three counties of Western Pennsylvania.

This annual event attracts many State Legislatures, Cooperatives Extension Service dignitaries, and agri-business leaders of Northeastern Pennsylvania.

Adams farmers

(Continued from Page B6)

yet released for use by the practitioner."

So what can the farmers of the Adams County area do to solve their anaplasmosis problems?

As one veterinarian commented, "It's facetious to think we can control the disease by controlling the vectors."

With the deer herd population on the National Park Battlefield holdings, even if all the domestic herds were free of anaplasma marginale, the flies and ticks could still carry the disease from infected deer populations to healthy cattle, goats, and sheep.

The spread of the disease through human error can be stopped if farmers practice sanitary techniques when using hypodermic needles and other instruments on their livestock. Needles should not be used on more than one animal if there is a possibility of a reactor in the herd, and other equipment should be carefully disinfected after each use.

If an animal has been positively diagnosed as having anaplasmosis, it can be treated, under a veterinarian's supervision, with tetracycline.

Vaccinating the herd is another possibility that will require the farmer's investment of time, money, and production loss.

In summing up the current feelings on anaplasmosis, one veterinarian said, "It seems the feeling in Harrisburg is that this is not too serious a problem—it only involves primarily Adams County. But once cattlemen and associations lose enough animals and raise enough hell, they'll get more research and money spent."

Sights, scents and tastes abound at Lerew Orchards

DILLSBURG — Visitors and customers at Lerew's Farm Market and Orchards are treated with at least three distinct sensory impressions.

The rolling countryside provides a panoramic view that sweeps through a three-county area.

Just as an appreciation of this overall view is felt, the immediate surroundings begin to come into focus. Blossoming fruit trees stretch across 260 acres of Lerew Orchards, adding a collage of scents to sights that mix apple, peach, pear, nectarine, tart and sweet cherry trees.

The third and most lasting sensory impression comes from the variety of delicious products available at the Lerew family operation, which is now in its fourth generation. While third-generation representative, Lloyd Lerew directs field activities, daughter Darlene manages the roadside market which offers fresh and dried fruit, nuts, vegetables, bedding plants, fresh bakery goods and other specialty items.

One of these items, a natural for the farm, is fresh apple cider. The Lerews press 3,500 gallons of cider daily, using a majority of apples from their own orchards, with some supplied by the Farmer-Consumer Services Association, Inc. (FCSA).

The cider is sold at the farm market, and wholesaled to local growers. The majority of the cider is sold to a buyer who in turn pasteurizes and bottles the juice. No preservatives are ever added to the cider; it's 100 percent pure.

Extreme care is taken to insure a uniform product of consistently high quality juice. The Lerews start with a good quality apple.

Darlene stresses, "Only top quality juice apples are used. Many are smaller apples that didn't make the size grade."

New shipment of apples arrives at Lerew's Farm Market to be pressed for cider. Some apples are supplied by Farmer-Consumer Services Association, Inc.

Once they acquire the quality apples needed, random samples are taken from the bins and chopped in a food processor. The mix is then tested for sugar and acid content. The mix of apples is adjusted until the proper percentage of brix (sweetened) and acid is reached. Then the cider making begins.

Apples are chopped into pomice and pumped into two large presses, each holding four bins totaling 3,800 pounds of apples. After the pomice is pressed, the juice is pumped through a stainless steel pipeline into two 3,000-gallon holding tanks. Tank trucks pick up the juice two or three times each week and deliver it to the processor. The leftover pomice is used locally as cattle feed.

The amount of juice demands more apples than can be found on the farm's 80 acres of apple orchards. The Lerews turn to other sources to buy the quality apples needed.

One source used for the first time this year was the Farmer-Consumer Services Association, Inc. Just a year old in May, this was the first season FCSA has sold apples. Between January and May this year, the association has sold more than one-quarter of a million pounds of juice apples to various buyers.

One special quality about the FCSA is that they sell only Pennsylvania grown produce. The apples supplied to Lerews came strictly from Pennsylvania orchards.

"The apples supplied through the association have been of good quality," Darlene said. "We're also pleased to be buying Pennsylvania grown apples."

FCSA is an experimental farmers association created by the Department to promote direct farm marketing. The association provides an additional market for farmers' produce, provides fresh quality produce to the consumer market and provides an opportunity to increase returns on the grower's product. The association is governed by a board of seven commercial growers from southeastern Pennsylvania.

Freshly pressed cider, 100 percent pure with no preservatives, is available from help-yourself tap at Lerew's Farm Market.

LMA calls for hearing on Packers & Stockyards review

KANSAS CITY, Mo. — Public hearings are the only way to achieve the true objective of the current review of regulations and policy statements under the Packers and Stockyards Act, according to Livestock Marketing Association.

The trade group's comments came in a statement filed May 26 with the U.S. Department of Agriculture during the latest phase of a general P&SA regulatory review.

During the first phase, announced in December, 1979, USDA proposed revoking a regulation on public accommodations at livestock auctions and policy statements on lamb buying practices and the voluntary filing of surety bonds.

At that time, LMA called for public hearings on all P&S regulations. In response to these and other public comments, USDA in March announced approximately 40 more regulations, required reports and policy statements on which it wanted public comments.

The agency also said it was changing the categories under which the regulations and policy statements were listed for review, a move LMA said, "would appear to deal merely with procedure rather than substance."

In repeating its call for public hearings, LMA's May 26 statement said "The challenge for public hearings on the true intent and purpose of the (review)...prompted as it has been by the Office of Management and Budget, is again issued in order to achieve the true objectives and purposes of these proceedings."

The Trade Group also repeated its request for hearings on three specific areas of regulation and administrative decisions, those which:

...Prohibit members of the marketing sector from involvement in meat packing or processing businesses.

...Prohibit custom feedlots from being part of packing or processing businesses.

...Create "doubt and confusion" over legitimate business conduct in livestock production, feeding and marketing, which USDA generally calls illegal conflicts of interest.

Canadian cow import rules eased

WASHINGTON, D.C. — U.S. Department of Agriculture officials have eased import requirements for cattle from brucellosis-free provinces of Canada. Brucellosis is a contagious bacterial disease of cattle.

Pierre A. Chaloux, deputy administrator for veterinary Services of USDA's Animal and Plant Health Inspection Service, said cattle from brucellosis-free provinces in Canada could be imported under the same rules as those from certified brucellosis-free herds. These rules require a health certificate signed by a Canadian government veterinarian, a negative brucellosis test within the preceding 30 days, and maintenance of the herd of origin as a unit for at least a year before the shipment.

Five Canadian provinces now are certified free of brucellosis: Nova Scotia, New Brunswick, Prince Edward Island, newfoundland (including Labrador), and British Columbia. The disease has not been reported in these provinces within the past two years, no herds are under quarantine, and no vaccination for brucellosis has been performed there within the past five years.

Cattle shipped under these rules must travel through brucellosis-free provinces to approved U.S. border stations. Otherwise, they must be shipped in vehicles under Canadian government seals.

Chaloux said brucellosis-free provinces maintain their status by testing the milk from dairy herds three times a year, and by requiring non-dairy herds to have at least five percent of each herd tested yearly while in market channels, or to have a complete herd test at the end of each three-year period.

Range cattle of the beef breeds from Canada's western provinces may be imported under rules similar to those for brucellosis-free herds. However, shipments from herds in other provinces — unless certified free — must meet other testing and certification criteria based on age, sex, vaccination, type of breed, and herd health status, Chaloux said.

Livingston shows grand champ steer at York 4-H Preview

YORK — The York County 4-H Beef Club held their first Preview Show on May 31 at the York Fairgrounds.

The grand champion steer, owned by Emily Livingston, was a Limousin-Angus crossbred weighing 790 pounds.

An Angus heifer, B V Pinkie Pride 49, owned by Christine Shive was named Supreme Champion Heifer.

The heifer classes were as follows:

HEREFORD HEIFERS

Class 1

1. John Haunser, reserve champion, MC Victress 43J L82.

Class 2

1. John Hausner, champion, SCH Miss Trustee L3; 2. Robert Livingston, TL Victoris 902.

ANGUS HEIFERS

Class 1

1. Ralph Dixon, Jr., DVA Cam Am Blackbird; 2. Bill Wise, Elme G 3579; 3. Shawn Bupp, Springwood Gay Bird 43.

Class 2

1. Christine Shive, champion, B V Pinkie Pride 49; 2. Julie Myers, Laird's Queen Marshall 169; 3. Joann Rishel, Shive's Queen Dolly F325; 4. Jimmy Eisenhour, DM Dynamos Rose.

Class 3

1. Tammy Eisenhour, reserve champion, with Rally Enchantress Erica69; 2. Tim Knisley, South Branch Erica 918; 3. Brenda Walter, Edlyns Pride Lassie 9136.

Class 4

1. Tim Kinsley, SP Georgina 905; 2. Chris Kinsley, SP Blackbird 915; 3. Chris Kinsley, registration pending; 4. Deb Bauer, DS Beth 199.

CHAROLAIS HEIFERS

Class 3

1. Alice Davis, champion, Honey Star; 2. Christine Davis, reserve champion, Honey Bar.

CHIANINA HEIFERS

Class 1

1. Annette Walter, champion, WLC Miss Lombard 14.

COMMERICAL HEIFERS

Class 2

1. Emily Livingston, champion.

BRED and OWNED HEIFERS

1. Christine Shive, champion, B V Pinkie Pride 49; 2. Chris Kinsley, reserve champion, South Branch Sarita 912; 3. Ralph Dixon, DVA Can Am Blackbird.

STEER CLASSES

LIGHT WEIGHT

Class 1

1. John Myers; 2. Elizabeth Dixon; 3. Joe Druck; 4. Gretta Gross.

Class 2

1. Emily Livingston, champion; 2. Bob Livingston, reserve champion; 3. Cathy Shive; 4. Lisa Hoover.

Class 3

1. Kristi Kohr; 2. Ray Swartz; 3. Mark Kindon.

MEDIUM WEIGHT

Class 1

1. Chris Kinsley, champion and reserve champion; 2. Tammy Eisenhour; 3. Ralph Dixon.

Class 2

1. Annette Walter, reserve champion; 2. Leroy Bowles; 3. Stan Musser; 4. Dale Myers, Jr.; 5. Aaron Laird.

Class 3

1. Brenda Walter; 2. Susan Eisenhour; 3. Jamie Kohr; 4. Julie Myers.

HEAVY WEIGHT

Class 1

1. John Hausner; 2. Jennifer Druck; 3. Dave Detter; 4. Michelle Lehigh.

Class 2

1. John Eaton, Jr., champion; 2. Jimmy Eisenhour; 3. Ken Sunday; 4. Stephanie Lehigh.

Class 3

1. Brenda Werner, reserve champion, 2. Chris Sunday.

SHOWNMANSHIP

Ages 8-11

1. Kerri Kohr; 2. John Eaton; 3. John Hausner; 4. Aaron Laird; 5. Susan Eisenhour.

Ages 12-14

1. Tim Kinsley; 2. Tammy Eisenhour; 3. Julie Myers; 4. Deb Bauer; 5. Chris Shive.

Ages 15 and up

1. Bill Wise; 2. Bob Livingston; 3. Brenda Walter; 4. Chris Kinsley; 5. Leroy Bowles.

The judge was Andrew Schmidt, a Hereford breeder from Monkton, Maryland.

Fulton Grange marks Dairy Month

OAKRYN — Fulton Grange No. 66 held their regular meeting Monday, 8 p.m. at the Grange Hall, Oakryn, Lancaster County when June Dairy Month was observed and Fulton Grange hosted the Pomona Grange visitation meeting.

Several Grange women prepared the mix and the men froze 84 quarts of vanilla ice cream which was served at the conclusion of the meeting, together with fresh strawberries, pretzels and iced tea.

Pomona Grange Lecturer, Mrs. Doris J. Brown; Mrs. Richard Maule, Colerain Grange Lecturer; and Mrs. Howard W. Miller Jr., Fulton Grange Lecturer, were in charge of the program. The theme was "America My Country." Mrs. George Hough painted the emblem of the program which depicted freedoms, responsibilities and patriotic songs used in the program. Glenn Hough was the pianist.

Henry Wenger, Colerain Grange, spoke on "My Responsibility As A Citizen In A Democracy." Sandra Galbreath, Fulton Grange, rendered a vocal solo "Give Me Your Tired, Your Poor" as is inscribed on the Statue of Liberty.

Mrs. Thomas C. Galbreath, Fulton Grange, read a portion of the Declaration of Independence and the Bill of Rights. Group singing "My Country, 'Tis Of Thee" and "America The Beautiful." Mrs. Richard Maule, Colerain Grange, conducted a quiz on things and places of national interest. Group singing "The Star-Spangled Banner." Scott Stauffer, Fulton Grange, introduced Doug Hershberger who gave his speech "The Cry Of The American Farm Boy" which won him first place honors in the county, district and regional FFA contests and he would be presenting in the state contest at State College. Group singing "God Bless America" concluded the program.

Master, Thomas C. Galbreath, presided at the business session. Clifford W. Holloway Jr., chairman of the tour committee, reported there are bus seats available on the New England tour of July 18, 19 and 20 The Master announced that the winners of Fulton Grange $25. Solanco commencement awards were: agriculture — David Holzhauer and home economics — Dwight Feister.

Mrs. Howard Miller announced that the Pennsylvania State Grange will hold a horseshoe pitching contest at Center Hall August 9, 10 a.m. Fulton Grange will indulge in horseshoe pitching and other games at the annual picnic July 28.

Arba Henry, chairman of the agriculture committee, announced that Dr. George Hanline, Extension Dairy Specialist from the University of Delaware, will speak at the next meeting of Fulton Grange June 23rd. His talk will be of interest to everyone as his talk will relate to the consumer's standpoint on dairy products

CHORE-TIME®

The Air System With A Mind Of Its Own

Until now, most ventilation systems had one drawback. Air inlets had to be opened and closed by hand.

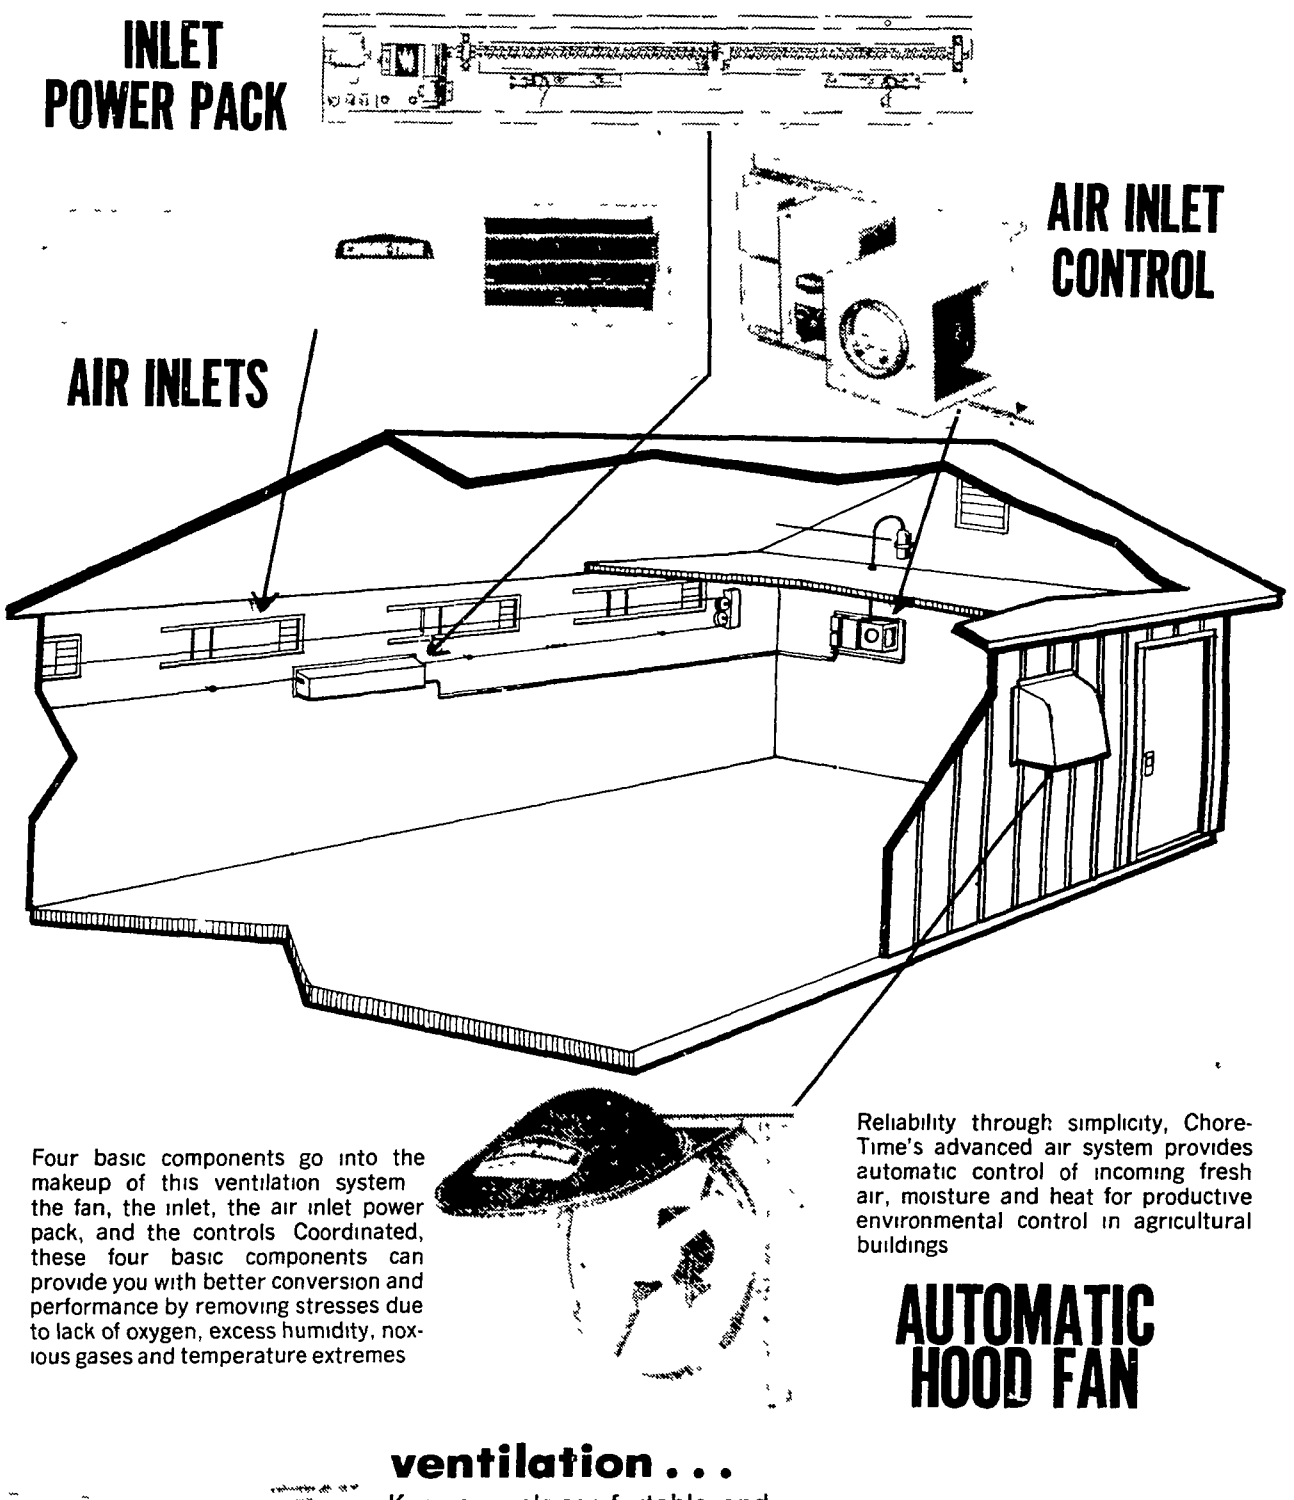
This was time consuming — and pretty much a matter of guesswork.

Now, Chore-Time has eliminated this problem.

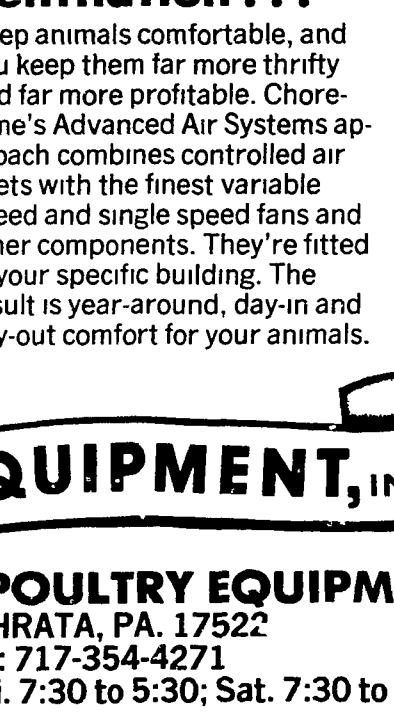
The Chore-Time system has a mind of its own and adjusts inlets — in conjunction with fan operation — to maintain air pressure at a constant, preset level.

This provides a degree of air and moisture accuracy never before possible in poultry and livestock buildings.

The new inlet control (pictured) is just one of many exclusive features that make Chore-Time air systems number one in performance and reliability.

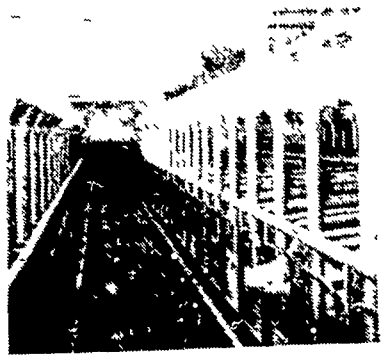


Four basic components go into the makeup of this ventilation system the fan, the inlet, the air inlet power pack, and the controls Coordinated, these four basic components can provide you with better conversion and performance by removing stresses due to lack of oxygen, excess humidity, noxious gases and temperature extremes



Reliability through simplicity, Chore-Time's advanced air system provides automatic control of incoming fresh air, moisture and heat for productive environmental control in agricultural buildings

AUTOMATIC HOOD FAN



ventilation . . .

Keep animals comfortable, and you keep them far more thrifty and far more profitable. Chore-Time's Advanced Air Systems approach combines controlled air inlets with the finest variable speed and single speed fans and other components. They're fitted to your specific building. The result is year-around, day-in and day-out comfort for your animals.

Tioga County Fair to run August 11-16

WELLSBORO — The 1980 Tioga County Fair will be held at the Fair Grounds, Whitneyville, August 11 thru August 16.

The Fair Grounds are located just off U.S. Rt. 6, halfway between Mansfield, and Wellsboro.

The Fair is sponsored by the Tioga County Agricultural Association and is one of the top county fairs in Pennsylvania.

The six days are packed full of a variety of events that will be of interest to the entire family. The Fair committee went all out on entertainment this year and booked Kenny Price, of the famous country music-comedy TV show "Hee-Haw" for two shows on Friday, August 15. Also appearing during the week will be the bluegrass group "Whetstone Run", and a concert on Wednesday, August 13, by the Allegheny String Band.

Monday, August 11, will feature a Grange program at 7:30 p.m., and a fireworks display at dusk. Fair entries will be accepted beginning at 8 a.m., and all entries, including livestock and commercial exhibits, must be entered by 9 p.m.

Tuesday, August 12, is Family Day. All Fair exhibits, except livestock, will be judged at 8 a.m., and 1 p.m. Building will be closed until 1 p.m.

A Wool Craft Show has been scheduled from 1 p.m., to 6 p.m., an Open and Junior Sheep Show at 5 p.m., a Garden Tractor Pull at 6:30 p.m., and three shows by "Whetstone Run" bluegrass band will round out the day's calendar of events.

Wednesday, August 13, highlights include 4-H and FFA Dairy Show at 9:30 a.m., a pony pull at 6:30 p.m., a horseshoe tournament at 7 p.m., a concert by the Allegheny String Band from 8:30 p.m. to 9:30 p.m., and a country hoedown concert and square dance from 10 p.m., to midnight.

Thursday, August 14, is Senior Citizen's Day, and there will be free admission to the grounds from 9 a.m., to 5 p.m., for those 62 years old and above. The Farmers' Market will run throughout the day, and there will be a colored breed and a swine show at 9 a.m. An open and Junior beef show is scheduled for 9:30 a.m., and the Bob Doyle Show will be presented free at 2 p.m., and 3 p.m. The Pageant Wagon Show will be staged at 7:30 p.m., and the blue grass group "The Buffalo Chipkickers" will be on stage from 8 p.m. to 9:30 p.m.

Friday highlights will include an open holstein show and a 4-H and Vocational Horse Show in the morning. A horse pull will be staged at noon and at 7 p.m. a farm class tractor and 4WD pick-up pull. at 7 p.m. and 9 p.m. and will round out the day's activities.

Saturday morning will feature an Open Horse Show and a market animal sale. A demolition derby is slated for 8 p.m., and a disco dance at 8:30 p.m., will close out the Fair.

Lancaster County runs classification meetings

RONKS — A pair of barn meetings on Holstein classification were held Tuesday at Ronks and in Denver.

The Ronks meeting was held in the evening at Neff Brothers Farm, R2 Ronks; the Vern-Lee Holstein operation of Russel L. Kline, R 2 Denver sponsored the afternoon meeting.

The meetings were conducted by Clarence Stauffer, local representative; and Bentz Rhoads, Jr, of Virginia, a consultant with the Holstein-Friesian Association of America.

The meetings featured a slide presentation and gave farmers the opportunity to discuss a particular milker in the dairy herd with regards to her type and overall looks.

The speakers emphasized the need to breed cattle for type.

They said sound, functional type will result in more milk because good feet, legs, udders and udder attachment will keep a high producing cow healthy.

They recommended farmers look for cows which were strong enough to maintain high milk production with a low level of care.

Farmers should plan a breeding program around their cattle's type. First, a farmer should determine the percentage of his income which comes from milk sales and the percentage which comes from the sale of breeding stock.

Then the farmer should ask what percentage of his breeding stock is sold because of its high production potential and how much is sold because it exhibits good Holstein type.

Many problems with low production are due solely to pool type, the consultants said.

They pointed out that an uncomfortable cow will not do as well as a cow who is standing on good feet and legs.

There are several factors to consider before breeding for a specific genetic factor in a herd. First, the farmer should make sure the gene will contribute to the overall production of his herd.

The genetic factor must be measurable so the farmer has some idea of his chances for success. It must be inheritable by the young stock so it can be passed on from the parents. Milk production, for example has a 20 percent heritability factor.

Farmers in this area who milk in the barn should be aware of a cow's stature. A taller cow, with about 57 inches clearance is considered a Code 1 cow in the classification. Foreudder is one important trait which can be passed along quickly. But more important, the Holstein men said, is the rear udder and udder attachment factor. Both are readily passed along.

How should a farmer who is interested in upgrading a herd go about it?

Four steps will bring a farmer along quickly, they noted. First, the farmer should identify the major problems in the herd.

Next, he should make a strategy decision in conjunction with his AI stud and stick to it. The strategy should cover at least one year's breeding schedule so

(Turn to Page B13)

A. Bentz Rhoads, Jr., a consultant for the Holstein-Fresian Association, told farmers rear udders and udder attachment are two of the most important traits to breed into a herd. He spoke at a pair of barn meetings in Lancaster County this week.

Russel L. Kline hosted the Tuesday afternoon classification meeting at his farm near Denver. Among his top cows is Gladtime Astronaut Jody by Paclamar Astronaut and out of Gladtime ABC Janice. Kline can lean on her for more than physical support--her current projected average is 22,483 pounds milk and 877 fat.

Classification

(Continued from Page B12)

and so the farmer can be sure of getting the ull semen he wants.

Next, the farmer must remember that the sire is only half of the game. He should remember the female, too, and put her it isn't a last-minute decision genetic background into his figuring.

Lastly, he should figure on culling the bottom 15 percent of the milking string each year. This will make room for his better milk makers in the barn.—CH

China seen as bright hope for U.S. soybean exports

ST. LOUIS, Mo. — The American soybean growers must begin building their resources and capabilities to establish ongoing market development activities if they are going to benefit from the vast potential market for their products in the People's Republic of China.

"Many dynamic things are going to happen in the PRC," American Soybean Association's Dennis Blankenship said following his recent trip there and the second trip to the PRC by an ASA official in a year.

"It is something we have to look at in any market. It is not a hit and run type of approach but rather setting up what the problem areas are, what the approach is and how we can work on these mutually with the Chinese. We westerners are just going to have to be a little more patient and become more familiar in dealing with their approaches.

"There is vast potential and if the PRC can sustain stable economic growth we'll see China become very rapidly one of the most important customers we have for soybeans and soybean products," he said.

Blankenship cited, as an example for his optimistic outlook, the desire by PRC officials to increase livestock production, not only for domestic consumption but for export to other parts of asia as well.

"As they develop their meat industry they are really going to lean toward U.S. soybean and corn as an energy source in feed rations," he said.

To help livestock producers and other PRC officials become more familiar with utilization of soybeans and soybean products, Blankenship said some of the initial activities that will be conducted by ASA will deal with poultry, swine and dairy production, soybean processing and quality control along with soy foods for human consumption and new styles of soy protein foods.

For instance, ASA will participate this fall in a U.S. exhibition in Beijing (Peking) with 24 other cooperator groups similar to ASA. Blankenship said ASA will be responsible for four sessions at the exhibition which will include feed manufacturing, swine and poultry production and soybean processing.

"The next logical step," according to Blankenship, "will be the continued exchange of publications and technical literature translated into the Chinese language and probably before too long some actual on-farm test demonstrations and feeding projects."

THe PRC has imported 27.2 million bushels of U.S. soybeans and 60,000 metric tons of soy oil this marketing year. However, Blankenship said the Chinese indicated they had purchased adequate supplies to meet their demands this year.

As recently as 1975-76 the PRC did not purchase any soybeans or soybean products from the United States, however, in 1977-78 it imported two million bushels and last year imports totaled 15 million bushels.

"Market development activities in the short term will be coordinated from ASA's world headquarters in St. Louis, however, in the long term U.S. growers should think about having some people on the scene in the PRC," Blankenship said.

Cattlemen plan promotion survey

JACKSON HOLE, Wyo. — Merlyn Carlson, president of the National Cattlemen's Association recently announced there soon will be an industry-wide attitude survey conducted to determine what kind of market development programs most cattlemen want, and to determine the dollar level at which most cattlemen will invest in such programs.

Carlson noted that, if anything, the need for beef promotion programs has increased since the industry defeat earlier this year of a proposed uniform collection plan.

"Per capita beef supplies are now at the lowest level in many years," Carlson said, "and the cattle market should be better. However, beef demand has been lagging, and our market has been hurt.

"Years of anti-meat propaganda undoubtedly have had their effects. At best, it will take years of stepped up research and information to put beef back into a stronger position. We cannot for long delay doing the job that is needed.

"The time for action is now. We must do a better job on the role of beef in American diets, or the government will do it for us."

The survey work, sponsored in part by NCA, will be done by a professional survey organization, under the supervision of a producer advisory committee and the National Live Stock & Meat Board.

Once the survey is completed, new or revised plans for fund collection, research and promotion programs and administrative procedures will be developed.

Meanwhile, the NCA president said, cattlemen should maintain and, in fact, step up their support of existing beef promotion organizations and programs, including the state beef councils and the Beef Industry Council of the Meat Board.

"We simply cannot afford to let promotion efforts slip," Carlson said. "We cannot afford to have a weakening or splintering of promotional programs. A unified industry effort is essential."

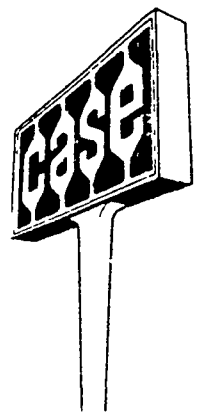
The Tractor Specialist sells more "up-time"



When the farmer is ready, his tractor had better be That's one reason a Case dealer franchise makes extra good sense

As a Case dealer, you're the Tractor Specialist You sell and service the best in farm tractors And you are backed by an industry first Assured Availability It means that, during warranty, if a tractor bought from you isn't ready to go you can offer your customer free use of a replacement And Case will back you up Proof that when a Case dealer needs help, we do something about it

You could be planning a bright future as your area's Tractor Specialist You could also consider our light construction equipment line Write or call for full information on the Case dealer franchise

Are you intersted? Please contact

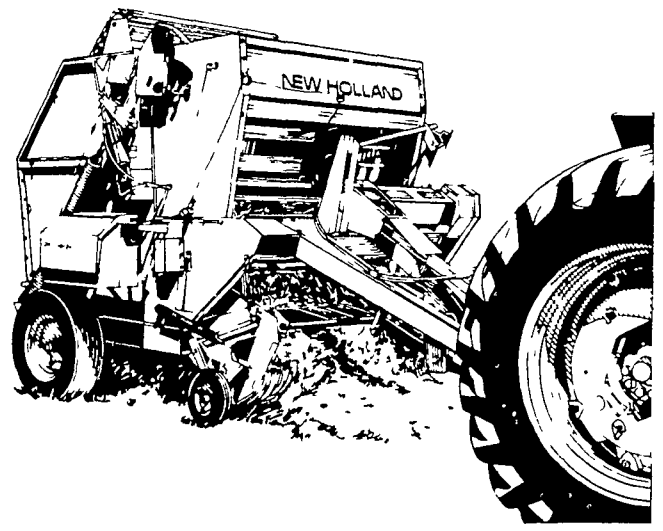
MESSICK FARM EQUIPMENT

Hay in a big way!

SPERRY NEW HOLLAND MODEL 846 ROUND BALER.

- Makes round bales weighing up to 850 pounds.
- Three tying choices — Manual, hydraulic and Auto-Wrap.
- Sure, fast core formation.
- Super-Sweep pickup and fines saver pans get more hay in every bale.



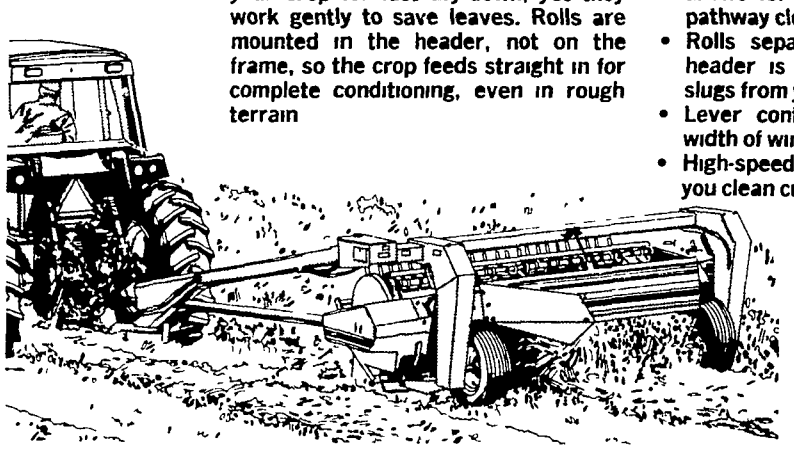
FREE FINANCE
ON ALL HAY TOOLS
TILL MARCH 1, 1981

INTERNATIONAL 1190 MOWER CONDITIONER

Preserves hay quality to maximize profits

Precision-machined, intermeshed rubber conditioning rolls crush and crimp your crop for fast dry-down, yet they work gently to save leaves. Rolls are mounted in the header, not on the frame, so the crop feeds straight in for complete conditioning, even in rough terrain

- Two sizes: 7 and 9'
- Over-the-top frame suspension allows for header float, keeps crop pathway clear
- Rolls separate automatically when header is raised so you can clear slugs from your tractor
- Lever control lets you adjust the width of windrow or swath
- High-speed oil-bath knife drive gives you clean cutting, long life.



FREE FINANCE

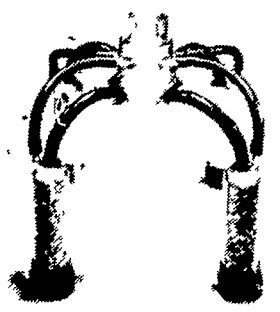
BODMIN NU-PULSE SYSTEM

FOR PARLORS, PIPELINES, AND PAIL MILKERS — ONE CLAW FITS ALL

The "non-conventional milker" that establishes all new milker standards for the industry with low teat end vacuum (10" HG) (5/8" milker hose required)

- can be used on all milking systems giving you complete 360° visability
- can reduce pipeline installation costs (eliminates all electrical pulsation controllers pulsators stall cocks and eliminates the installation of separate vacuum lines)
- can reduce pipeline operation costs by at least 70% (eliminates electrical maintenance guaranteed 5000 cow milkings per set of rubber inflations much lower energy consumption)
- has been 13 years in development — 4 years in the field with present unit 2 years under American conditions tend to show gentle milking action improved teat and udder health drastic reduction of milker fall off complete milk out even of difficult cows first calf heifers milk out with less irritation



Features

- Eliminates service calls
- Eliminates electrical pulsators controllers and pulsation lines
- Eliminates milker fall off and inflation creep
- Eliminates teat sphincter damage (previously damaged teat ends begin healing immediately)
- Milks better than all other milking machines
- Milks out even the most difficult cows very completely (more milk in the bulk tank and higher butter fat yield)
- Is compatible with all milking systems
- Allows 360° visibility and is easy to handle
- Reported less incidence of mastitis in herds
- Minimizes cow stress
- Milks out so gently that first calf heifers are not irritated

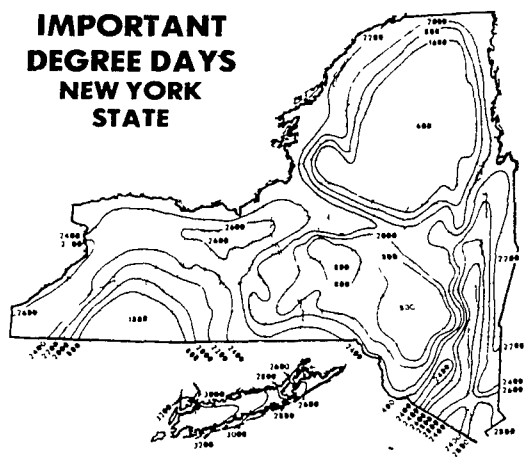
IMPORTANT DEGREE DAYS NEW YORK STATE



Lake Ontario is 246 feet above sea level and it's cooling effect is why the degree days decrease from 2600 plus as you go north toward the lake. The Finger Lakes drain north, not south, towards Lake Ontario. Land rising to over 2000 feet above sea level at it's southern sources. The best high lime Ontario and Honeyoye soils are located within and about 25 miles surrounding the 2600 degree plus area. The longest growing season and best high lime soils are in the same territory and corn for grain questionable below 2200 degree days.

You need other information. General Soil Map of New York State. Snowfall amount different areas (50" to 60" in Penn Yan, Canandaigua, Geneva area). Yield potential different soils. Every prospect that comes to my office will be given copies of bulletins and maps based on government surveys Don't take a salesperson opinion on these facts. See the bulletin! We tell it as it is

We have over 200 farms for sale from Batavia to Utica The best land and longest degree day. Why settle for less?

What's he doing baling at this hour?

Whether it's early in the morning and there's still dew on the windrows, or late in the afternoon . . he's out baling! He's treating his hay with Beacon Hay Pre-Serv*, and that means he can bale at up to *25% moisture!* So, he can bring in his hay early in the day, perhaps before bad weather hits. Or he can bale two or three hours later in the afternoon. Or when the hay is almost field cured, but not quite.

What's more, he'll have better hay.

Because of its higher moisture content, there's less leaf shatter. There are more high-protein leaves that will turn more milk production. No wonder we call hay treated with Beacon Hay Pre-Serv SuperHay!

Start using this food-grade blend of preservatives, antioxidants and flavors on your hay yourself. Start making SuperHay, and start making super profits! Call your Beacon Advisor now.

Beacon—headquartered in Cayuga, New York available throughout the northeast.

Lucinda Landis ends a year of smiles

BY SALLY BAIR
Staff Correspondent

"I think a dairy princess really makes a difference, especially with kids. She makes them more aware of milk, where it comes from and how much they should drink."

Those thoughts are from Lucinda Landis, Lancaster County's retiring Dairy Princess, as she reflects on the impact she feels she has had during her year representing the local dairy industry. Lucinda is the daughter of Mr. and Mrs. John Landis, 1801 Colebrook Road, Lancaster.

Outgoing and exuberant, Lucinda is quick to express her satisfaction with the opportunity to be Dairy Princess. "I really enjoyed meeting others and I made some lasting friendships," she states.

One change she has experienced during her reign is her growth of self-confidence. Her self-confidence came from traveling over 3000 miles, meeting hundreds of school children in 40 schools, appearing at the Spectrum in Philadelphia, working at mall promotions and store openings and dozens of other appearances which she made in an effort to educate the public about the virtues of milk.

Lucinda, 18, graduated in January from Hempfield High School, which enabled her to spend most of the winter and spring making appearances as Dairy Princess. But even before she graduated she was hard at work. She says, "I missed a lot of school, but the school officials were so great. They helped me so much and supported me in everything. I feel pretty fortunate."

Although it some ways it was a difficult decision to graduate early, Lucinda feels it was the right thing to do, and she still participated in senior activities like the Prom.

She was hesitant to enter the contest last year, but did so at the urging of friends in 4-H. A call from last year's Dairy Princess Joyce Stoltzfus clinched the decision for her and she entered with her good friend Marcia Groff who was ultimately named her first Alternate Dairy Princess.

"I decided to do it just for the experience and to have a good time. I was shocked — really surprised when I won. I was never in front of people, but once I was on the stage during the contest I loved it because I was doing something," she recalls. She says she was "hesitant," and hated to talk in front of people, traits which have seemingly disappeared.

Lucinda credits the Dairy Princess seminar with helping her learn what to expect and gain poise, but she is especially grateful to the confidence she gained through the Dale Carnegie Course. Partial payment to the course was given her by the Dairy Princess Promotion committee, and Lucinda says, "It helped me so much."

Lucinda used puppets to tell her story to school children, including the message that "everybody needs milk" and that children should drink at least three glasses of milk a day. Her puppet friends include "Germs" who is a bad guy and is eventually blown away; "Homer" who eats only candy and drinks no milk; "Bert" who drinks milk occasionally; and "Wise Old Owl" who drinks milk three times daily.

When she visits schools or other organizations she also uses large colorful posters from the American Dairy Association to show the many products which are made from milk. The posters give her the opportunity to remind her audience that they can get their daily requirement in many ways.

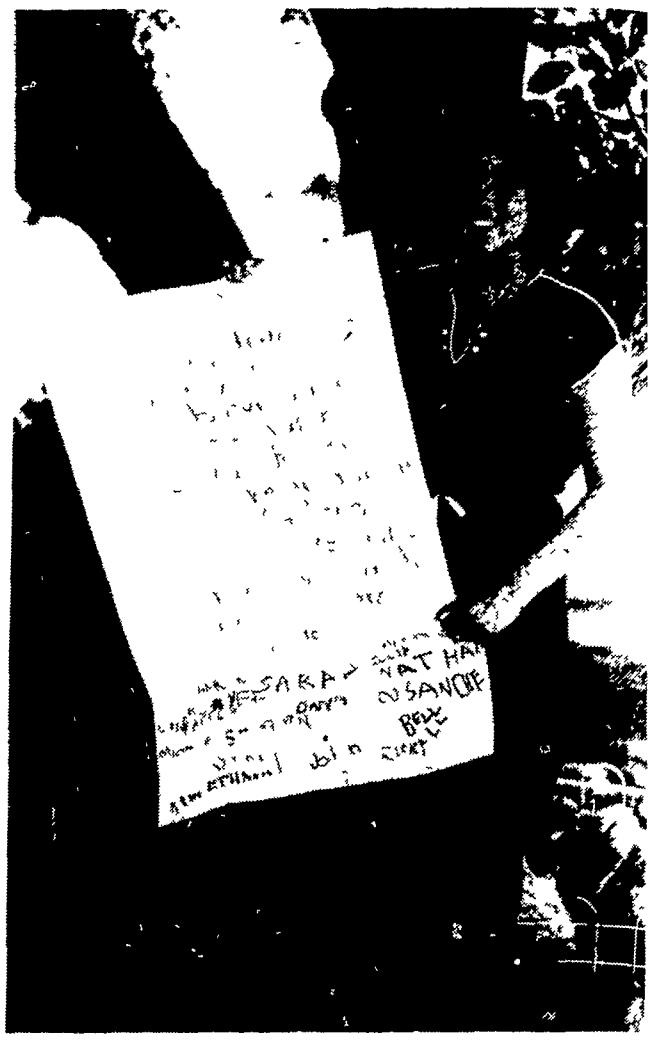
She feels one of her most successful appearances was at the Elizabethtown Hospital for Children and Youth, something she called "sobering." She said about 15 or 20 children came to see her, some of them in their beds. "I didn't know what to expect but I really like children and wanted to go there. I gave my regular presentation and gave out some things. They really liked it and that made it worthwhile. It was really sobering." She says many of the children have since visited her at her farm.

Perhaps the thing Lucinda enjoyed most was donning the "Magic Cow" costume. "I enjoyed the anonymity. I like to get in the cow and act crazy. Kids really liked it and sometimes called it the Easter Bunny," she laughs. However, once she wore the costume at a soccer game in Philadelphia and her name was announced loud and clear from the loudspeaker. "It was embarrassing," she said.

Lucinda and her puppet friends visited over 40 schools in the county and told the story of the dairy industry. Children were delighted to meet a real Princess and loving having the puppets tell them the facts about nutritious milk.

One of the toughest audiences she faced was a local Rotary Club. "They knew their stuff," Lucinda states. "They were all businessmen and really interested in what I had to say."

It was a thrill for her to participate in the state pageant. "I really enjoyed meeting the other girls and made lasting friendships." As one of seven finalists there, Lucinda says she was thrilled and felt she was doing a good job representing local dairymen.



School children were thrilled to meet the Dairy Princess and were appreciative of her talents. Here Lucinda holds one of the letters she received thanking her for her visit.

She appreciates the support she has been given throughout her year and says she feels the contest is important for dairy farmers. "It really makes an impact on children, the generation to come," she says. She also praises Barbara Stauffer, the promotion committee chairman for her support.

The children she has talked with have asked some interesting questions, although many of them center around her crown (is it made of diamonds?) and where she lives (a castle, perhaps?). She said she encountered many children who thought milk came from a faucet, and others who thought cows had to be 30 years old to give milk. For a young child it is startling to learn that a cow can be a mother at age two. One thing she learned is that most children do know that brown cows do not give chocolate milk!

As a Dairy Princess, Lucinda has met Governor Thornburgh, Mrs. Thornburgh, Miss Pennsylvania Carolyn Black and other celebrities. Just two weeks before the contest she participated in a milking contest with Lancaster County Commissioner Jim Huber. Her scrapbook is filled with letters, pictures and news clippings documenting the appearances she has made.

Her reign has been varied, and the only thing she regrets is not having done a television interview. Mall promotions were so frequent that she feels comfortable meeting the crowds of strangers who timidly come forward to see the Dairy Princess and sample the dairy products usually offered.

One of the unique aspects of Lancaster County's promotion is that the Alternate Dairy Princesses are frequently used when Lucinda's schedule is too tight to meet all requests. "We have strong Alternates," Lucinda says, "And I'm glad to share the appearances with them." Mall promotions and the opening of several dairy stores gave the Alternates a chance to put their knowledge of the industry to use.

Lucinda is no stranger to cows, and helps with the milking on her father's farm when possible. The Landises milk about 200 cows, three times a day, so there is plenty of opportunity to milk. Lucinda points out that their operation is fully automatic, with one person needed to handle 16 cows. "I help when I can, whenever they need me and on weekends." She acknowledged that her parents have been supportive of her busy schedule and excuse her from farm work on the many occasions she is away on behalf of the dairy industry.

Lucinda is happy to be a farm girl, explaining, "I would always like to live on a farm. I don't think I'd like a city with lights and noises. Kids learn more from experiences on a farm than from hearing about it."

It's been a busy year, and Lucinda continues to fill her schedule right up to the last day of her reign, Saturday June 21. On that day one of the seven contestants will be selected to succeed her. At that point Lucinda will begin looking seriously for a fulltime job, hopefully in agriculture.

But the year has had its rewards and Lucinda has happy memories of representing Lancaster County's dairy industry.

Homestead Notes

Cool, refreshing milk is the only drink for a Dairy Princess. Here Lucinda pours herself a glass of milk, something she's done frequently for others as she promotes dairy products.

Her scrapbook is filled to overflowing with letters, pictures and news clippings about the many events she has participated in as Dairy Princess

Ladies Have You Heard?

By Doris Thomas

Lancaster Extension Home Economist

CAROB FOR COCOA?

Carob cake, carob cookies, carob brownies? Only in part, carob powder, commonly called St. John's Bread, can be used to replace 25 to 50 percent of the cocoa in a recipe. While carob looks like cocoa and performs like cocoa, it differs in sugar and fat content. Cocoa may contain up to 23 percent fat and 5 percent sugar, while carob has 0.7 percent fat and a sugar content of 42-48 percent. Carob powder has approximately 2.63 calories per gram.

Why use carob? Carob has none of the allergy producing antibodies of cocoa, nor does it have the cocoa stimulant theobromine. Nutritionally, carob contains as much thiamine as asparagus or strawberries, the same amount of niacin as lima beans, lentils or peas, and more vitamin A than eggplant, asparagus or beets. It is also high in riboflavin, calcium, magnesium and iron.

If you want to replace some cocoa for carob in your recipes, I would suggest you only replace 25 percent not more than 50 percent. Above that level you lose the characteristic cocoa flavor. You might have to adjust the sugar and fat levels in the recipe also.

CHECKLISTS ARE PART OF VACATION

If you leave home on vacation this year, you want to relax and enjoy yourself to the utmost.

To do this you are going to find checklists helpful because none of us has a perfect memory. Four such lists are important: the Home List containing things such as stop the paper, hold the mail, or arrange to have a friend or neighbor get it for you. Don't forget to arrange to have the grass cut and give a neighbor a key and a list of your repair people—plumber, heating contractor, electrician and such. It also is wise to give valuables to a friend for safe keeping or put them in a bank safe deposit box.

Leave your vacation address with somebody, a route map, and a telephone number. If a family emergency arises, there needs to be some way to reach you.

People have differing medical needs. A travel medical kit is a must. Vacation time requires people to keep going, if at all possible. Aspirin and an extra pair of glasses, or at least a prescription for glasses replacement are important. Favorite cold medicines and a decongestant can help the unfortunate get sleep under difficulty. Every family medical kit should contain those things each family member usually needs. It is time to get prescriptions for these things from your physician. List them in the lid of the kit and the date bought. Drugs do deteriorate and need replacement. Tape dimes to the lid of the kit to make emergency phone calls also.

Lancaster 4-H sheep club meets

LANCASTER — The Lancaster County 4-H Sheep Club met on May 19 at the home of Jim Stauffer, Weaver Rd., Lancaster.

The meeting started with sheep shearing, hoof trimming, and worming demonstrations by Barbara Herr, Narvon. She also gave members who had never sheared before the opportunity to try it. Jim Stauffer then showed his breeding flock and explained his breeding program.

The first item of business was announcing the official name of our new club, which was in a contest where each member submitted a name The prize was free dues for this year.

The winner was Jeff Martin, New Holland, who submitted the name, the "Lancaster Co. 4-H Woolies Club". Reports were given on our recent chicken catching project and the Maryland Wool Festival. Jim Stauffer also gave reports on the County Council meeting and the York Co. 4-H Field Day.

In place of their June meeting, members are planning to attend the Cumberland County Wool Pool at the Carlisle Fair Grounds on June 18.

Farm Women Societies

Berks Co. Society 4

The Berks County Society of Farm Women, Group #4, met at the home of Mrs. Lester Kulp, R3, Boyertown, on June 3, 1980. There were 12 members present and one guest, Mrs. Joann Heydt.

One new member was accepted at this meeting: Mrs. Sandy Rhoads, 118 S. Keim Street, Pottstown, Pa.

An award of $10 was sent to each of the following girls, who were first in the Home Economics class in their school: Susan Cooley, Jr. High East; Jacqueline Heffner, Jr. High West; and Karen Knepp, Sr. High.

Group #4 will have a stand at the sidewalk sale in Boyertown on June 24, 1980.

Members of Group #4 will enjoy an evening of miniature golf at Taylor's Miniature Golf Course, Colebrookdale on Wednesday, June 11, 1980 at 8:00 p.m.

Members were reminded of the State Art Show for children for grandchildren to be in by October, 1980.

Evelyn Becker showed slides of her trips to Georgia and Montana.

Mrs Geraldyn Chaplin, 1217 Crestwood Drive, Pottstown, will have a "surprise" program for the group at her home on July 1, 1980.

Berks Co. Society 9

Karen Schrierer was the hostess for the monthly meeting of Berks Group 9.

A donation was made to send two children to summer camp from the Hamburg Hospital. The Group's annual family picnic will be held Sunday, July 27.

The program for the evening was a discussion by Faye Strickler, home economist, on the correct procedures for freezing, canning and drying foods.

The next meeting will be held in the home of President Grace Spohn.

Berks Co. Society 12

The June meeting of Berks Society 12 was held at the Bernville home of Mary Leymeister.

Plans were made to go to the Philadelphia Zoo, Saturday.

Sally Steinhauer, Glenna Hix and Pauline Hartranft helped at the Berks Heim picnic Sunday

Plans were discussed for the group's family picnic, which will be held Sunday, August 3 at the Bernville home of Sally Steinhauer.

The next meeting will be held at the Bernville R1 home of Pauline Hartranft. Doris Vega, a residential representative from Metropolitan Edison will be the guest speaker Monday, July 14, at 8 p.m.

Cumberland Co. Society 10

Forty-three members and guests of Cumberland County Society 10 recently enjoyed a covered-dish mother-daughter banquet held at the Green Spring First Church of God.

Musical selections were given by Lavana Brechbiel and daughter Kathy. A skit was performed by Dorren Barnhart, Wanda Barnhart, and Michelle Clugston entitled "Patient in a Doctor's Office." Doreen and Florence Clough gave readings regarding mothers.

Prizes were awarded for the person with the most rings, Ruth Rolar; the person born the farthest away, Jane Keefer; person with most change in purse, Karen Smith; mother with smallest handbag, Chris Staver; person with birthday nearest date of banquet, Marie Myers; mother with most grandchildren, Ethel Thomas; and mother with most daughters present, Nan Clugston.

An acknowledgement for a donation given to the Hemophilia Foundation was read by the president. A donation was given to the Cumberland County Dairy Association for the dairy princess contest.

The next meeting will be held Thursday, June 19 at the home of Jean Barnhart, R1 Newburg. The program will be a musical with roll call being your favorite song and sing it.

Lancaster Co. Society 10

Peter Dys, director of the Office of the Aging, was the guest speaker at the meeting of Farm Women Society 10 at the Neffsville Fire Hall, when the members of Society 1 were entertained.

Dys presented slide pictures of different activities of the office, and gave a most interesting account of the origin, growth, and various services offered to the Elderly.

After a noon luncheon, each society held a brief business meeting.

State President, Mrs. John Hess, and County President, Mrs. John Ruhl, brought greetings.

The oldest guest, Mrs. Moore, age 95, and Mrs. Mary Delp, age 95, the oldest member of Society 10, were presented with potted flowers.

A bus trip to Ocean City, New Jersey, is planned for Wednesday, July 30.

The July meeting will be held at the Farm and Home Center and will feature a box lunch auction. Mrs. Robert Scott and Mrs. Morris Miller will serve as hostesses.

Lancaster Co. Society 11

The regular monthly meeting of Farm Women Society #11 met May 29 at the home of Mrs. Ralph Shaub.

FarmWomen #11 entertained Society #2 from the Manheim area.

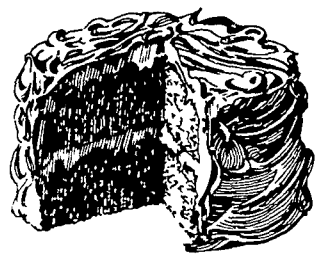
Home On The Range



Warmer weather has arrived and the kids are out of school. Definitely the time has arrived for that first or second or whatever batch of homemade ice cream. Just in case you don't have a regular standby recipe, we have a few delicious sounding ones to lead off the column today.

In addition, we have recipes for Baked Lasagna, Dilled Potato Salad, Impossible Quiche, and Finnish Pancakes which are guaranteed to be finished quickly. So why not try something new today or tomorrow?

ORANGE ICE MILK

⅔ cup orange gelatin
1 cup water
1 cup sugar
1 tablespoon lemon juice
4 cups milk
¾ cup pineapple

Boil sugar and water together 1 minute. Remove from the heat and add lemon juice and gelatin. Cool but do not chill. Add milk and freeze. When partly frozen, add pineapple and finish freezing. If a hand freezer is used, it makes 2 quarts.

Lucy Brubaker, Denver

STRAWBERRY ICE MILK

2 3-ounce packages strawberry gelatin
2 cups water
2 cups sugar
juice of 1 lemon
6 cups of milk

Boil water and sugar together for a minute. Remove from heat. Add lemon juice and gelatin and cool. Then add milk. Pour into a 4 quart freezer can and freeze with 1 part of salt to 6 parts of ice.

Lucy Brubaker, Denver

VANILLA CUSTARD ICE CREAM

2 cups sugar
dash of salt
¼ cup cornstarch
1 quart milk
4 eggs, separated
2 teaspoons vanilla
1 13-ounce can evaporated milk
1 pint light cream
½ cup milk

Thoroughly mix sugar, salt and cornstarch. Stir into 1 quart of milk, heated just to boiling. Remove from heat and beat yolks, gradually adding 1 cup of the hot milk mixture. Stir egg yolk mixture into remaining hot milk and bring to a boil. Remove from the heat. Add vanilla, evaporated milk and cream to the hot custard. Cool. Fold in egg whites, beaten stiff but not dry peaks. Pour into a 1 gallon freezer container. Add remaining milk to fill the can ¾ full. Pack with 4 parts of ice to 1 part of coarse salt. Freeze. Makes 1 gallon. Recommended freezer storage time is 3-6 weeks.

B. Russell, Pine Bush, N.Y.

EASY HOMEMADE ICE CREAM

5 eggs
2 13-ounce cans evaporated milk
2 cups sugar
3 cups whole milk
1 tablespoon vanilla
4 cups fresh fruit
¾ cup cocoa (if you use the cocoa, don't use the fresh fruit)

For low-calorie ice cream, substitute 2 13-ounce cans of evaporated skimmed milk, 4 tablespoons liquid artificial sweetener. Mix all together and put into the freezer can.

Geraldine Moyer, Pen Argyl

BEEF CARROT CASSEROLE

1 pound ground beef
¼ cup minced onion
2 8-ounce cans tomato sauce
1 teaspoon salt
¼ teaspoon pepper
1 cup cottage cheese
1 cup dairy sour cream
¼ cup chopped fresh parsley
2 cups sliced cooked carrots
8-ounces of medium noodles, cooked and drained
1 cup shredded Cheddar cheese

Brown beef in skillet. When meat begins to turn color, add onions. Saute until meat is well browned. Stir in tomato sauce, salt and pepper Simmer uncovered for 5 minutes. Combine sour cream, cottage cheese, parsley and cooked carrots. Add to cooked noodles. Mix well. Alternate layers of the meat mixture and sour cream mixture in greased 3 quart casserole, beginning and ending with the noodles Top with the cheese.

Bake at 350° F. for 30 minutes or until hot If frozen, heat covered at 400° F for 1 hour or until bubbly

Lynette Yoder, Denver

BREAD PUDDING

2 cups bread
2 cups milk
¼ cup sugar
2 eggs
¼ teaspoon salt
3 tablespoons butter
1 teaspoon vanilla

Place bread cubes in a buttered baking dish. Scald milk and add butter and sugar. Beat slightly and add salt and vanilla. Pour scalded milk over beaten eggs and mix. Pour mixture over bread crumbs and blend together. Set baking dish in pan of hot water. Bake at 350° F. for about 1 hour or until a knife comes out clean.

Geraldine Moyer, Pen Argyl

SCALLOPED CARROTS

12 carrots
4 tablespoons butter
4 tablespoons flour
2 cups milk
1 diced onion
¼ teaspoon salt
¼ teaspoon celery salt
½ cup diced Velveeta cheese
1 teaspoon mustard
dash of pepper
crushed potato chips

Slice carrots. Cook until tender but not too soft. Make a white sauce with the butter, flour and milk. Add onion, salt, pepper, mustard and cheese. Pour carrots into a casserole. Top with crushed potato chips. Bake at 350° F. for 45 minutes.

Lorrene S. Newswanger, Morgantown

EGG NOG

4 eggs
4 cups cold milk
½ teaspoon vanilla
dash of nutmeg
dash of salt
⅓ cup sugar

Beat eggs thoroughly. Add remaining ingredients. Beat with rotary beater until frothy. Serve immediately.

Lucy Brubaker, Denver

STRAWBERRY DESSERT

1 cup sugar
1 cup milk
4 egg yolks
1 3-ounce package strawberry gelatin
22 rolled graham crackers
¼ cup butter
4 egg whites
1 cup cream
8-ounces cream cheese
1 quart of thawed or fresh strawberries

Bring sugar and milk to a boil. Beat the egg yolks and add a small amount of the hot liquid to the yolks. Stir well. Stir into the hot liquid. Cook until thick. Remove from the heat. Add the package of strawberry gelatin. Mix the graham crackers and butter together. Spread in a large dish, reserving some of the graham mixture for the topping. Beat the egg whites until stiff. Whip the cream Mix the custard, the cream, the cream cheese and egg whites Fold in the strawberries. Spread on top of the graham cracker crust and top with the remaining crumbs. Refrigerate until set.

Mrs. Ray Keeny, New Freedom

CHERRY DELIGHT

2 cups graham cracker crumbs
¼ pound margarine
1 envelope Dream Whip
½ cup powdered sugar
½ teaspoon vanilla
8-ounces of cream cheese
1 can cherry pie filling

Make a crust of the crackers and margarine. Mix the Dream Whip according to directions. Add the powdered sugar and the vanilla. Beat in the cream cheese. Spread on the crust Top with the pie filling. Chill

Mrs. John D. Martin, Ephrata

STRAWBERRY SWIRL

1 quart cold milk
1 6-ounce can frozen lemonade, thawed
1 pint strawberry ice cream, softened
1 quart strawberry soda or ginger ale

Mix everything except the soda together in a punch bowl Blend in the soda Makes 21 ½ cup servings.

C.A. Dumas, Durham, Conn.

Orange Ice Milk, Strawberry Ice Milk, Easy Homemade Ice Cream and Vanilla Custard Ice Cream are just some of the yummy recipes we feature today.

FINNISH PANCAKES

6 large eggs
1 quart milk
4-5 tablespoons sugar
1 teaspoon salt
1 cup flour
¼ pound butter

Melt and brown the ¼ pound butter in a 12x16 inch pan. Mix the milk and eggs lightly with a beater, then add sugar, salt and flour. Bake in 450° F. oven for 20-23 minutes or until set. Serve hot with maple syrup, jelly or butter.

Catherine A. Dumas, Durham, Conn.

FROZEN FRUIT SALAD

1 3 ounce package cream cheese
½ cup mayonnaise
½ cup heavy cream, whipped
¼ cup maraschino cherries
1 can crushed pineapple
1 cup miniature marshmallows
¼ cup chopped nuts

Cream together the cheese and mayonnaise. Fold in the whipped cream and the remainder of the ingredients.

Mrs. Derroll E. Rhoderick, Mt. Airy, MD

Vegetable recipe contest to run at Ag Progress Days

HARRISBURG — Vegetables will be in the spotlight August 20 at the first Pennsylvania Vegetable Recipe Contest ag Ag Progress Days at Rock Springs, Centre County, according to Pennsylvania Agriculture Secretary Penrose Hallowell.

Any vegetable recipe using Pennsylvania grown vegetables as a main ingredient in any form may be entered. Persons 18 years or older, without professional food status, are invited to enter.

Twelve finalists will be chosen to prepare their recipes on August 20 with a top price of $100 awarded to the first place winner. The runner-up will receive $50, while the third and fourth place contestants will each receive $25.

The vegetable dishes will be judged on the following basis: taste, 40 points; ease of preparation and practicality, 20 points; originality, 20 points; and appearance, 20 points.

The recipes must be specific, but brand names may not be used. The recipe must be prepared as submitted, and number of servings and preparation time should be stated.

Recipes will be screened by a panel of judges and the top twelve entries will be notified of their selection. Finalists will be requested to bring their complete dish to Ag Progress Days on August 20. Facilities for refrigeration and/or reheating entries will be available. The sponsors assume no responsibility for the expense of any contestant.

The winning vegetable recipes with their proper preparation will be featured and used to promote the vegetable industry of Pennsylvania. The contest is sponsored by the Pennsylvania Vegetable Growers, the Pennsylvania Department of agriculture and the Pennsylvania State Cooperative Extension Service.

Each contestant may submit one recipe which should be typed and submitted in triplicate to: Judi Keefer, Chairman, Schuylkill County Extension Service, Box 250, Schuylkill Haven, PA 17972, 717-385-3431. Entry deadline is July 16, 1980. In case of duplicate recipes, the one with the earliest postmark will be considered.

F.W.S. Calendar

Saturday, June 14

Lancaster Co. Society 25 will meet at the home of Helen Mylin. Jean Pulanka will be the speaker.

Lancaster Co. Society 19 will meet at 1:30 p.m. at the home of Lucetta Long. Lucinda Landis, Dairy Princess will be the speaker.

Sewing seminar slated

LANCASTER — An educational day for the home sewer will be held June 18, from 12 noon to 8 p.m. at the Lancaster Farm and Home Center. Registration of $1 is payable at the door.

This day long event will feature demonstrations and displays from eight major sewing product companies.

In addition, extension home economists, sewing teachers, and other talented seamstresses will show how to make piping, make tote bags, sew T-shirts, apply sleeve plackets, work with plaids, sew with velour and terry, and much more.

Each person attending will receive a packet of educational materials donated by other home sewing companies. Sewing reference books will be given as door prizes.

Farm Women Societies

(Continued from Page C5)

Answer to roll call was to name our favorite museum.

Devotions were in the charge of Mary Swan.

Final plans were made for the Bus trip June 3.

Mrs. Wood & Mrs. Boaz gave a report of the Spring Rally which was held in York May 1st.

Mary Swan reported on the sewing at Lancaster General Hospital.

Plans were made for a picnic in Mrs. Brabson's yard June 28.

Helen Shaub, Grace Ann Ghose & Mary Trumble were appointed to make plans for the Anniversary Luncheon in August.

Lancaster Co. Society 28

Lancaster 28 met for a mother and daughter banquet at the Hershey Farms Restaurant.

Music was provided by David and Joanne Wenger. Our speaker was Mrs. Newcomer who presented her doll collection and spoke all about dolls.

Our next meeting will be held on Thursday, June 26 at Witmer's Greenhouses. Don Deiter will speak on house plants and foliage care.

York Co. Society 12

NEW BRIDGEVILLE — Friendly Society of Farm Women Group 12 met at the home of Mrs. Carl S. Bacon with 19 members and 2 guests attending.

A poem "Where There Is Love" was read by President Mrs. Donald Lanius. A prize was won by Mrs. Ruth Runkle.

Plans were formulated for the June meeting. The annual family picnic will be held June 24, at 12 noon at Long Level, featuring a covered dish luncheon.

The date for the annua York County Farm Wome picnic was announced, Jul 31, at Bair 4-H Center.

Following the meeting an refreshments served by th hostess, a plant sale wa held netting a profit of ap proximately $40.

(Continued from Page C6)

BAKED LASAGNE

1 pound ground beef
½ cup chopped onion
1 can tomato sauce
1 pint whole tomatoes
1 teaspoon salt
½ teaspoon pepper
¾ teaspoon parsley flakes
¾ teaspoon oregano
1 teaspoon garlic powder
1 teaspoon Worcestershire sauce
Mozzarella cheese

Cook lasagne as directed on the package and drain. Brown the beef and onion in oil and add the other ingredients. Simmer. Grate Mozzarella cheese, 8 ounces or more. Put the sauce on the bottom of the pan. Add the lasagna, sauce, cheese and end with the sauce. Sprinkle with Parmesan cheese. Bake at 350° F. for 25-30 minutes until hot and bubbly.

Mrs. Burnard Cline, Jr. Elkton, MD

STEAK ROLY POLY

1 cup freshly mashed potatoes
1 cup flour
1 teaspoon baking powder
2 tablespoons shortening
¼ teaspoon salt

Mix and add enough cold water to make a dough. Roll out to a 1 inch thickness. Spread the following mixture on the dough. 1 cup cold, cooked meat seasoned with onion, salt, pepper and moistened with gravy.

Roll up the dough making the ends even and put into a greased pan. Add ½ cup boiling water and 1 tablespoon additional drippings. Bake until rich brown, basting with gravy frequently.

Mrs. Ray Seidel, Lenhartsville

CHERRY PUDDING

2 cups cherries
1 tablespoon butter
1 tablespoon flour
1 teaspoon butter
1 cup sugar
½ cup milk
2 eggs
¼ teaspoon salt
1 teaspoon baking powder
1½ cups flour

For fresh cherries, add ½ cup sugar and 1 cup water. Cream the butter and the sugar. Add the other ingredients and beat well. Put the cherry mixture into a greased pan and pour the batter over them. Bake 30 minutes in a 350° F. oven. Serve with milk.

Mrs. John D. Martin, Ephrata

IMPOSSIBLE ALL-IN-ONE QUICHE

1½ cups milk
½ cup biscuit mix
6 tablespoons butter or margarine
3 eggs
pinch of salt
1 cup diced ham, turkey, chicken, bacon or shrimp
2 green onions, chopped
1 4-ounce can sliced mushrooms
1 cup grated sharp Cheddar cheese

Preheat the oven to 350° F. Put the first 5 ingredients into a blender. Blend well. Pour into a deep ungreased 9 inch pie pan or regular 10-inch pie pan. Add meat and poke into the batter. Sprinkle the top with onion, mushrooms and cheese. Bake 45 minutes or until golden brown. Let stand 10 minutes before cutting.

Mrs. Arthur Krall, Lebanon

NO-CRUST COCONUT PIE

2 cups milk
4 eggs
½ stick butter
pinch of salt
½ teaspoon vanilla
1 cup coconut
½ cup flour
1 cup sugar

Grease a 10 inch pie pan with butter. Put all ingredients into a blender and blend. Bake 15 minutes at 400° F. and 15 minutes at 350° F.

Junior Cooking Edition

We got a recipe in the mail from Amos Zook which didn't have the baking temperature listed, but perhaps some of you can figure that out. It seems like a good recipe nonetheless, so we are using it today. It's called Sunshine Pie and goes like this:

Home On The Range

(Continued from Page C9)

DILLED POTATO SALAD

12 small potatoes
2 tablespoons oil
2 tablespoons lemon juice
2 teaspoons salt
¼ teaspoon pepper
2 tablespoons chopped fresh dill
1 large cucumber, pared
¾ cup dairy sour cream
lettuce

Cook the potatoes until tender, about 15 minutes. Drain, peel and return the potatoes to the saucepan. Toss over very low heat 5 minutes to dry. Place in a large bowl. Combine the oil, lemon juice, salt, pepper and dill in a jar with a screw top. Cover and shake well. Pour over the potatoes and toss to cover. Cover the bowl and chill for at least 3 hours. Just before serving, toss the potatoes with the cucumber and sour cream. Line a salad bowl with lettuce. Fill with the salad and garnish with a sprig of fresh dill.

GREEN BEANS

3 tablespoons melted butter
3 tablespoons flour
1 teaspoon salt
¼ teaspoon pepper
1 teaspoon sugar
½ teaspoon grated onion
1 cup sour cream
2 12-ounce packages green beans, cooked
¼ pound grated Cheddar cheese
¾ cup corn flake crumbs

Mix thoroughly 2 tablespoons of butter, flour, salt, pepper, sugar, onion, sour cream and grated cheese. Add the green beans and put into a 2 quart casserole which has been buttered. Mix 1 tablespoon melted butter and the corn flake crumbs and put on the top of the casserole. Bake at 350° F. for 30 minutes. Serves 6.

Mrs. Stanley Saylor, Elizabethtown

A pound of patience you must find, mixed well with loving words so kind
Drop in 2 pounds of helpful deeds and thoughts of other people's needs
A peck of smiles will make the crust, then stir and bake it well you must
And now I ask that you try, a slice of my Sunshine Pie

Amos B. Zook, Age 6, Lititz

APPLE-RHUBARB CRISP

2 cups finely cut apples
2 cups finely cut rhubarb
2 tablespoons flour
1 beaten egg
¾ cup white sugar
¼ teaspoon nutmeg

Place the mixture in a glass baking dish. Combine
½ cup butter
1 cup flour
1 cup brown sugar

Mix to a crumbly consistency. Pack over apple-rhubarb mixture. Bake at 375° F. for 30 minutes. Serves 6.

Rachel Kuhns, Age 9, Greencastle

PUMPKIN PIE

4 cups pumpkin
2½ cups sugar
¾ cup flour
3 teaspoons cinnamon
¼ teaspoon nutmeg
¼ teaspoon ginger
6 eggs, separated
6 cups milk, heated
1 tablespoon vanilla
1 tablespoon salt

Beat egg yolks and sugar Add flour, spices and salt. Add heated milk slowly. Fold in stiffly beaten egg whites last. Pour into an unbaked 9 inch pie shell Bake at 425° F for 15 minutes and reduce oven temperature to 350° F and continue baking for 35 minutes or until the custard is set

Marian Glick, Age 10, Lewisburg

EGG NOG

1 egg
4 tablespoons sugar
2 cups milk
dash of salt
½ teaspoon vanilla
½ teaspoon nutmeg

Beat egg with mixer until fluffy Add sugar, milk, salt and vanilla Beat mixture again Sprinkle nutmeg on top Serves 2

Elvin Menno Yoder, Age 9, Meyersdale

(Continued from Page C10)

ICE CREAM LEMON PIE

2 egg yolks
½ cup sugar
1 teaspoon lemon rind
⅓ cup lemon juice
1 small can evaporated milk
2 egg whites stiffly beat

Beat together all the ingredients except milk and the egg white Add the beaten egg white to the first mixture. Add the milk Pour into a graham cracker crust and freeze.

Graham Cracker Crust

¾ cup graham cracker crumbs
1 cup brown sugar
3 tablespoons butter

Mix the crust ingredients together until crumbly, then pat into a pie pan.

Norleen N. Zimmerman, Denver

STRAWBERRY SHORT CAKES

4 tablespoons butter
½ cup wheat germ
1½ cups unbleached flour
1 teaspoon salt
2 teaspoons baking powder
¼ teaspoon nutmeg
1 tablespoon sugar
1 cup milk

Put all ingredients except the milk into a bowl and work together until they are very granular Stir in milk to make a sticky dough Make six equal mounds of dough on a lightly oiled baking tray Bake for 15-18 minutes at 450° F. or until brown and firm

Norleen N. Zimmerman, Denver

MARBLE CAKE

2½ cups flour
1½ teaspoons baking powder
1⅔ cups sugar
1½ teaspoons soda
1 teaspoon salt
1 square chocolate, melted
2 tablespoons hot water
¼ teaspoon soda
1 tablespoon sugar
¾ cup shortening
¾ cup sour milk
2 unbeaten eggs

Sift the flour, baking powder, sugar, soda and salt together. In a small bowl mix the chocolate, water, ¼ teaspoon of soda, and 1 tablespoon sugar. Stir shortening to soften. Stir flour mixture into the shortening, mixing alternately with the sour milk Add the unbeaten eggs and beat well Add the chocolate mixture to ¼ of the batter in the cake pans. Alternate plain and chocolate mixture, then with a knife, cut through the batter with a wide-zig-zag course Bake at 350° F until top springs back when touched lightly

Rosene M. Brubacker, Age 14, Ephrata

STRAWBERRY DELUXE PIE

4 cups fresh strawberries, washed and capped
2 tablespoons cornstarch
1 cup sugar
½ teaspoon baking powder
2 drops red food coloring
1 baked 9-inch pie shell

Spread 2 cups of berries over the bottom of the pie shell. Mash remaining berries in a pan. Add sugar, cornstarch, baking powder and mix well. Place on low heat and boil until clear and add the food coloring Cool and pour over the raw berries in the pie shell and top with whipped cream

Anna Mae Shirk, Age 8, Mifflinburg

STRAWBERRY PUDDING

1 cup marshmallows, small
2 cups fresh or frozen strawberries
1 3-ounce box of strawberry gelatin
2¼ cups flour
1½ cups sugar
½ cup solid shortening
3 teaspoons baking powder
½ teaspoon salt
1 cup milk
1 teaspoon vanilla
3 eggs

Sprinkle marshmallows on bottom of pan thoroughly. Combine strawberries and syrup with dry gelatin. Set aside. In a larger bowl, combine remaining ingredients. Beat 3 minutes at medium speed. Pour batter over marshmallows in pan and spoon strawberry mixture evenly over the batter. Bake at 350° F. for 45-50 minutes.

Irene Shirk, Age 12, Mifflinburg

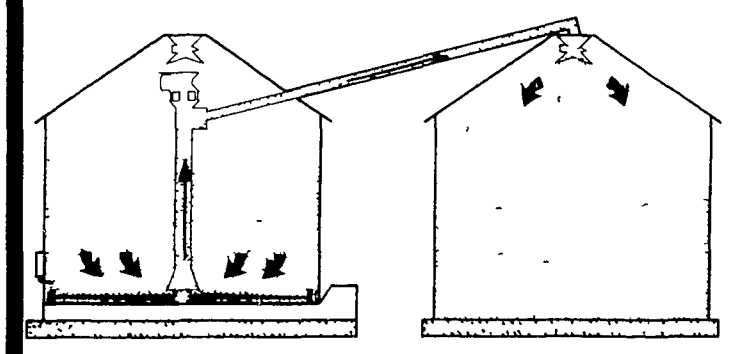
(Turn to Page C12)

GSI GRAIN BINS

MARTIN GRAIN DRYING SYSTEMS

Compare their unique features and advantages. Preserves grain quality, less shrinkage & stress cracks. Conserves energy, lower operating cost, from 3¢/bu. for 10 points. Both systems dry 35% moisture corn, requires no wet holding tank or babysitting. Both systems include a G.S.I. Drying Bin, in & out ladders, roof ladder, Cor-lok floor, steel floor supports, transition, fan & heater, ventilator cleaner, motorized spreader, unloading auger system with total enclosed motor, and freight to our warehouse.

MARTIN FLO-MOOR SYSTEM



2 STAGE CONT. or RECIRCULATING

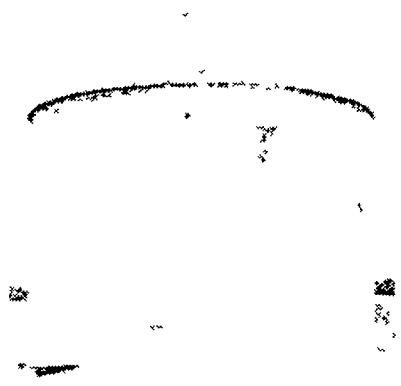
Includes Martin Electronic Moisture Control With Motor Starters.

- Drying capacity up to 12,600 bu./day
- 15 to 36 ft. diameter bins
- Operating temperature adjustable 90° to 160°
- Add wet grain as fast as you harvest. Large storage capacity for fast unloading.
- Twin tapered sweep augers unload faster
- Extra heavy gear box assures trouble free operation
- Automatic grain level shut-off
- Grain Cleaner removes trash for better drying

MARTIN LOW-TEMP SYSTEM

Batch With Low Temp. Control

Stirring Equip. Option



- Drying Cap. Up to 6400 Bu. Per Day.
- 15 to 48 ft diameter bins
- The only system with gas heat (up to 30°) backup to prevent spoilage
- The Martin Low-Temp Control monitors and automatically controls the temperature and the humidity The thermometer, hygrometer and monometer display operating conditions, thus eliminates all guesswork in the easy operating management.
- Built-in safety controls assure trouble free operation
- It operates automatically around the clock in sunshine or rain, heat or cold, without any babysitting or readjustments.

Cumberland to pick new dairy princess

Ann Basehore

Sharon Cornman

Pamela Friese

Nancy Kelso

June is dairy month

NEWVILLE — The thirteenth annual Cumberland County Dairy Princess Pageant will be held in the Big Springs High School Auditorium on Wednesday, June 18.

The program, open to the public, will begin at 8:00 P.M. with six area girls competing for the title of 1980 Cumberland County Dairy Princess. All are the daughters of dairy farmers and each is actively involved in helping on the family farm.

The master of ceremonies will be Scott Smith, a popular sports broadcaster from Shippensburg. Entertainment will be provided by the musical group "Chapter Seven." Door prizes are to be awarded at intermission and dairy refreshments will be served following the contest.

Karen Hornbaker, the 1979 Cumberland County Dairy Princess, will be present to crown her successor from among the following contestants:

Ann Basehore, 18, daughter of Mr. and Mrs. Donald L. Basehore, Mechanicsburg.

Ann is a 1980 graduate of Cumberland Valley High School where she was a member of the National Honor Society and has done much independent research in science. This fall Ann plans to attend Mont Alto Campus of Penn State University to study Dairy Science. She is also a member of the Silver Springs Presbyterian Church.

Sharon Cornman, 18, daughter of Mr. and Mrs. Creedin Cornman, Carlisle.

A 1979 graduate of Boiling Springs High School, Sharon is presently a secretary for the Cumberland County Agricultural Extension Office and holds the office of president for the Countywide 4-H Dairy Club. She is also a member of St. John's Lutheran Church, Boiling Springs.

Pamela Friese, 17, daughter of Mr. and Mrs. Henry Friese, Shippensburg.

Pam is a 1980 graduate of

Dairy princess contest

(Continued from Page C12)

Shippensburg Area High School where she was an active band member for six years and a member of the bandfront for three years. Some of her other activities include gymnastics club, varsity track, and games club. Pam has also been active in 4-H for three years.

Nancy Kelso, 18, daughter of Mr. and Mrs. Carl Kelso, Jr., Shippensburg.

Also a graduate this year from Shippensburg Area High School, Nancy plans to continue her education in September at Franklin County Vocational Technical School for Practical Nursing. She is also a member of the Mongul United Brethren Church.

Wendy Mains, 19, daughter of Mr. and Mrs. Richard G. Mains, Newville.

Wendy graduated last year from Big Spring High School where she was an active member of the band and bandfront as well as participating in such sports as basketball, volleyball and track. This year she is president of the Blue Mountain 4-H Dairy Club. Wendy is presently taking Early Childhood Education classes at Shippensburg State College.

Beth Shugart, 17, daughter of Mr. and Mrs. Nevin C Shughart, Mechanicsburg.

Beth graduated last Tuesday from Cumberland Valley High School. She has plans to go to work in the field of retailing which may include attending Harrisburg Area Community College. She also attends Faith Chapel Independent Church.

Judges for the pageant will be Karen Laughman, a York County dairy farmer's wife, as well as a former Dairy Princess Co-ordinator; Dieter Krieg, editor of Farmshine; and James Sumner, Director of the Bureau of Markets, Pennsylvania Department of Agriculture.

Roy Coover is general chairman of the pageant committee with Mike Berkheimer serving as vice-chairman. Mrs. Duane Duncan holds the office of secretary and Wayne Cohick is treasurer. Miss Peggy Foreman is the co-ordinator.

Committee chairpersons are Mr. and Mrs. Galen Smith, judges; Mrs. Robert Smith and Mrs. Alfred Gaisler, program and events; Mrs. Creedin Cornman and Mrs. Fred Potteiger, flower and gifts; Mrs. Paul Yorlets, refreshments; Wayne Cohick, finance; Paul Hornbaker, promotion; and Mrs. Mark Naugle, publicity.

On being a farm wife - And other hazards

Joyce Bupp

Some call him "farmer,"
But we call him "Dad,"
The most useful equipment
This farm's ever had

He's handy at milking,
For chopping and baling,
When weather is sunny,
Or snowy or hailing.

The cows are his first love,
Those big and those small.
He milks 'em and treats 'em
And cares for them all.

A machinery mechanic
He often must be,
To fix belts and weld parts
Sometimes hastily.

When bugs eat the hay fields
He turns entomologist;
And the grease on his face
Would defy cosmetologists.

"Just where is the 'boss'?"
Many salesmen will ask.
I shrug - keeping track of him's
Too great a task.

You might find him out
In the parlor or field
Or breeding a heifer
Or checking a yield

Up scaling the silo
To see if it's full,
Maybe fixing the fence
That was wrecked by the bull.

Those sixteen hour days
He just takes in his stride
Since they're spent on his farm-
His career and his pride.

Since he's really no trouble
No fuss and no bother.
We think that we'll keep him:
Our special farm father.

(And we wish him a happy Father's Day!)

Hunterdon County 4-H clubs

CHERRYVILLE HOMEMAKERS

A family night and fashion show program was held recently by the members of the Quarryville Homemakers 4-H Club for their families.

Modeling in the fashion show were: Ericka and Heidi Zipfel, Ruth Stehr, Cathy Pries, Shirley and Doris Lefebvre, Debbie Hughes, and Betty Benedik.

The narrator for the fashion show was Luise Zipfel, a leader of the club. Presentations were given by: Betty Benedik, The Sewing Box; Shirley Lefebvre, 4-H Winter Weekend Camp; Cathy Pries, Pattern Layout; Ruth Stehr, Pattern Envelope Back; and Ericka Zipfel, Clothing Construction Terms.

A special candy demonstration was presented during the program by Mrs. Arlene Johnson of "The Chocolate House."

Participating in the May 30 fashion show are Shirley and Doris Lefebvre, Cathy Pries and Ruth Stehr. Debbie Hughes served as club photographer for this event.

The members would like to wish Ruth Stehr the best of luck as she will be a participant in the State Presentation Contest to be held on June 26 at Cook College in New Brunswick, notes Betty Benedik, Club Reporter.

CRAFTY CREATORS

The Crafty Creators 4-H Club held their last cooking meeting at the home of their leader, Mrs. Nancy Bachardy, of Flemington. The members prepared a meal with ham loaf as the main dish.

Plans were also discussed for the August 6 to 9 4-H Achievement Fair and the 4-H Clothing Judging, set for July 10 at the Extension Center.

A special craft will be made by the members at their next meeting, to be held at the home of another leader, Mrs. Lee O'Conner in Flemington, reports Ruth Tannahill, Club Reporter.

Recipe Swap

Today's swap column is a little like life. We have lots of questions and no answers. So why not take some time to read through the questions today and mail your answers to: Recipe Swap, **Lancaster Farming**, P.O. Box 366, Lititz, PA 17543.

QUESTION: I would like some recipes for making skinless oven-fried chicken using mainly salt, pepper and seasoning.

If you *are not* in the market, still compare, you'll appreciate the product.

Henry O. Wampler

Ida's Notebook

Ida Risser

There are just too many things to do this month. The rain not only makes the vegetables grow but also the weeds in my garden. I should be out there hoeing instead of writing this but I suppose they'll wait a bit longer.

As I pass the iris bed (my daughter sent them from Portland and the flowers were huge and varied), I pause to pull some tall grass along the edge. Hurriedly I throw the weeds over the meadow fence and rush for another bucket to pick the balance of the sugar peas.

In the Winter people say, "Call me when the peas are ready", but when I do, they are too busy to prepare them.

The pork roast and potatoes should be put in the oven. And, I know my husband would appreciate some shortcake to go with the strawberries that I've just picked, so I start the meal a little earlier than usual.

The program for our 4-H Community Club should be planned and typed. But there are many phone calls before everything is finalized. Oh yes, Cindy would like me to type her "story" for the 4-H Blue Form and it is late at night. When I discovered that I'd typed two lines on the rubber roll of the typewriter and now had to retype the whole page, I knew it was time to give up and go to bed.

Of course I'm not the only one who is busy. The men got the corn planted late due to the wet weather, a newly paved lane that we couldn't drive on and a lot of manure to haul. And don't forget the stones to be picked up and several fresh cows all the same day.

Then of course something always breaks and I'm sent for a bearing, a seal, a bracket, etc.

I'm looking forward to a breather although I have no idea when that might be unless driving our daughter and new grandson to New York could be considered one.

York to test home canners

YORK — If you own or borrow a pressure canner and it is the type which has a pressure gauge with numbers you read, it should be checked for accuracy each season. Pressure canners having only a weighted gauge do not need to be checked.

The York County Extension Service will provide a free test service for canners on: Tuesday, June 17, 12 noon to 2 p.m., at the Red Land Community Bldg., St. Paul's Methodist Church, Newberrytown; and on Thursday, June 19, 1 to 4 p.m., at the Extension Office, Pleasant Acres, York.

No appointment is necessary — takes about five minutes. Bring the lid only as the pot is not needed.

Is Your Hot Water Heater Going Bad?

DARI-KOOL THERMA•STOR III IS THE ANSWER

WHAT IS THERMA•STOR III?

It is a Heat Exchanger and an Electric Hot Water Heater Combination.

The Therma•Stor Section takes the heat from the bulk tank compressor. Instead of blowing heat into the air, it goes first to the Therma•Stor and transfers the heat over into the water.

The Hot Water Heater Section is an electric element in the top section which heats your hot water all the time when compressor is not running.

Lancaster Farming goes to Lancaster County Winery

BY PAT KAUFFMAN

WILLOW STREET — Housed in a converted bank barn, Lancaster County Winery is a perfect place to visit when your time is limited.

In this the second day-tripping article, **Lancaster Farming** visits the new owners and tours this winery located in the rolling hills south of Lancaster.

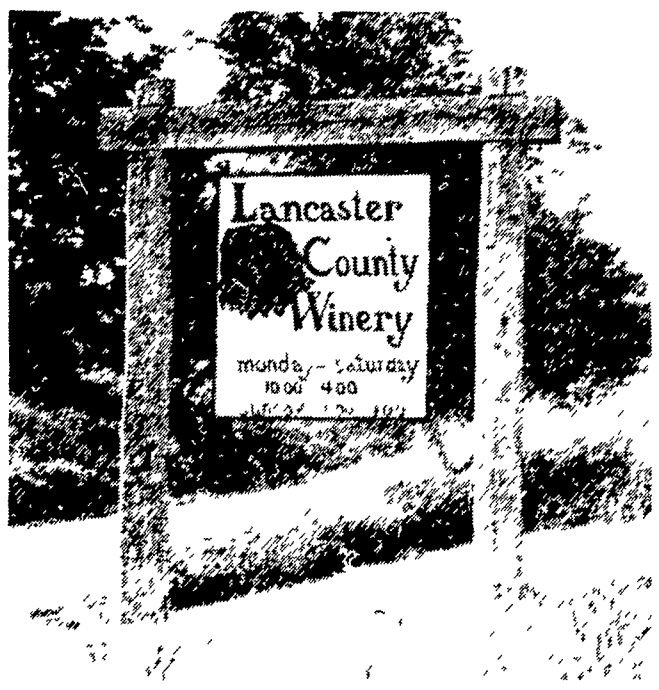
Lancaster County Winery is owned by Suzanne and Todd Dickel. They with the help of their children, Edward, 14 years old and Lynne, 10, devote much of their free time to the project. In addition, they have a full time vineyard manager and a fulltime winemaker.

Visitors to the winery enter the upper part of the barn where the wine-tasting, party and display areas are located. Rustic beams, tobacco lathe lattice work, and a spacious wooden bar are attractive and inviting.

In the sales area, the wines produced here are housed in attractive wooden wine cases and accessories and small local gift items are displayed for sale.

Visitors are given a tour of the lower part of the barn where the crushing, filtering and storage equipment is located. There in the cool cement-floored wine cellar, the process of harvesting and clarifying the grapes unfolds.

Last year, the first for the owners, they harvested 35 tons of grapes. Using 8 people dawn-to-dusk. They managed to harvest 4 tons per day during the peak of their harvest.



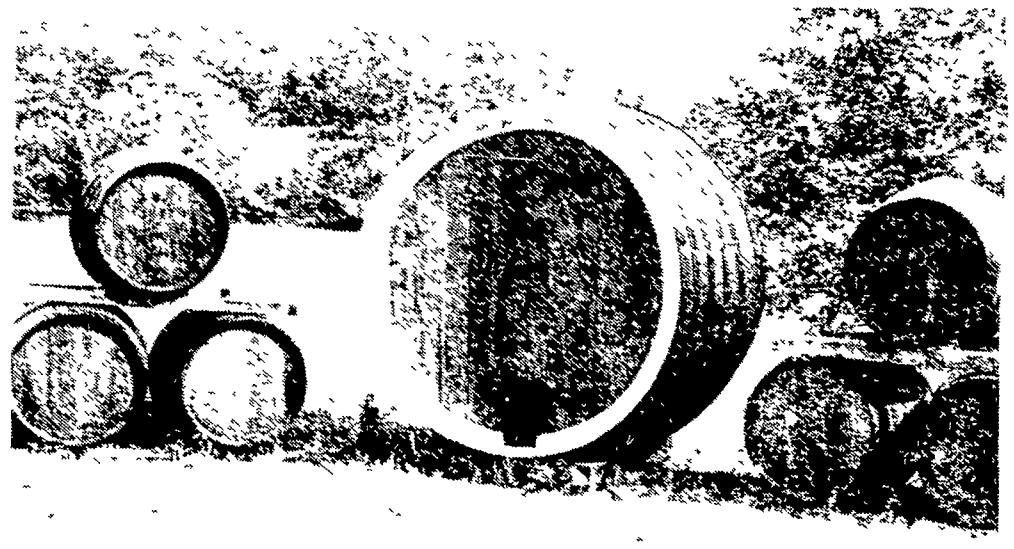
The sign in front of the winery clearly states their hours and uses the red rose logo that goes on all their wine.

Acres of grapes cover the farm providing a pleasant place to browse when visiting the winery.

With the help of Arnold Lueck, the county agent, and Carl W. Haeseler with the grape research laboratory in Northeast Pennsylvania the Dickels have attempted to bring the vineyard into stronger production. They have hopes this year of harvesting 50 tons of grapes.

Bulk milk coolers, familiar to dairymen are used as storage areas for the musk. They have an added feature the new owners like,

(Turn to Page C18)



Some of the heavy oak barrels that were once used at the winery are still on display. When using the barrels, it is necessary after each batch for a man to crawl through the hole shown (about the size for a cocker spaniel) and scrub out the interior.

Winery

(Continued from Page C17)

the agitators are particularly handy for mixing the flavors into the specialty wines.

When harvest season begins, it's hectic. The grapes are picked, stemmed, crushed and pressed all in one day to get the maximum flavor from the musk. The skins are returned to the fields as fertilizer. Fermentation lasts for 3 weeks.

A 500 gallon tank holds enough wine to fill 2500 bottles of wine which then are hand capped, foiled and labeled.

The winery had contained heavy oak barrels when the Dickels purchase . it, but they have been replaced by stainless steel. The family found the people in the Lancaster area didn't appreciate the heavy oaky taste the wood barrels produced. They prefer the lighter, fruitier taste produced by housing the musk in the stainless steel vats.

The wine is bottle aged for 6 weeks. It needs this time, Suzanne says because it gets bruised during the bottling process.

Following the tour of the cellar, the visitors are invited to sample the wines produced. Suzanne takes time to answer questions about the various wines and to explain their uses and the temperature they are most commonly served.

Varieties available for sampling include White Chablis, Pink Chablis, Red Burgundy, Aurore, Colonial Red, Colonial Sauterne, Niagara, Concord and Colonial Spiced Apple.

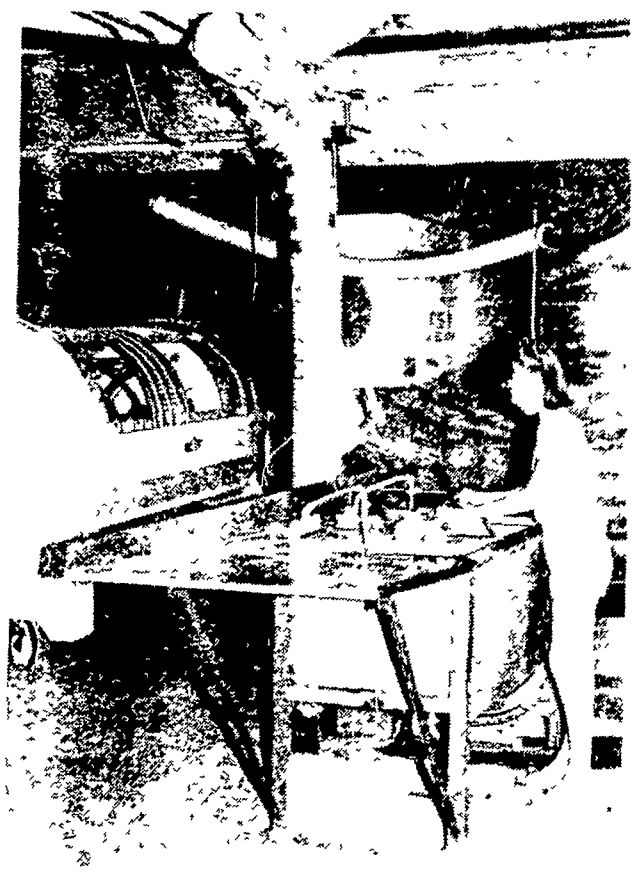
Visitors are encouraged to hike the grassy trail leading to the vineyards and view the grapes as they progress through the season. All in all, it's a relaxing way to spend a couple hours.

Visitors are welcome on a drop-in basis anytime during the business hours of Monday-Saturday 10-4, or Sunday 1-4, but more time is available for personal attention if the visit doesn't conflict with group tours. And for groups of 15 or more, they ask that you give them some notice.

The tours and tastings are free. They also have available wine-tasting parties both at the winery and catered for organizations.

To reach the winery, take Route 272 South from Lancaster and turn West on Baumgardner Road. Then follow the signs. They are closed holidays, and the tours are conducted from April through November.

For more information, call Lancaster County Winery 717/464-3555.



Lynne Dickel spends evenings and weekends helping out in the business. From labeling bottles to general cleanup, she toils away on hot afternoons in the coolness of the wine cellar.

Egg industry prefers natural sets

UNIVERSITY PARK — The hatching egg industry has stopped using water and chemical detergent sanitizers to wash eggs prior to setting them in the incubator. Each year over a million eggs are set 'as is' according to Herbert Jordan, Extension Poultry Specialist.

After 40 years of washing eggs in water and several chemical detergent sanitizers, hatchery managers insist eggs for incubation be produced clean and set 'natural' with use of no water or chemical detergent santizers.

The mother hen places natural enzymes in the egg to protect the tiny embryo from invading microorganisms.

Automatic

ELECTRIC FEED PROCESSOR

(Automation Mill)

Process and blend 3 or more Ingredients at one time!

(1) Control center (Type III timer system) predetermines and records amount of feed grain (2) Bin Switch regulates input auger, automatically controls grain level in hopper, (not visible); (3) Automatic scale meters preset amount of grain through roller mill, operates automatically and continuously without power, (4) Automatic Roller mill with fast-roll attachment rolls grain, (5) Dial-controlled variable speed augers in electronic meter let you add protein, mineral or medication into mixing auger, (6) Mixing auger mixes and delivers processed feed to take-away auger Supply auger and mill processed preset amount of grain; (7) Accessory hopper with flow switch.

Note: The Automatic Dump Scale and feed metering units may be gravity fed from overhead bins or hoppers. Flow-control switches are required if input augers are used in place of gravity flow.

EAR CORN UNIT

Automatic's ear corn unit handles wet, shucky and even frozen ear corn. The crusher unit shreds the cob followed by rollers that crack the corn, producing a flaky, dust-free feed for greater digestibility. The hydraulically driven intake auger swings to the rear for transport and may be operated at any angle from rear to side

Dust-free rolled grain is more palatable, easier to digest, eliminates wheezing and many digestive disorders.

Big 11" tilting discharge auger with 10 ft reach swings down for slant or horizontal delivery

Hydraulic-driven intake auger swings to rear for transport position May be operated at any angle from rear to side

Top heifer brings $3500 at New Holland sale

BY CURT HARLER

NEW HOLLAND — Woodson Rorae Yoho Elvera II, a daughter of Round Oak Rag Apple Elevation, was the top selling cow at the New Holland Sales Stables' annaul registered Holstein Heifer Sale.

Elvira, out of Woodson Yoho Ivan Yvera was sold for $3500 to Raymond Smucker of Narvon.

Elvera was owned by David B. King and Robert Todd, both of Lancaster. King breeds cattle under the Lanc-View prefix.

King and Todd had another Elevation daughter who also sold for a good price. That was Woodson Rorae Samson Ida who brought $2650 from W. Engelbrecht of Iowa.

Second high seller was another Elevation daughter who sold for $3250 to Bill Thornton of Arkansas.

A yearling heifer by Whittrer Farm Apollo Rocket out of Navasota Matt Astro Cristina brought $1800 from Oxford Farms. Oxford Farms purchased more cattle than any other single buyer.

The yearling's dam had records of 17,930 pounds milk and 720 pounds fat with a 4.1 percent test as a three year old.

Tracing as far back as the granddam her pedigree

(Turn to Page C21)

Top selling animal in the New Holland heifer sale Saturday was Woodson Rorae Yoho Elvera II, at right. She sold for $3500 to Raymond Smucker, Narvon. Her stablemate, Woodson Rorae Samson Ida, left, sold for $2650 to W. Engelbrecht, of Iowa. Both cows are daughters of Round Oak Rag Apple Elevation. At the halter is Robert Todd who is co-investor in the animals with David B. King, Lancaster.

Among the younger registered animals sold at the Saturday New Holland Registered Holstein Heifer Sale was this October, 20, 1979 calf out of Lead-Dale Lucky Betty by Glendale Arlinda Chief. She sold for $1550 to Oxford Farms.

Russinwood Star Nonnie, a daughter of Glen Valley Star out of Russinwood Fond Nanette, sold for $2000. Her grandsires include Pennstate Ivanhoe Star and the great Osborndale Ivanhoe.

Bright Meadows Elevation Mona, a 10-month old, sold for $1225 to Oxford Farms, one of the more active bidders at the sale.

New Holland sale

(Continued from Page C20)

shows records to 18,610 pounds milk and 765 pounds fat.

A calf, born October 20, 1979, went for $1550, also to Oxford farms. The calf was a daughter of Glendell Arlinda Chief.

The calf's dam is Lead-Dale Lucky Betty, a cow with records showing a high butterfat percentage, and a Very Good rating as a four year old.

In all, 314 animals were sold at auction. Calves and yearlings brought between $250 and $1550.

Bred heifers and springers brought between $1300 and $2550 on the average.

The sale was well attended with buyers listed from New Jersey, New York, Virginia, Minnesota, Indiana, Georgia, Arkansas and Pennsylvania.

Capons need managing

UNIVERSITY PARK — Caponize a 21-day-old cockerel chicken and it becomes fragile to raise, gets sick quicker and takes close managing to get a Grade A capon carcass to market, according to Herbert Jordan, Extension Poultry Specialist.

Capons require close care the first six weeks of life and hospital-like during the time of surgery.

Three critical things to remember in growing and marketing capons are:

—A market must be established for all the birds at least a month before they are sold. Each bird must bring $1.40 per pound of dressed carcass to make the maximum net income.

—After surgery, all capons must be watered, fed, and cared for in a manner that they stay healthy and gain steadily. If capons get fat too early they will "go down on their legs", sit on their breast and develop breast blisters and twisted legs. As a result, the carcass will be downgraded to Grade B. Keep capons healthy and trim until 2-3 weeks before slaughter, then fatten them.

—Finally, capons only do well if they are a roaster cross. Broiler crosses do not do well as capons. So select the right genetic potential when buying a bird.

THE MACHINES FOR ALL REASONS

Adams County to hold dairy princess contest

BIGLERVILLE — Adams County will hold its 13th Annual Dairy Princess Contest on Saturday, June 14, 1980, at the Biglerville High School, North Main Street, Biglerville, at 8 p.m.

The reigning Adams County Dairy Princess Christine Gitt, daughter of Mr. and Mrs. Robert E. Gitt, R2, Littlestown, will crown her successor.

Six Adams County dairy farmers' daughters have entered the contest.

They are: Sherri L. Kaltreider, daughter of Mr. and Mrs. Robert L. Kaltreider, R. 2, York Springs, Debra A. Lauchman, daughter of Mr. and Mrs. Howard H. Lauchman, R. 1, New Oxford; Ann R. Murren, daughter of Mr and Mrs. Thomas R. Murren, R. 4, Hanover; Gail Smith, daughter of Mr. and Mrs. Glenn E. Smith, R 1, Aspers; Karen E. Sprague, daughter of Mr. and Mrs. Roger L. Sprague; and Joyce Zepp, daughter of Mr. and Mrs. Norman H. Zepp, R. 2, New Oxford.

All are interested in promoting milk and other dairy products and representing Pennsylvania's number one agriculture industry.

The Master of Ceremonies will be Alan Bair, Director, Member Services, for Atlantic Breeders Cooperative, Inc., 1575 Apollo Drive, Lancaster.

Judges will be: Miss Connie Harness, Chief, Promotions Office, Commonwealth of Pennsylvania Department of Agriculture, 2301 North Cameron Street, harrisburg (and a former Miss Pennsylvnia); Thomas Dum III, dairy farmer, R. 1, Loysville; and Richard M. Smith, Branch Manager, Production Credit Association, 183 Lincoln Way East, Chambersburg.

The Note Blenders, a local barbershop quartet, will provide the entertainment. Vincent W. Lobaugh, R. 1, Aspers, will be pianist for the contest. This year's theme is that of an ice cream parlor — complete with music and stage setting.

Adams County is one of approximately 45 counties in Pennsylvania that has a contest of this kind. The local winner will join othe rprincesses July 13 to 16, 1980, to attend the Dairy Princess Training Seminar where they will receive many instructions concerning the state contest.

September 22 and 23, all will compete for the title of Pennsylvania Dairy Princess at a pageant sponsored by the Atlantic Dairy Association in Harrisburg.

On Sunday, June 8, 1980, the contestants, their parents, and committee members will be entertained at a luncheon at the farm of Mr. and Mrs. Robert E. Gitt, R. 2, Littlestown.

Cindy Zepp, R. 2, New Oxford, and Dawn L. Bodenberg, R 4, Gettysburg, are the co-chairpersons of this event which is sponsored by the Adams County Holstein Association in Harrisburg.

On Sunday, June 8, 1980, the contestants, their parents, and committee members will be entertained at a luncheon at the farm of Mr. and Mrs. Robert E. Gitt, R. 2, Littlestown.

Cindy Zepp, R. 2, New Oxford, and Dawn L Bodenberg, R. 4, Gettysburg, are the co-chairpersons of this event which is sponsored by the Adams County Holstein Association and Adams County's dairy farmers and agribusinesses.

Rehearsal for the contestants will be held on Friday, June 13, 1980, at Biglerville High school at 7:30 p.m.

The public is cordially invited to attend the contest on Saturday night, and; following the crowning, refreshments featuring dairy products will be served.

Farm museum to sponsor rural crafts show

HAVRE DE GRACE, Md. — Steppingstone Museum, a farm complex in Harford County, Maryland, and arranged as a turn-of-the-century rural home and crafts shops, will present its tenth annual Old-Time Arts and Crafts Festival on Saturday, June 21, 10 a.m. to 5 p.m. and Sunday, June 22, noon to 5 p.m.

The museum, a non-profit organization, staffed by volunteers, is dedicated to the historic preservation of our country's past. It is located on a picturesque hillside, overlooking the Susquehanna River State Park, near Havre de Grace.

Fifty artists and craftpersons will demonstrate and exhibit such old-time crafts as spinning and weaving, quilting, rug hooking, broom and shingle making, chair caning, soap making, basket weaving, slate scrimshaw, pottery making, tinsmithing, woodworking, various kinds of needlework, artists painting on all types of media, to name only a few.

The blacksmith shop will be ablaze when the "smithy" will create old-time items needed from that craft.

Members of the Steppingstone Museum Association will be on hand to guide visitors through the buildings where they may view the thousands of artifacts of the outstanding collection of craftmen's tools in the shops of the copper, leatherworker, woodworker, tinsmith, and others, and also see home appliances, fine handwork, dolls and toys of the past century.

Entertainment each day will be Square Dancing, Barbershop and Bluegrass Singing, a German Band and other events.

To reach Steppingstone, take Md. Rt. 155 to Earlton Road and follow the signs to the Museum on Quaker Bottom Road. Donation is $1 for adults, 25 cents, children.

CECIL DAIRY SERVICE SALUTES FARMERS FOR JUNE DAIRY MONTH

DE LAVAL
HERD MASTER PROGRAM

The ultimate and total automation of the dairy farm Probably no other type of farming has a greater need for automation than does the modern dairy operation. Each day of the year tons of feed must be moved. A large amount of waste disposed of and thousands of pounds of milk handled Good management is made all the more difficult by variations in the work load (which becomes intent during milking hours) and the pressures of operating according to tight and inflexible schedules It is easy to understand why the dairy farmer has always been so quick to adopt new and better ways of running his complex business It is also easy to understand why the busy dairyman has always preferred DeLaval Equipment For more than 100 years DeLaval has always been the supplier that has made the major break through It was the very first company to offer the cream separator, commercial milking machines, pipeline systems, automatic washing equipment and now a new innovative feeding system Each has made the dairy farmers day more efficient and his life easier

Now in the tradition of DeLaval leadership
comes the announcement of the boldest
concept ever

THE HERDMASTER SYSTEM

It's goal is nothing less than total automation of the dairy farm

The majority of dairymen would agree that getting the right nutrition to the right cow at the right time is their single biggest concern
This is precisely the challenge the

RATION MASTER MODULE

is designed to meet
You are now able to feed every cow in the herd the exact ration she needs for optimum milk production, reduced labor, more milk, less wasted feed, healthier cows, shortened calving intervals These are some of the reasons why the new DELAVAL RATION MASTER MODULE belongs on your dairy farm

Mr J B Osborne and Mr Larry Coale from Cecil Dairy Service have attended the training school on installation and service of the RATION MASTER to qualify us as the only dealer in this area to sell and service this unique system of feeding cows

We are happy we can sell and install such fine merchandise It doesn't matter what milking system you already own, we can custom install this on your dairy farm as long as you are loose housing your herd
For more details and information contact

The Milk Check

TOM JURCHAK
County Agent

Wrong Direction

It would seem that the government was selling dairy products instead of buying them because the Minnesota-Wisconsin price series went in the wrong direction last month.

After gaining 24 cents in March in anticipation of the new support price, it increased nine cents in April to $11.68 with the help of CCC purchases of 55 million pounds of butter, 61 million pounds of powder and 11 million pounds of cheese.

In May CCC purchases were even higher, going to 60 million pounds of butter, 88 million of powder and 27 million of cheese. In fact they were the largest since 1971.

In four months this year, the government has bought the equivalent of nearly three billion pounds of milk. That's a third more than all the purchases in 1979.

In spite of all this, the M-W price dropped two cents in May to $11.66, reflecting the amount of milk coming to market and being diverted to butter, powder and cheese.

At $11.66, the M-W is still miles away from the support price of $12.07 even though cheese and powder prices are within a cent of the support prices and butter is lagging by 3.7 cents.

That 24 cent jump back in March will give you a Class I price of $13.84 for May in Order 2. That's 24 cents better than April.

Your Class II price will be $11.54. That's five cents less than last month.

Your Louisville Plan take out will increase 10 cents over April to 40 cents for May. So in spite of a much better Class I price, you had better look for another blend price below $12.00, especially if your Class I utilization drops below 40 percent.

Lessons to Learn

There are certainly lessons to be learned from the $500 assessment of Eastern Milk Producers' members to cover the $2 million in losses suffered by the co-op when five proprietary handlers went through bankruptcy.

Everyone should realize that the dairy industry is a high volume, big money, slow paying business and handlers (or co-ops) can lose millions in no time at all. Constant vigilance by everyone, including producers, is needed to avoid big problems.

Part of Eastern's problem is collecting the money, is owed by the New York state security fund. Because of all the bankruptcies, the fund is getting low. Payments to producers and co-ops are taking much longer. Some may have to wait for new revenues to replenish the fund.

But expenses continue and producers pay.

The first lesson is to try harder to get a security fund in Pennsylvania to cover our producers more adequately.

Another lesson may be to take a harder look at both states to see what may be needed to make a fund more effective.

For those who are interested, it may be the example needed to get two cents a hundred in the pot instead of one cent. It may also make the Pennsylvania promise of 75 percent payment when the fund is low look pretty good compared to some zero payments in New York.

Certainly something is better than nothing — in Pennsylvania or New York. I don't think there's anything wrong in learning from someone else's problems.

Penn Manor 4-H meets

MILLERSVILLE — Election of officers filled the recent meeting of the Penn Manor 4-H Club.

This year's president will be James Stauffer. Backing up the president will be Melissa Greider, the new vice-president.

Jodee Worry is the Penn Manor Club's new secretary, and Virginia Smith is the new treasurer.

Other officers elected for the year include: Debbie Martin, news reporter; Yvonne Eshelman, song leader, with Melissa Greider and Debbie Martin assisting; and Mary Anne Beale, Tom Charles, and Oliver Smith, game leaders.

The members were reminded that Tuesday, June 17 is Fun Night.

Looking ahead, it was announced this year's round-up will be held Thursday, August 14. It will begin at 6 p.m. at Safe Harbor Park.

Two great offers on new Case agricultural tractors

CASH REBATES UP TO
$5000
OR
4% A.P.R. FINANCING PLUS CASH REBATES UP TO $2500

For a limited time only take your choice of two special incentive plans for buying a new Case tractor *now*

Cash rebates up to $5000 00 or 14% A P R financing *plus* cash rebates up to $2500 00

14% A.P.R financing plus rebate: You will be offered 14% Annual Percentage Rate(A P R) financing on your new tractor purchase, plus the generous rebate indicated at right for each eligible model, if your tractor is financed with J I Case Credit Corporation NOTE This special rate does not apply in Montana Arkansas, Washington and West Virginia

Offers available at participating Case dealers

Eligible Models (new units)	14% A P R plus rebate	Rebate only
885 990 995 1210 1410	$1000	$2000
2090 2290	$1500	$3000
2390 2590	$2000	$4000
4490 4690 4890	$2500	$5000

Your rebate check will be sent direct to you from the Case Company or, you can apply the rebate towards your down payment NOTE Government Agencies/ Departments do not qualify for rebate

Models 885, 990, 995, 1210 and 1410 14% A.P R up to 36 months
Models 2090, 2290, 2390, 2590, 4490, 4690 and 4890 14% A P R up to 48 months

both new tractor offers valid

May 1, through June 30, 1980

Example of special 14% A.P.R. financing on purchase of new selected Case tractor:

Cash price of tractor	$47 500
Down payment cash and/or trade in	9 500
Amount to be financed	$38 000
Annual Percentage Rate	14%
Number of payments	four
Due dates/periods payments	Ends of 12 24 36 and 48 months
Amount of each payment	$13 041 78
Finance Charge	$14 167 12
Total of payments	$52 167 12

Special waiver of finance charges on all used agricultural tractors.

If you buy a used agricultural tractor of any make from a participating Case dealer and finance it through J I Case Credit Corporation we ll waive finance charges for six (6) months from date of purchase Offer valid on tractors purchased during the period of April 1 1980 through June 30 1980

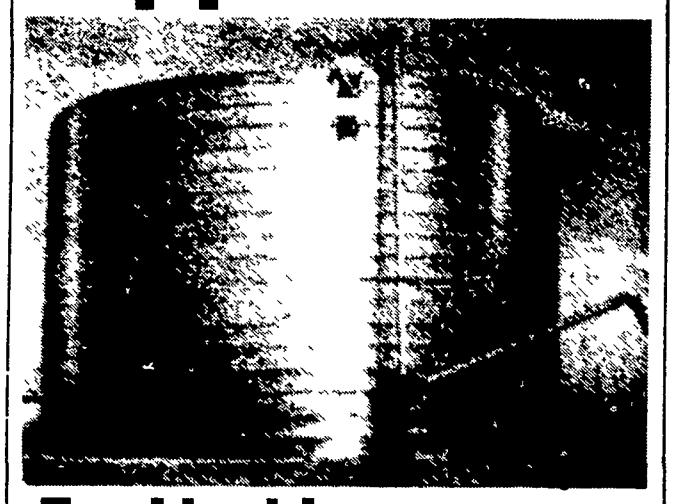
Lipp.



For Liquid Manure Storage.

Unique construction methods mean Lipp builds unique manure tanks—in fact, the strongest tank on the market today

We roll our tanks upward on location from coils of steel and seal the coil edges with a unique double-fold lock seam The result is a boltless, smooth inner wall tank in 12 to 90 foot diameters and up to 900,000 gallon capacities Interiors can be epoxy or Black Klad with aluminized or galvanized exteriors And construction is quick

We're Lipp We're different and we're better Storage is our specialty Call or write today and get more details on the strongest manure tank available

Broilers teach college students it ain't easy growing birds for profit

NEWARK, Del. — The University of Delaware's new teaching broiler house here got its first use this Spring as members of the honorary fraternity, Alpha Zeta, raised 1000 chickens in it for a fund-raising project to benefit the College of Agricultural Sciences.

The students involved came away from their first venture into commercial type broiler production with a healthy respect for any chicken farmer who manages to stay in business on a profit margin of one cent or less per bird.

In spite of a lot of hard work, good management and generous industry support, they barely broke even, reports Paul Meckley, one of their faculty advisors.

He says profits were down largely because of disease problems of the sort common in new broiler houses. These were anticipated.

In fact, there's even a term used to describe this kind of production set-back — "new house syndrome."

Actually, because of the problems they encountered, the pledges probably learned a lot more than they would have under normal conditions, notes Meckley.

When sick birds were removed from the flock, students took part in the necropsies. This way they could see just what conditions like air sac and Gumboro disease do to an animal.

Other than the expected disease outbreak, Meckley and poultry farm supervisor Bob Alphin, Jr., say the students did a great job managing their flock.

Ag engineering student Eric Tschantre measures relative humidity in U of D's new teaching broiler house as part of special problem aimed at helping reduce ammonia build-up during poultry production.

Between 15-20 pledges (most of them sophomores) worked with the birds under close supervision of senior AZ member Eric Tschantre. Chicks were placed in the house March 3.

Pledges were required to check twice a day to be sure automatic feeding and watering equipment was operating properly, and to monitor birds' general condition

PASTURE NUTRIENT BALANCER

As you know good pasture provides an excellent source of protein during the spring and summer months. In fact, lush green pasture may be as rich in protein, on a dry basis, as corn gluten feed or brewers' dried grain Occasionally, some persons become so enthusiastic about the nutritive merits of pasture that they conclude it is fully the equivalent of a protein-rich concentrate. This is a considerable exaggeration.

In two important respects the best of pasture differs decidedly from a high-grade concentrate ration This is in the percentage of fiber (fiber is undigestable and has no feed value) and consequently in the TDN or net energy. Lush pasture will usually contain 18 to 20 percent fiber compared to approximately two percent fiber in ground corn (when both are dried to the same dry matter content.)[1] Since it is impossible to balance rations for grazing animals, energy, vitamins and minerals should always be made available. To insure that the animals nutrient requirements are met during these upcoming months, we recommend that you consider MOPRO 16% Liquid Protein fed free choice

MOPRO 16% Liquid Protein is a High Energy Feed which has been specifically designed to economically carry more cattle per acre while increasing gains on pasture without grain. Our stable guaranteed vitamin and mineral package has proven helpful in the prevention of pinkeye, thrush, and ringworm while improving general herd health and conception rates Good pasture along with MOPRO 16% Liquid Protein supplies the most economical feeding program for grazing animals during the growing season

Broilers teach

(Continued from Page C24)

Ten days later they vaccinated them. And on April 25, the students got up at 1 a.m. to catch and deliver the finished broilers to Millsboro for processing.

All but 250 of these were sold to the processor. The rest (500 halves) were brought back to Newark and barbecued the next day for sale during Ag Day - an annual student-sponsored community event at the college.

During the grow-out operation Tschantre, an agricultural engineering major, monitored temperature and ventilation systems as part of a special problem he undertook for academic credit. For this he recorded variations in temperature, humidity, and ventilation rate. Twice a week he also took litter samples from several parts of the house and tested these for nitrogen and moisture content.

Purpose of this special problem was to determine what conditions inside a broiler house cause release of nitrogen from fecal material into the air as ammonia gas. Ammonia is a critical problem in the field because of it snegative effect on broiler performance.

Data collected by Tschantre may give researchers in the department of agricultural engineering a better idea of the way environmental conditions must be managed in order to reduce ventilation costs.

This first student venture in the new house received a lot of industry help. Chicks were donated by Purdue, Inc.; feed was provided at less than cost by Southern States; and Townsends, Inc., provided the processing for a nominal fee. Beyond that, a lot of other industry money went into providing the facility itself.

The 2200-bird house was built last Winter with funds provided by a $6,000 grant from the Merck Company Foundation. Construction was done at cost by Sam Yoder and Sons, Greenwood builders specilizing in farm structures. The bulk feed bin, auger type feed systems, automatic watering troughs, brooder stoves, fans and other equipment were donated by Bunting and Bertram, a Frankford dealership.

Now that the new facility has had a trial run, it will be used to teach an undergraduate course in poultry management in the department of animal science and agricultural biochemistry.

Meckley and other faculty members feel that the teaching unit can greatly increase student interest in poultry production at Delaware. "I see the house as providing an opportunity for students to learn poultry management and at the same time gain an appreciation of the economics of farming," he says.

At least half of those involved in the recent AZ project were animal science majors. But though a few had had some experience raising chickens on a farm, none had had previous exposure to a commercial type broiler operation.

"We get a lot of students in the college now from urban backgrounds," explains Meckley. Now they'll have a chance to work directly with birds under actual production conditions.

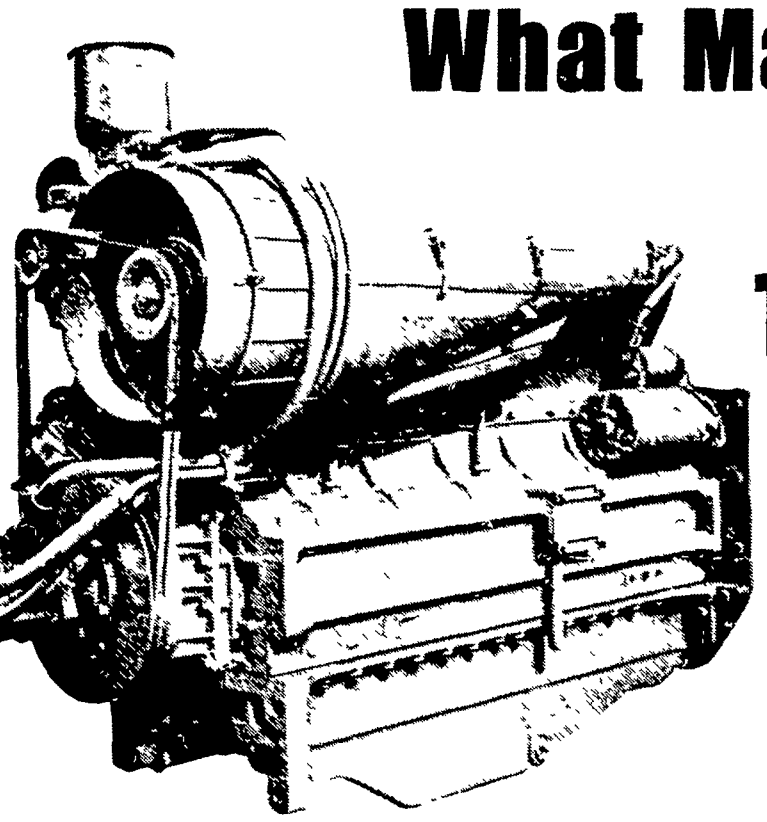
"You can grow a broiler from day one to processing in just seven to eight weeks — a perfect time block for a 12-14 week semester. This permits students to do advance planning, produce and sell the birds, and still be able to evaluate the results.

"This makes it a tremendous learning opportunity. And there's always a chance for more individual special problems like Tschantre's."

One reason for all the generous industry support for the new teaching unit, of course, is the fact that it can provide much needed practical experience for young people who may later seek jobs in poultry production. This increases their value as employees at the same time that it increases their own competitive advantage in the job market.

Students prepare to vaccinate first flocks of chicks to be raised in U of D's new teaching broiler house. The Newark facility will be used to teach poultry management.

What Makes SAME Tractors Better?



The SAME Air-Cooled Diesel Engine

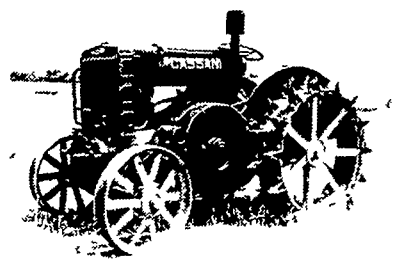
2, 3, 4, 5, or 6 cylinder inline diesels provide 35 to 140 h.p for the 21 models of SAME 4 WD and 2 WD tractors.

These fuel-efficient engines have double (air and oil) cooling systems and have direct fuel injection from camshaft operated pumps for easier starts, reliable performance and lower fuel consumption (up to 40%)

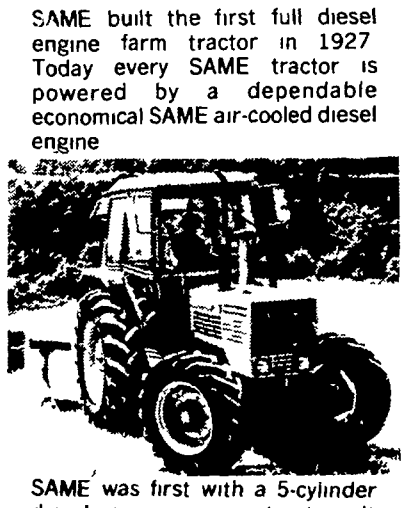
Being air-cooled, there is no radiator, hoses, thermostats, water filters . no water pump, no anti-freeze . no boiling, no freezing . so about 40% of the down-time problems connected with liquid cooled engines are eliminated. You benefit by lower original cost, lower operating and maintenance costs, faster warm-up to most efficient operating temperature, and longer engine life . . to name a few.

Cylinders and heads are individually replaceable and all vertical parts are interchangeable This means faster, easier servicing and maintenance as well as fewer parts to stock.

Of course, the engine is only part of the story . . . see your SAME dealer to check out, test drive and learn about all the special features that SAME offers . . . **including a limited 2 yr./3000 hrs. warranty and a surprisingly low price tag.**



SAME built the first full diesel engine farm tractor in 1927 Today every SAME tractor is powered by a dependable economical SAME air-cooled diesel engine



SAME was first with a 5-cylinder diesel engine in a tractor It powers the Panther 95 (shown) and the Jaguar 95

Lt. Governor sees hope for farm exports

HARRISBURG — Lt. Gov. William W. Scranton 3d said Friday he's optimistic that his recent trade mission to the Far East will soon open up new overseas markets for Pennsylvania products.

Scranton, who is chairman of the Governor's Small Business Council and Energy Council, led a nine-member delegation to the fourth-annual United States-Republic of China Business Conference May 26-30 in Taipei.

The lieutenant governor said the Republic of China told Pennsylvania Farmers Association representatives, who accompanied him on the trip, that they were specifically interested in the possibility of importing eggs, peaches, grape products, dairy products and dairy processing equipment.

"We have opened the lines of communication between Pennsylvania and Taiwan," Scranton said. "The PFA and our state Department of Agriculture have agreed to begin exchanging detailed information on pricing and product structure."

"I talked to Chinese government and business officials about a program of trade development with their country which would include greater exposure of Pennsylvania products to Taiwan markets," said Scranton. "I will be discussing this with administration and business officials here in Pennsylvania, and I'm hopeful that the Commonwealth can soon enter into agreements for developing trade with Taiwan."

In addition to attending the conference, the lieutenant governor met personally with President Chiang Ching-kuo of the Republic of China; Premier Sun Yun-suan; K.H. Chang, minister of economic affairs; K.H. Shao, director general of the Board of Foreign Trade; David Chu, president of the Taiwan Power Company and K.H. Wu, chairman of the Chinese External Trade Development Council.

"Both government and industry officials in Taiwan seemed responsive to Pennsylvania's export possibilities," said Scranton. "They experienced particular interest in our agricultural products."

The lieutenant governor said he thinks trading could expand beyond agricultural products.

"One government official told me that they look to New York for financing, California for electronic technology and Pennsylvania for manufactured goods," he said

Scranton said his biggest disappointment is that Pennsylvania coal sales to Taiwan in the near future appear doubtful.

"Our coal is among the highest quality in the world," he said. "However, our underdeveloped and antiquated coal-haul transportation system and port-loading facilities are decided disadvantages in selling our coal."

The lieutenant governor said the Carter administration must fulfill its promise to revitalize our railroads.

"On several occasions President Carter and Vice President Mondale have committed themselves to improving Pennsylvania's coal industry," he said. "A major part of that job involves rebuilding the rail transportation system.

"Our inability to quickly move coal from our mines through our ports and into foreign market has almost removed Pennsylvania from competition with other coal-producing states and nations. We stand to lose the substantial economic benefits of today's coal boom if the rail system in the Commonwealth is not immediately upgraded."

Scranton postponed the second leg of his trade mission to Seoul, South Korea, because of a State Department advisory discouraging travel in that nation due to political unrest

How many calves did you lose last year?

fiberdome® CALFhutches start them out right

Raising calves is a tricky business That s why modern calf raisers are going to individual hutches to help save more calves by cutting down on pneumonia, scours and hoof problems Properly made hutches help eliminate the dampness, crowding and poor ventilation that plague many calf barns

You can be assured of this kind of healthier environment with Fiberdome CALFhutches Their unique one-piece construction of heavy gauge fiber glass makes them weatherproof, so they will last indefinitely with normal care No joints for moisture and bacteria to creep through A white gel-coat finish keeps them cool in summer

When not in use, stakes can be removed and strong U-bolts on top let you conveniently pick units up to clean or stack for compact storage

For more complete information send for free booklet

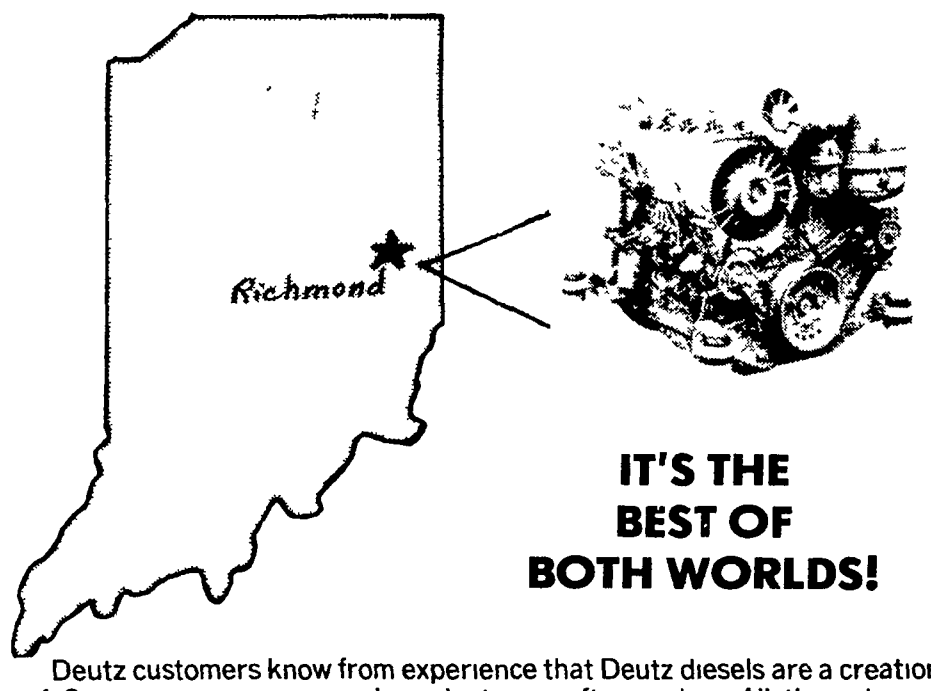
DEUTZ DIESELS FROM INDIANA?



IT'S THE BEST OF BOTH WORLDS!

Deutz customers know from experience that Deutz diesels are a creation of German engineering and production craftsmanship. All those happy Deutz users will be even happier to learn that — NOW DEUTZ DIESELS WILL BE MADE IN USA - at an engine plant Deutz purchased in Richmond, Indiana

Domestic production in the 20-160 hp range gives us and our Deutz customers a tremendous advantage over all other air-cooled diesels

Invest in a sure thing - Deutz diesels have been famous for fuel economy and reliability since Amos Stauffer first sold Deutz diesels in this area - 25 years ago We are equally famous for superb Deutz service

Don't just buy a "bargain" diesel which is supposed to be "built like a Deutz" BUY A DEUTZ AND BE SURE YOU HAVE MADE A GOOD INVESTMENT A Deutz diesel will usually recover the difference in price thru fuel savings alone within one year

Heat synchronization seminars sponsored by Upjohn

KALAMAZOO, Mi. — Estrus synchronization and its many advantages is now available to beef and dairy producers, but a team effort and complete understanding of product use are essential for a successful program, said a spokesman for The Upjohn Company.

"This is why we are providing educational programs for veterinarians, A.I. personnel, university researchers, extension agents and, of course, beef and dairy producers," reports J.H. Sokolowski, D.V.M., Ph.D., product manager for Upjohn. "We feel education is the key to Lutalyse program success. In essence, product promotion means product education."

Upjohn's Lutalyse is the only FDA-approved drug for estrus synchronization.

"To help provide the education needed for program success, we are sponsoring regional breeding management seminars across the United States. Local seminars sponsored by area veterinarians, A.I. groups and The Upjohn Company are also being held," Dr. Sokolowski explains. "Regional meetings are held for veterinarians, university researchers and extension personnel. Local meetings are for producers and their veterinarians."

The seminars outline Lutalyse breeding programs, point out aspects critical for program success and disseminate information to people directly and indirectly involved with estrus synchronization programs. The goal of the meetings is to insure successful use, Dr. Sokolowski points out.

"One of the offshoots of local meetings is to emphasize the need for close producer-veterinary association," he says. "Producers must go to veterinarians to obtain Lutalyse. Working closely with their veterinarian to establish a breeding program can help both producer and veterinarian discover possible problem areas that might affect estrus synchronization.

"Good nutrition and health are vital if cattle are to cycle normally. Cattle that aren't cycling normally are not candidates for estrus synchronization programs," Dr. Sokolowski affirms. "Veterinarians and producers that work closely together can observe and, hopefully, solve problems that could harm the breeding program."

To provide support and aid to veterinarians and producers, Upjohn is also increasing its Technical Service Veterinarian staff.

"Technical Service Veterinarians will cover specific regions to help veterinarians and producers whenever needed. They have a solid background in prostaglandin, estrus synchronization and breeding programs," Dr. Sokolowski relates.

Upjohn Lutalyse specialists are available to provide information at meetings as needed to initiate estrus synchronization.

Producers and veterinarians desiring more information on estrus synchronization can write to: Breeding Seminars, The Upjohn Company, 9823-190-1, Kalamazoo, MI 49001, and ask for pamphlet V-2593.

Dairy forage field day set

CLARKSVILLE, Md. — Dairy-oriented families should mark July 31 on their calendars as the date for the 1980 family field day at the University of Maryland forage research farm near Clarksville in Howard County.

This year's twelfth statewide forage crops and dairy cattle management showcase will feature a bigger and better mix of displays, demonstrations and wagon tours, according to J. Lee Majeskie, field day coordinator. Majeskie is extension herd management specialist and assistant professor of dairy science at the University of Maryland in College Park.

He reports that the six wagon-tour stops will include forage crop research trials and three stations in the dairy barns area to hear reports on current animal research.

Louis L. Goldstein, state comptroller, will be on hand to present length-of-service awards to University of Maryland agronomy-dairy research farm employees during the noon lunch break under a big tent.

Field machinery activities will wind up the day's program. These will include a rotary hay-mower demonstration and power take-off dynanometer tractor performance tests.

The field day site is located three miles northeast of Clarksville in central Howard County. Street address is 4234 Folly Quarter Road, Ellicott City.

Farm Business News

Named poultry production manager

ITHACA, N Y — A.D. "Al" Hibbard has been appointed as Director of Production for Babcock Poultry Farm, Inc. Responsibilities of the newly-created position include the management of all Northeast hatchery and production farm programs, and related administrative and service functions at the firm's world headquarters in Ithaca, New York.

Awarded a Bachelor of Science degree in poultry husbandry in 1951 from Penn State University, Hibbard is a 15-year veteran of Babcock Poultry Farm. Most recently, he had directed technical poultry support functions for Babcock International Corporation in the Far East, following service as a technical representative in the domestic poultry division.

Previously, he had served as a resident research and production coordinator for a major, primary-level Babcock installation in Sweden, and as manager of Babcock Started Pullets, Inc.

Reared on a Vermont egg farm, Hibbard worked in a variety of poultry industry capacities before joining Babcock in 1965

According to Bruce Babcock, "Al Hibbard brings a wealth of experience and expertise to our expanding poultry production program His varied field service in all aspects of poultry health, nutrition and practical management — as well as his extensive contacts with Babcock customers throughout the world — makes him well equipped to direct the complex production program we have at Babcock.

"It's gratifying to be able to promote one of our own people to this important post, particularly Al Hibbard, who has contributed so much to our success."

Hibbard and his wife Ann reside in the Ithaca, New York area.

Babcock Poultry Farm, Inc. is a subsidiary of Babcock Industries, Inc., a multinational agribusiness specializing in the development and marketing of egg-type poultry, swine and related animal health products and services.

Pest update for Del. crops

GEORGETOWN, Del. — Blacklight trap collections show that peak European corn borer egg-laying activity took place between May 15-24 in the state. Eggs laid during this period will certainly have hatched by now and borers should be nearly half their full size, predicts University of Delaware extension pest management specialist Mark Graustein.

As predicted, first brood moth flight activity was lighter than normal this spring. However, populations may reach economic levels in certain areas, cautions the specialist. Now is a critical period. Growers—especially in Sussex County—should make routine field checks for signs of ECB whorl feeding.

Check 100 consecutive plants in several areas and count the number of plants with whorl feeding.

Treat with an insecticide if an average of 35 or more plants in 100 have fresh ECB feeding and corn is shorter than 30 inches.

Graustein recommends using either two pints of Pencap M per acre in 20 to 50 gallons of water or five pounds per acre of Furadan 10G directed into the whorls

Double rates of these insecticides if they are to be applied broadcast (e.g. by aircraft).

Thimet 15G at 6.5 pounds per acre and Dyfonate 20G at five pounds per acre also labeled for broadcast whorl application to control ECB.

For corn higher than 30 inches, treat when 50 percent or more of the plants have whorl feeding.

Although armyworm populations are generally light, there may be some instances of them "marching" out of small grain as it matures—and into adjacent corn

Growers should watch for this activity during the next two weeks An economical way to prevent armyworm damage on corn is to treat a 25-foot area along the border of the field adjacent to the small grain field as soon as armyworm movement is noticed.

Use Sevin, Toxaphene or Dylox for this purpose.

It's a good idea to check small grains routinely to determine the potential for armyworm damage both to that crop, as well as your corn.

Finally, reports from states to the south of Delaware indicate that cutworm activity may be somewhat higher than normal this year.

The wet weather a few weeks ago, as well as more recent moisture, have been favorable for development of this pest. For this reason, Graustein says growers can expect to see sporadic cutworm activity in their fields.

Baum's barn goes up

ABBOTTSTOWN — The Eldon Baum farm near here will be the scene of busy carpenters on Tuesday, June 17.

All the activity will be centered around the new barn that will begin to rise after 8 a.m.

About 50 people are expected to turn out to help put the new structure under roof. Farmers and neighbors, each equipped with their own hammer, will set to work on the rafters and roofing.

The new barn will replace the old dairy barn that was destroyed by fire earlier this Spring.

ARCADIAN® liquid gives a profitable boost to alfalfa after every cutting.

Give alfalfa a liquid boost after the first cutting.

That's when topdressing N-P-K, and micronutrients in an Arcadian® liquid fertilizer made with POLY-N® pays big dividends in high yielding, high quality alfalfa. You can even add pesticides if you need to.

When it's done right, a topdressing after every cutting will increase the yields. It will raise the protein content. Help the crop compete better against grasses. And improve the vigor for a long stand life.

Arcadian liquid makes it easy. Made the SLF® way. Arcadian liquid gives you uniform distribution of fertilizer ingredients from start to finish. It's truly the efficient way to turn alfalfa into green gold.

• Individual feeding is key to 23% milk production hike

BY DICK ANGLESTEIN

LEBANON — When a milking herd average jumps a whopping 23 percent from one year to another, there's got to be a reason behind such a production achievement.

Charles Heffelfinger and his mother, Pauline, who operate a dairy farm off Rt. 343, just north of Lebanon, experienced just such a noteworthy production hike and attribute the increase to individual attention to feeding.

In 1978, the herd average was 14,355 lbs. of milk and 530 lbs. of fat.

In 1979, these herd figures jumped to 17,672 lbs. of milk and 647 lbs. of fat.

That's an increase of 3,317 lbs. of milk, just over 23 percent, that won the Cedar Crest Young Farmers Association production award for the largest herd average milk increase.

The Heffelfingers credit a change in their feeding program as the reason for the increase.

"Instead of feeding our cows as a herd, we now treat them as individuals," Charles explained.

The revised feeding program matches nutritional needs with individual cow production. DHIA records are now closely followed, along with feeding formulation recommendations from their Agway supplier.

All feed is now weighed. The milking cows get 40 pounds of silage once a day along with 18 pounds of hay.

For those cows with more than 50 lbs. of production, a feeding ratio of one to two is followed for corn, oats and supplements. For every two lbs. of milk production, a cow gets one pound of feed.

For cows producing less than 50 lbs. of milk, a ratio of one to three is followed.

"There's just no doubt that under the old uniform feeding program, some cows were getting too much feed and others weren't getting enough," Pauline explained.

She points to a 13-year-old cow that was always thin and crampy. Under the new feeding program, the cow is now better than she had ever been. Her production increased from 13,329 lbs. to 19,937.

"That particular cow had to be underfed before," she said.

The registered herd is almost 100 percent home-grown.

"I bought only one cow last March," Charles said, "and that has been the only outside addition to the herd."

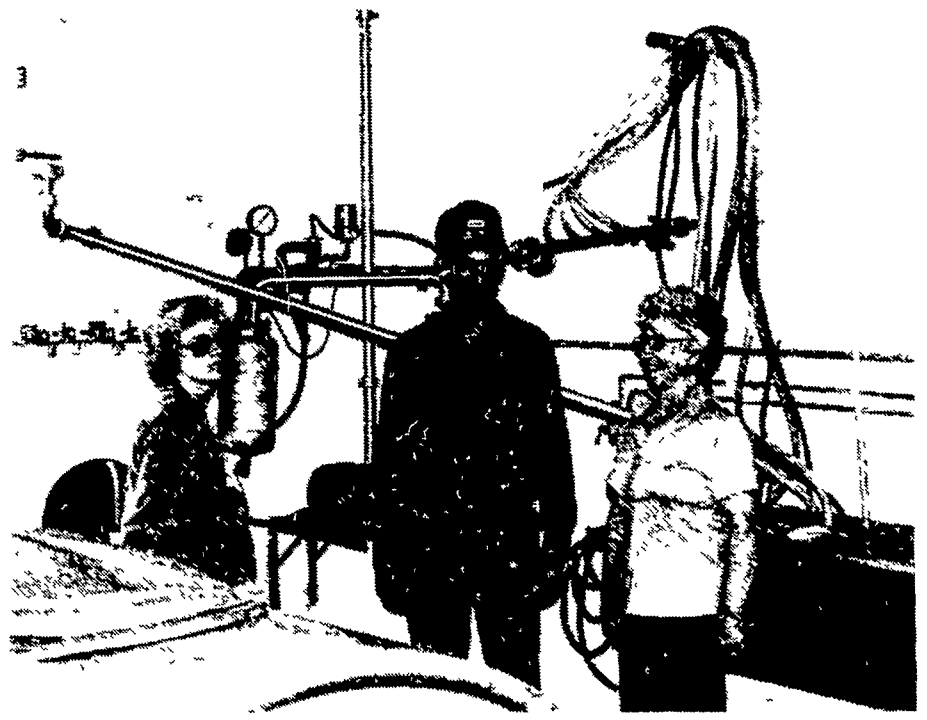
Individual production increases of 60 percent were recorded by some of the cows with the prefix "Hefacres."

Top producer is four-year-old Hefacres King Kurt Kerry with 26,063 lbs. of milk and 749 fat. On her previous lactation, she produced 15,695 lbs. of milk and 433 fat. That's better than a 10,000-lb. increase.

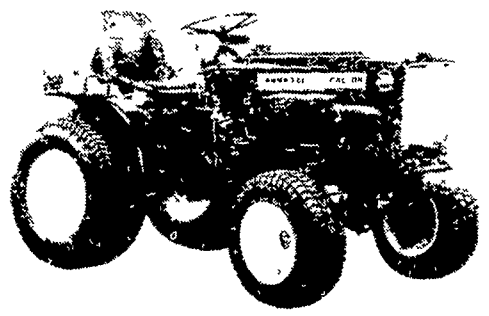
Kerry produced more than 100 lbs. for three months in a row and peaked at 127 lbs.

"That was the first time in 26 years that we had a cow

(Turn to Page C30)



Shown in milk house of Heffelfinger farm, from the left, are Audrey; her husband, Charles; and his mother, Pauline.



NEW!

Shift on-the-go. Live PTO. Powerful, trouble-free 18 HP 3-cylinder Yanmar Diesel.

YANMAR

The new easy-to-use Yanmar tractor that boosts productivity.

No other tractor in this class offers you so much in the way of exclusive time and work saving features. Yanmar's Power Shift transmission, which gives you the best of mechanical and hydraulic transmissions for one touch, on the-go clutchless shifting, a live 2 speed PTO, which starts driving the implement before the tractor moves allowing immediate and full implement performance, and a new 3 cylinder Yanmar diesel engine, with smoother and quieter operation along with Yanmar's legendary economy, power reserve, and durability the features that make Yanmar the world's largest seller of small diesel engines. They're all built into the new YM186(D)

that milked over 100 lbs.," Pauline said.

Another four-year-old, Hefacres King Kurt Jewel, increased from 13,621 lbs. of milk to 21,952.

Significant gains were also shown by some old-timers in the herd. Hefacres Posch Vigil Velva went from 19,495 to 22,166. This year, she's expected to top the lifetime 200,000 mark.

Pauline explained that the herd had almost been sold last year. Her husband, Warren, died after a year's illness.

"We changed our minds and we're sure not sorry now that we did," she said.

The combined herd, which totals some 64 head, includes about 30 milkers. Charles is now in the process of building up his own herd, utilizing sires such as Marvex, Joe Dan Ivan, Harrisburg Gay Ideal and Proud Performer.

The farm was established as the Hoffa homestead just after the turn of the century by Pauline's grandfather.

It includes 97 acres and the Heffelfingers rent 80 more. Crops include 60 acres of corn, 40 of hay and about 10 in oats. Charles handles the field work, while milking chores are shared with his mother and his wife, Audrey.

As Charles moves toward eventual sole operation, he's already set a goal for this year, following last year's production achievement.

"We want to go over 18,000 lbs. in milk and top 700 in fat," he said.

With continued improved management, that goal seems well within sight.

Heffelfinger dairy farm is located off Rt. 343 about three miles north of Lebanon. Farm was founded as the Hoffa homestead just after the turn of the century.

Top producer in the registered herd, shown with Charles Heffelfinger, is Hefacres King Kurt Kerry with 26,063 lbs. of milk and 749 fat.

Oxford FFA chapter elects new officers

OXFORD — On Tuesday, Oxford Chapter had their nual election of new of-ers. The meeting got rted by opening remonies followed by cretary's report, asurer's report, com-ttee reports and new siness. New business was cussed in five categories. dvisor Thompson talked out the dairy shows and ere they would be held. ere will be a trip to Ag Progress Days at the end of August. On June 10-11-12, 1980, ten students from the Oxford Chapter are going to Penn State to attend State Convention Days and to compete in state contests.

The Chapter Sweethearts, Carol Carter, Bonnie Lamborn, Bonnie Arrowood, and Valerie Weaver were presented with necklaces. Finally the election of new officers was held. The following were elected for 1980-1981:

President, Carol Carter; Vice President, Charlie Astle; Student Advisors, Bob Parry and Dave Ham; Secretary, Bonnie Lamborn; Treasurer, Bonnie Arrowood; Reporter, Valerie Weaver; Chaplain, Deanna Willis; Sentinel, Bill Wylie; Assistant Secretary, Sue Dougherty; Assistant Treasurer, Bonnie Browning; Parliamentarian, Arnold Davis.

Also on May 19, 1980, three of the Oxford Chapter officers were elected for Chester County offices. They were: County Vice-President, Carol Carter; County Student Advisor, Charlie Astle; County Chaplain, Bonnie Lamborn.

The meeting was then concluded with prayer.

INTRODUCING

RUMA PASS

The complete dairy feed that cuts protein costs while maintaining your milk production.

If you think high milk production requires high protein, think again.

New Master Mix Ruma Pass for corn and sorghum silage feeding programs lets you feed less protein without a loss in milk production. So you save on protein while your cows continue producing at their present level.

Ruma Pass contains by-pass proteins which are not easily digested in the rumen, but are readily digested in the small intestine. The net result is more usable protein with less waste.

And you pocket the savings.

Isn't it time you had a protein break?

On-farm crop feed value analysis can aid dairy farmers

BY DICK ANGLESTEIN

UNIVERSITY PARK — As a dairy farmer, would any of the following possibilities be of interest for your operation?

—Before turning the cows out into summer pasture, you know the nutritional value of the grass they'll be eating and how it can be fit into the herd's overall feeding program.

—In the time it takes to connect the harvester to the tractor, you can be told the feed value of the orchard grass or small grains you'll be chopping.

—It's late winter and you're low on baled hay. Deciding to buy some alfalfa at the nearest hay market, you walk down the line of trucks on which is posted the protein and TDN content of each load, along with its particular hay grade.

—You have a mixed field. On the higher, better drained section the alfalfa looks pretty good; while there's predominantly grass in the lower, wet area. In a relatively few minutes, you know the difference in value of the two crops and what each might require in supplements for your dairy herd.

All of these on-farm or on-market determinations of feeding value of both harvested crops and those still in the field are now possible with a new mobile van version of infrared crop testing equipment developed at Penn State.

Not only can the testing equipment now be taken to the crop, greatly increasing its versatility of use and benefit to individual farmers, but the results of the testing are available almost instantaneously, ranging from two to 10 minutes, depending on the crop involved.

The testing equipment, called an infrared spectro computer, has been developed, tested and utilized over the past five years by ag researcher John Shenk and associates at Penn State. The mobile testing van, which contains a smaller, more compact instrumentation package, just started to be used this spring.

The instrument scans grains and forages and within several minutes determines their nutrient content, such as protein and fiber, total digestible nutrients and percent of dry matter.

The scanner is expected to save considerable time and expense and gradually replace the present technique of chemical and mathematical analysis.

The mobile van was located at the Belleville hay

(Turn to Page D3)

Mobile unit of Penn State's infrared testing equipment is set up at Belleville hay auction to analyze forage feeding value of baled hay bieng sold at the market. Van can also be used for on-farm analysis of pasture grass, crops being gree chopped, other high moisture, as well as hay an cereal grains.

On-farm analysis

(Continued from Page D2)

auction for five weeks this spring.

"We used these five weeks as a test period to actually set up how the equipment can be used in a hay marketing situation," Shenk explained.

Mostly mixed hay is sold at the Belleville auction, according to Shenk. There was a mixed reaction among sellers concerning the testing of loads brought to the auction, he said. Primarily, the sellers of higher quality hay were more interested in the analysis than those bringing lesser quality loads.

"It took a couple of weeks for farmers to get over their curiosity concerning the testing procedure," Shenk said.

"But as we got to the third and fourth weeks, we had a number of farmers wanting us to come back to continue the analysis."

For those sellers wishing to have their hay analyzed at the auction, the testing required only two minutes. Then, the load could be posted with a set of figures showing the percentage of protein and total digestible nutrients, along with a grade of one to five based on standards put forth by the National Hay Marketing Task Force.

"Prospective buyers must be able to understand these figures in order to get the maximum benefit from use of the equipment," Shenk explained.

"This is one of our greatest needs now. We must get more first-hand exposure of the mobile unit among farmers so they can become more familiar with it and how it can benefit them in their feeding programs."

In the spring of 1979 the Shenk research team spent six weeks at the New Holland hay auction to get samples of hay brought to market and observe just how the auction operates.

"Actually, the samples from the New Holland auction were used to calibrate the equipment for the van," Shenk said.

The equipment was demonstrated at a meeting of the Kutztown Young Farmers.

"They were just amazed that we could analyze 35 samples of hay in one evening," Shenk said.

"But we need more of such efforts to get out and show what it can do. It's new and farmers are skeptical of it. They need to be shown more just how it can help them."

In another experiment this spring, the equipment was pulled right into fields were within 10 minutes it showed that what still in the vegetative stage tested at 14 percent protein, orchard grass showed 18 percent and alfalfa was 28 percent.

The mobile van is equipped with a microwave oven for the testing of grasses and other high moisture materials. Such tests require about 10 minutes, including the drying time. In grasses, the amount of protein and fiber composition can be shown.

"This makes the van a totally analytical unit for not only dry feeds but high moisture materials, as well," Shenk said.

The van was also tested at the hay market at New Wilmington, Pa., Shenk said, and considerable interest was shown there, too.

The infrared scanning could predict weight gains and milk production directly from forage samples. Also, it could be utilized to update the nutritional value of feed and forage fed to cows in the DHIA program.

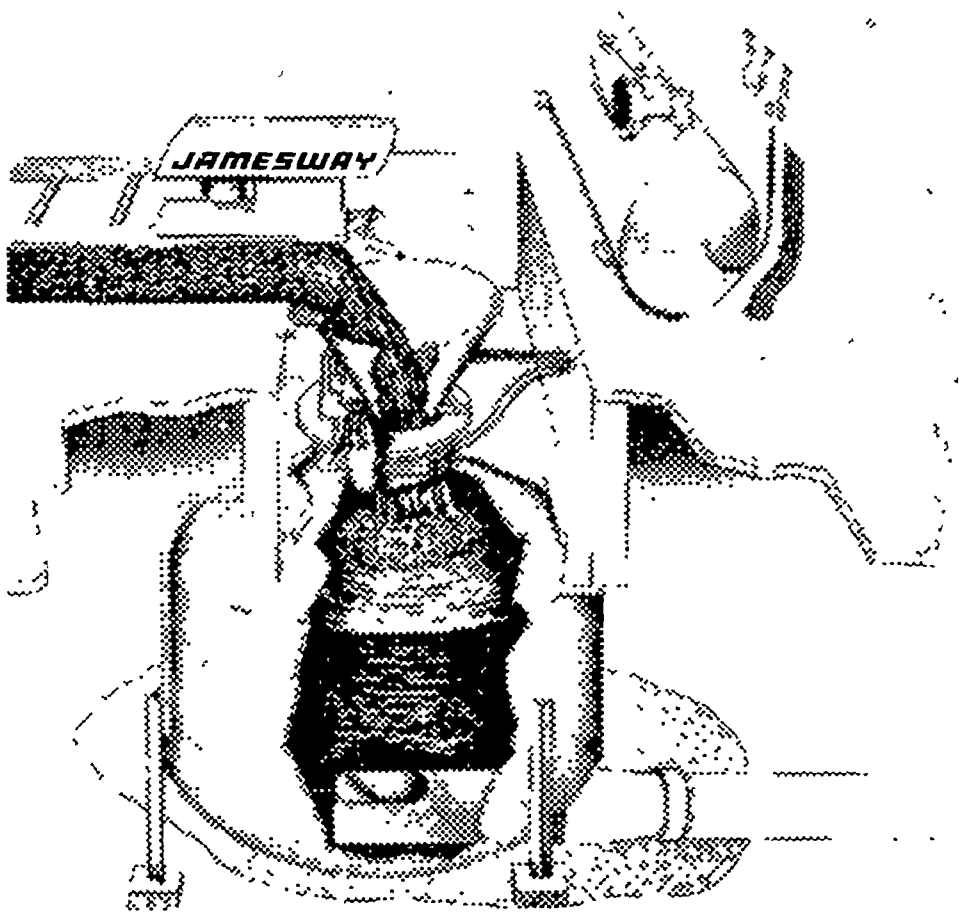
This summer, the research van is scheduled to be demonstrated at Ag Progress Days at Penn State, as well as similar events in Michigan and Wisconsin. Its package of instrumentation costs about $50,000. Future work on it will include providing a power source off the van's engine and including air conditioning so that the testing equipment can be operated in all locations and under all types of conditions.

The original van is slated for continuing research purposes.

"I know there is a need in Pennsylvania for this equipment," Shenk said.

"And presently, there is just as great a need to show how the analysis works and how it can help farmers."

JAMESWAY® Air Pressure Manure Transfer System



Does hard work for you

Whatever your herd size—50, 150 or more—let air pressure move manure to storage in minutes. It's simple: your gutter cleaner, alley scraper or tractor-scraper, delivers manure "as is" to a steel holding tank. A twist of your wrist then seals the tank; manure agitates and moves to the storage basin, as much as 300 ft. away, for later spreading. No rams, gears, reducers or delays.

See us for systems and service that help make the good life better.

Control plum curculio in orchards

UNIVERSITY PARK — The typical Pennsylvania weather that we've been having, with its unpredictable shifts from cold winds and rain to swelteringly hot and humid days, plays an important part in controlling the activities of the plum curculio.

This insect is an injurious pest in plum, apple, peach, and cherry orchards throughout Pennsylvania, says Robert Tetrault, Penn State Extension entomologist.

The first curculios make their grand entrance in apple orchards right about the time of apple blossom festivities, according to Tetrault.

Dressed in a dark brown costume with whitish patches and four humps on its back, the beetle is about ¼ inch long.

This beetle could be nicknamed Pinochio, because one third of its total body length is 'nose'. Its long snout projects forward and downward from the head.

How does the weather harness this bug's activities? It seems that periods of cool, rainy weather with maximum temperatures below 70 degrees Farenheit are not ideal for curculio activity.

This bug begins to bus'le when the first warm period arrives, generally right after the petals fall from the trees, and when the maximum temperature reaches 75 degrees Farenheit or higher.

The adult curculios can usually be found in orchards for 5-7 weeks, and are generally more abundant on fruit trees next to woods, fence rows and trashy fields.

Small, pearly-white eggs, which hatch in 7 days, are laid singly by the female curculio in a small cavity underneath the skin of the young fruit.

After the week long incubation, the yellowish-white larva poke their brown heads toward the center of the fruit. There they begin to burrow large irregular cavities.

After gorging themselves at the fruits's expense for 16 days, the larva reach maturity. At this point, the ¼ inch long pest flees its host and enters the soil where it is transformed into an adult curculio.

The new adult emerges sometime in August and feeds for a short time before seeking Winter quarters — its damage for the year completed.

According to Tetrault, both feeding punctures and egg punctures are made in the fruit by the adult.

The feeding punctures are small round holes extending into the fruit about 1/8 inch. Egg punctures are distinguished by a characteristic crescent-shaped cut which partially surrounds the sunken egg.

Adults make an average of over 100 feeding and/or egg punctures during their normal life. Feeding punctures cause misshapen or gnarly fruit.

Fruit tree varieties that bloom the earliest are first to provide suitable locations for feeding and depositing eggs.

The critical period for controlling this pest comes during the first warm weather after petal fall when the temperature climbs to about 75 degrees for several days.

Tetrault warns that when feeding is greatly reduced by low temperatures and moderate rains wash spray deposits from fruit and foliage, as growers noted during the Spring of 1978 and 1979, curculio control is more difficult. He also pointed out the cooler weather means the active pest will be around the orchard for an extended period.

Penn State advises orchardists to monitor temperatures in order to time curculio sprays, with spraying schedules for trees bordering woods or fence rows being more frequent.

Tetrault said most of the insecticide combinations suggested in Penn State's commercial production guide have provided commercially acceptable control. However, the Guthion plus Penncap-M combination, he said, has a slight edge.

Along with getting the right insecticide combination, Penn State reminds growers that the length of time between sprays is also important.

Where growers have noticed a history of plum curculio injury, the following are important considerations:

—shorten the interval between sprays during peak activity (this may be necessary on only the outside rows);

—increase the insecticide rate during peak activity; and,

—select the most effective insecticides without sacrificing control of other pests.

POURED SOLID CONCRETE WALLS are far stronger than block!

- Manure Pit Walls
- Hog House Walls
- Chicken House Walls
- Concrete Decks
- House Foundation Walls
- Cistern Walls
- Barnyard Walls
- Concrete Pit Tops
- Silage Pit Walls
- Retaining Walls

POURED CONCRETE WALLS ARE FAR STRONGER THAN BLOCK!

You get about 40% more concrete for your dollar with a poured solid concrete wall as compared to a hollow core block wall

A poured solid concrete wall weighs about 50 lbs more per cubic foot! Far denser What's more poured solid concrete walls are monolithic there are no joints!

This is why laboratory tests show poured solid concrete walls have many times the flexural and compressive strength to withstand the side and down pressure caused by earth wind water and building loads and the material density to resist water penetration

Best of all thanks to modern and efficient construction techniques all heigths and thicknesses of poured solid reinforced concrete are competitively priced

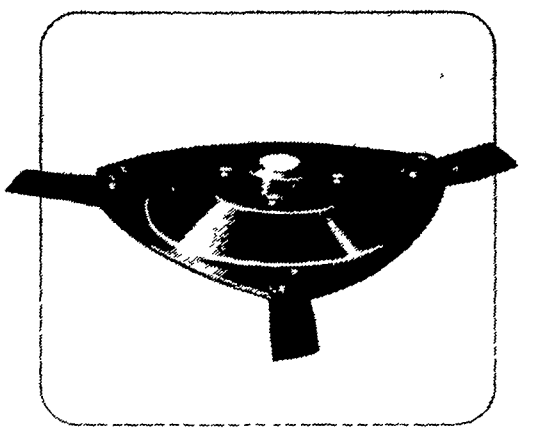
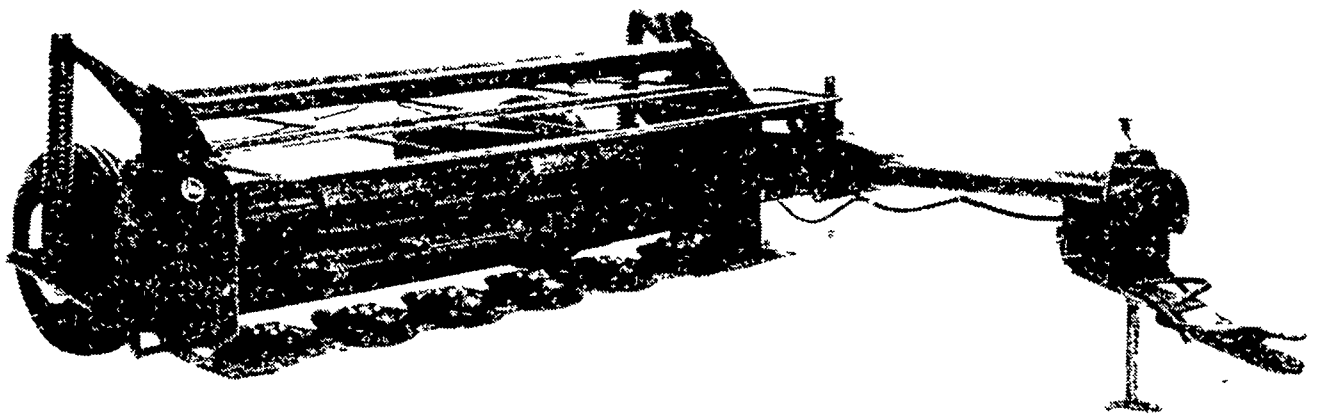
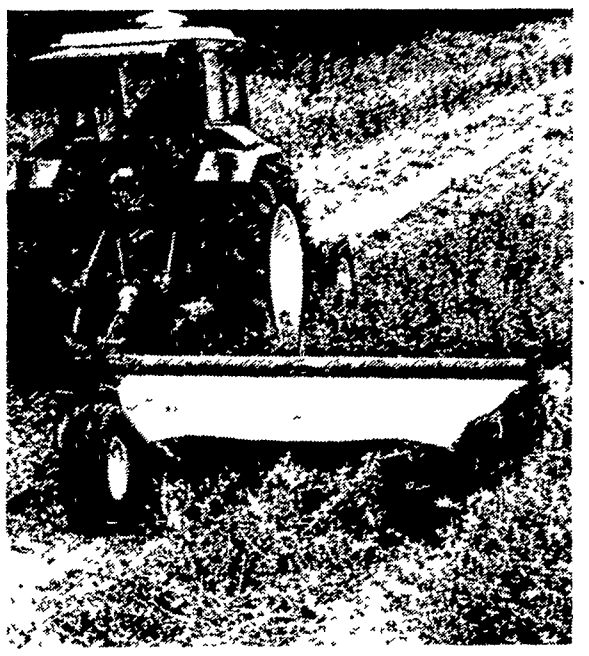
MAKE YOUR HAY THE BETTER WAY!

Vicon



disc mowers
mower-crimpers/conditioners



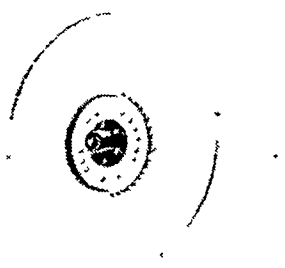


mower-crimper
KM 240

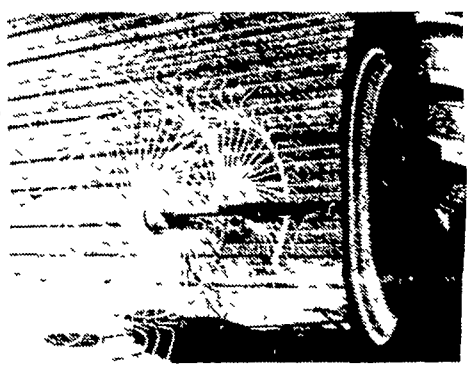
Latest machine to join the Vicon mower range is the new trailed KM mower-crimper, which incorporates the same cutter bar as the Vicon Discus disc mower CM 240. Mounted above the mower bar are a pair of profiled rubber rolls which condition the crop immediately after cutting. The conditioning effect can be varied by changing the pressure between the rolls Setting the machine for transport or action is done hydraulically. Skids can be set for various cutting heights. A collapsible shield and a cover of heavy duty plastic provide for guards according to international safety standards.

Vicon

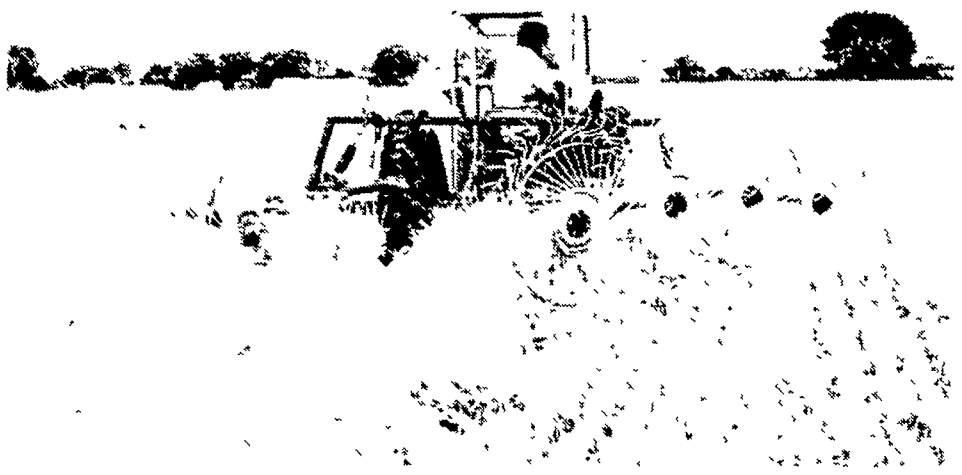
THE FIRST ECONOMICAL RAKE FOR BIG BALERS...



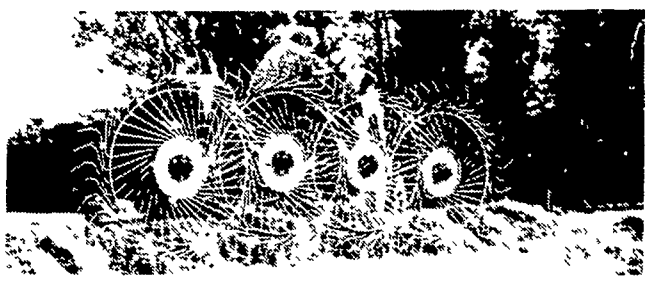
fingerwheel rakes/swathturners



The Vicon Windrower Turner can be mounted on the three-point hitch or to the front frame or front axle of most tractors. Speeds hay drying by rolling the windrow over just half a turn. Individual tines walk around rocks and other obstacles and go into depressions to get all the hay, even on the roughest ground.



HERE'S A REAL WINNER!



Available in 3 pt. mounted or Horse Drawn Cart mounted.
Vicon Wheel Rakes work both for Raking -
OR - Flip them over, and -
Fluff two swaths in one pass!

TRAPEZE V-RAKE

The Vicon Trapeze is the perfect companion tool for the big round baling system. It incorporates two Acrobat frames joined together for a total of eight fingerwheels. This creates a working width of up to 20 feet when raking up a windrow five feet wide Fingerwheels are ground-driven so wearing parts are cut to the minimum — gears and sprockets are eliminated altogether. A 35 HP tractor is all the power you need Best of all, Vicon's Trapeze is the lowest cost V-Rake on the market today.

Farm Talk

Jerry Webb

Some government watchers, particularly the journalistic type, take great pleasure in digging out the seemingly meaningless research projects undertaken by the government.

The Department of Agriculture is quite often the victim of some probing journalist who has spotted a bit of irrelevant research that's costing the poor taxpayer a few thousand dollars. We all read these little gems with great outrage and contempt for the stupidity of those bureaucrats who allow such foolishness to go on.

No doubt some research is done in the Department of Agriculture and in other places that is a complete waste of tax dollars. But maybe some of it is basic research that involves acquiring basic knowledge before any practical application can be developed, and therefore it's necessary even though not understood.

Perhaps there's a parallel between some of the highly technical research that goes on and the games that grown men play. When you think about golf or bowling, or even football, it's totally ridiculous what grown men will do. A probing journalist can do the same thing with research titles and carefully selected words that make a project appear ridiculous.

This whole line of reasoning went through my mind the other day as I was reading a Department of Agriculture report about research on alcohol injection. It's a project aimed at finding a way to burn alcohol in an internal combustion engine. Rather than mixing it with gasoline to produce gasohol, this technique uses an injector to spray wet alcohol, or aquahol, into the fuel chamber.

In today's fuel minded economy, you would have to call this kind of research very relevant and if it has any hope at all, very important. After all, we can grow a variety of agricultural crops that can be converted into alcohol. And if we can figure out how to make that alcohol fuel an internal combustion engine in a cost effective and ecologically safe way, then we have freed some 200 million people from Arabian bondage.

So nobody's laughing at this bit of research and no probing journalist is talking about how much money has been wasted on the project. But wait a minute – that's not the whole story We're talking about a research team that reported its finding in 1948.

That's when William B. Roth and James C. Porter, scientists in USDA's Peoria Reseach Laboratory, applied for a patent on their alcohol-water injector.

Can't your just imagine the total lack of interest in that little project during those post-World War II boom years when gasoline was selling for a few cents a gallon and we were producing all we needed right here in this country?

But what may have seemed a waste of tax dollars in those days turned out to be about 30 years ahead of its time.

It was so far ahead, in fact, that the patent granted by the U.S. Patent Office has expired.

The researchers, having finished their work, went on to other things, and must have wondered over the years just where they went wrong. Today, however, their research is right back in the mainstream of contemporary thinking.

What they did more than three decades ago provides some of the knowledge needed to burn alcohol in an internal combustion engine.

Roth, who still works at the Peoria lab as a chemist, now points out that the main advantage of a water-alcohol injection system over gasohol is the use of a lower cost, less gasoline consuming system. The eventual goal could be to replace all gasoline in the combustion system and run on an alcohol-water mix as the primary fuel, with gasoline used only to start the engine.

Research is going on all over the country into all kinds of alcohol fuel mixes and technologies. Companies are springing up to produce gasohol. Farmers are making it right on the farm. And the prospects for some kinds of alcohol fuel injection coupled with the use of gasoline looks promising. But what could turn out to be an important breakthrough must have just looked silly in 1948.

It's somewhat satisfying to know that both Roth and Porter, who is now semi-retired and living in New Mexico, are still around to see their invention become part of this important energy saving development.

Joint problems in baby pigs not necessarily nutrition

CHICAGO, Ill. — Look for non-infectious or infectious agents as the source of leg problems in baby pigs, advised Dr. James D Hedges, manager of swine research for Wayne Feed Division of Allied Mills. Many times, he points out, the problem is related to these agents, not to nutrition.

The non-infectious problems can be due to poor floor surface, poor confirmation or inadequate bone structure related to genetics.

Injections of lincomycin can help reduce the incidence of these joint problems, Hedges says. Lincomycin is also the drug of choice when joint problems develop in older hogs.

Hedges recommends injecting hogs for three consecutive days at the first sign of joint problems. Additional calcium and phosphorus in these situations will not correct the problem and will not improve swine performance, he adds.

Adams Electric Co-op announces youth winners

GETTYSBURG — The names of six Adams County students selected to represent Adams Electric Cooperative on the Rural Electric Youth Tour were announced this week by Charles L. Overman, general manager of the cooperative.

Sponsored to represent the cooperative from the Stewartstown District will be: Brett Amspacher, R. 3, Stewartstown; Esther Atkins, R. 2, Delta; Cindy Erisman, R. 1, Stewartstown; Jean Hemminger, R. 1, Glen Rock; Chris Scuchart, 63 Singer Road, New Freedom; and Lisa Wysocki, R. 1, Seven Valleys.

These young people were selected from a group of high school students who took part in the local cooperative's study program conducted by Robert Scarborough, Member Services Coordinator, Stewartstown District.

The awarding of this honor was based upon the student's outstanding results in testing on assigned study material, personal profile and written reports on various subjects related to cooperatives and energy resources.

The expense-paid tour, started in Harrisburg on Sunday, and ended in Gettysburg Friday. It was coordinated by the Pennsylvania Rural Electric Association, Harrisburg.

The Adams Electric delegates joined approximately 70 other students from across Pennsylvania who have participated in similar programs through their local ruralr electric cooperative.

At a mock annual meeting in Harrisburg the Pennsylvania students will elect a state representative to serve on the Youth Counsulting Board. Several students will be seeking this opportunity to serve on a national level as an advisory group to the National rural Electric Cooperative's educational program.

Monday's itinerary included a tour of the state capitol, a lunch with state legislators and a tour of Peach Bottom Nuclear Plant before continuing to the nation's capital.

During their stay in Washington, D.C., these young people will see their government in action, visit with their congressmen and senators and tour various government agencies and sites of historical significance. The Pennsylvania students will be guests of the congressional delegation at a special luncheon held in their honor on Tuesday.

On Wednesday, the group met approximately 1000 young people from 28 states for a program coordinated by the National Rural Electric Cooperative Association.

The morning program was a question and answer session with their congressional leaders and governmental officials.

After lunch, buses transported the students to the South Lawn of the Whit House for a special program requesting a visit with the President and a tour of the presidential mansion. An all-states gathering highlighted the evening events.

Keep children away from Mayapples

LITITZ — Many a child has taken the dare of another and bitten into a green Mayapple (Podophyllum peltatum) fruit.

Usually one bite—and the unbelievably bitter taste—is enough to make the child spit and rinse his mouth with lots of water. But if the child actually swallows much of the Mayapple he'll end up with severe stomach pains, says Jerry H. Reyburn, Extension forest resources specialist at Penn State.

This is amusing only to people with sadistic personalities. Parents should warn their children about Mayapples because they are appearing in our Pennsylvania woods about now.

The poisons Mayapples contain are alkaloids; and although they can be fatal, they usually are not because nobody can stand the bitter taste long enough to eat a fatal dose, Reyburn says.

Could you rebuild if disaster struck?

BY SHEILA MILLER

SLATINGTON — If fire suddenly struck your farm and leveled your barn and destroyed livestock and equipment, could you start to rebuild tomorrow?

This is a question more farmers need to ask themselves. And, along with the question goes the need to find out whether the insurance policy you have is adequate and up-to-date.

This type of problem is a little closer home for Larry and Priscillia Dimmig, R2 Slatington, Lehigh Co.

Last September, fire razed their newly remodeled hog barn. The blaze not only destroyed the new nursery and farrowing house, but it also claimed the lives of 7 sows and 80 pigs.

The Dimmigs lost some equipment, too, including a Farmall H tractor with loader, and a New Idea manure spreader and mower.

Dimmig said he and a friend were working in an adjacent shed, doing some welding, when his wife discovered the fire. By the time they got to the barn, Dimmig said, it was filled with smoke. And in 15 minutes, it was totally consumed in flames.

"The old hay caught fire and the whole thing went up. All we could save was a truck and a hose," said Dimmig.

When they checked with their insurance company, the Dimmigs found their policy was "no where adequate to rebuild."

Dimmig explained that he was going to go in and update his policy after the remodeling was completed, but he didn't finish the work until just before the fire.

So, the Dimmigs turned for help to their local Farmers Home Administration, in Allentown. They applied for an operating loan under the economic emergency program in March.

The loan, in the amount of $49,000, was the estimate for rebuilding the hog operation, plus buying some new hogs.

Unfortunately, even though the county committee for FmHA decided Dimmig was eligible for the loan, County Supervisor Mike Anderson informed Dimmig he did not have the security needed to make the loan.

Anderson cited a previous loan made by Dimmig from Union Bank and the fact that this bank would be ahead of FmHA in a second lien position and that the bank did not wish to subordinate or release its judgment.

"Dimmigs did qualify, and they were certified eligible, but there were other problems," Anderson added. "He was not refused on his repayment ability, but on security."

"The value of the property, compared to the debts against it — it just wouldn't work. And the real estate is their only security because they don't own any livestock or equipment to speak of."

Even though repayment wasn't considered to be a problem, according to the FmHA official, things that look good on paper may not always work out. "Who knows what the future holds — the price of hogs may go lower yet while the price of feed goes up."

Anderson said his turning down the Dimmig loan is an action for self protection. "It's not like I'm not willing to make loans if I can....if I can, I'm willing to help anybody."

The situation they find themselves in now is like being between a rock and a hard place for the Dimmigs. Just when they thought they were on their way to a successful hog operation tragedy struck, with its chain reaction of hardships.

Without livestock and equipment, they can't get the loan they need to get back in business. They have depleted their savings over the past several months and cannot afford to buy the needed security themselves and still meet their monthly payments on the farm loans, they said.

In letters of appeal to key political figures, including President Jimmy Carter, Dimmigs are desparately attempting to get the federal funds they need for a new start.

They hope to hang onto their 10 acre farm with the help of Larry's second job. They said their three sons like the hog business, and the family took pride in producing a quality feeder pig before the fire.

The Dimmigs, finding themselves in a tough position, have not given up hope and may someday be back in the hog business.

Their hardship is only one example of how easily a successful, profitable operation can suddenly fall apart. And it points out the need for farmers to keep track of their current assets and insurance policies in order to be ready if disaster strikes.

Larry Dimmig surveys the remains of his hog operation, destroyed by fire last September.

TORQUE AMPLIFIER, CLUTCH & WATER PUMP PARTS & SERVICE

Rebuilt TA assemblies for IH tractors from SMTA through 1586. Water pumps, clutches and pressure plates from A, B, C through 1586 and for many of the combines, 101 - 303 through the 915. The time to be comparing prices and parts availability is before you need them so that when you do need parts and service you are aware of the options.

If you are operating a shop or are a farmer who does his own mechanical work, then you will do well to compare the parts which I have to offer. Complete rebuilt TA assemblies for 706 - 1586 are priced from $525 00 and come with a Dana Co heavy Duty Sprag clutch instead of the usual IH spray The Dana Sprag was originally designed for high performance aircraft and Helicopter applications and is designed not to roll over, one of the main causes of torque failure

Also have available assorted parts for TA's which are not available through new parts at IH I am prepared to do complete installation of these parts at competitive prices and will match any guarantee that is offered on TA units or rebuilt clutches, pressure plates & water pumps. Prices on rebuilt clutches, pressure plates and water pumps are approximately 30 - 50% below new

If you think you may have problems with your TA and would like it checked out or some questions answered call or write me Trucking is available up to most any distance at fair rates if we have enough advance notice. Two or more tractors on same load will receive discount on the trucking

Mushroom growers lobby for some import relief

NOTTINGHAM — The U.S. International Trade Commission met Monday in Washington, D.C. to consider a petition filed by the American Mushroom Institute to curb imports of canned mushrooms.

A group of about 20 Chester County mushroom growers went to Washington to make sure their representatives and congressmen from across the country know about the current situation in the mushroom industry.

The lobbying trip was coordinated by Pennsylvania Farmers Union.

Mushroom growers, mainly from the Nottingham, Oxford, and Kennett Square areas, spend two days combing the Capitol for support.

Among the influential congressmen they were able to contact were Congressmen Herman Talmadge and John English. Both sit on the Agriculture Committee.

In all, the growers got into about 130 Congressional offices.

The growers asked for a favorable statement on the troubles of the mushroom industry. They seek relief under Section 201 of the trade act which will advise the President of the problem and require him to limit imports for five years.

Twice before the growers have gone to Washington for similar relief.

The first time the ITC report was favorable to the growers but Richard Nixon turned down the committee recommendation and allowed the flood of imports to continue to grow.

The second time Gerald Ford delayed a decision so long it fell to Jimmy Carter. Carter asked the foreign nations for voluntary action to limit their exports to the United States but got none. So, there was no help for domestic producers.

The growers' lobbying session started with an orientation when the growers were briefed on facts and statistics which they may not have had at their fingertips.

Among other dismal facts they learned that 55 percent of the canned mushrooms consumed in the United States now are produced overseas. Just eight years ago that figure stood at only 19 percent.

At one point growers were told that they should "become more efficient" in order to compete with the foreign competition.

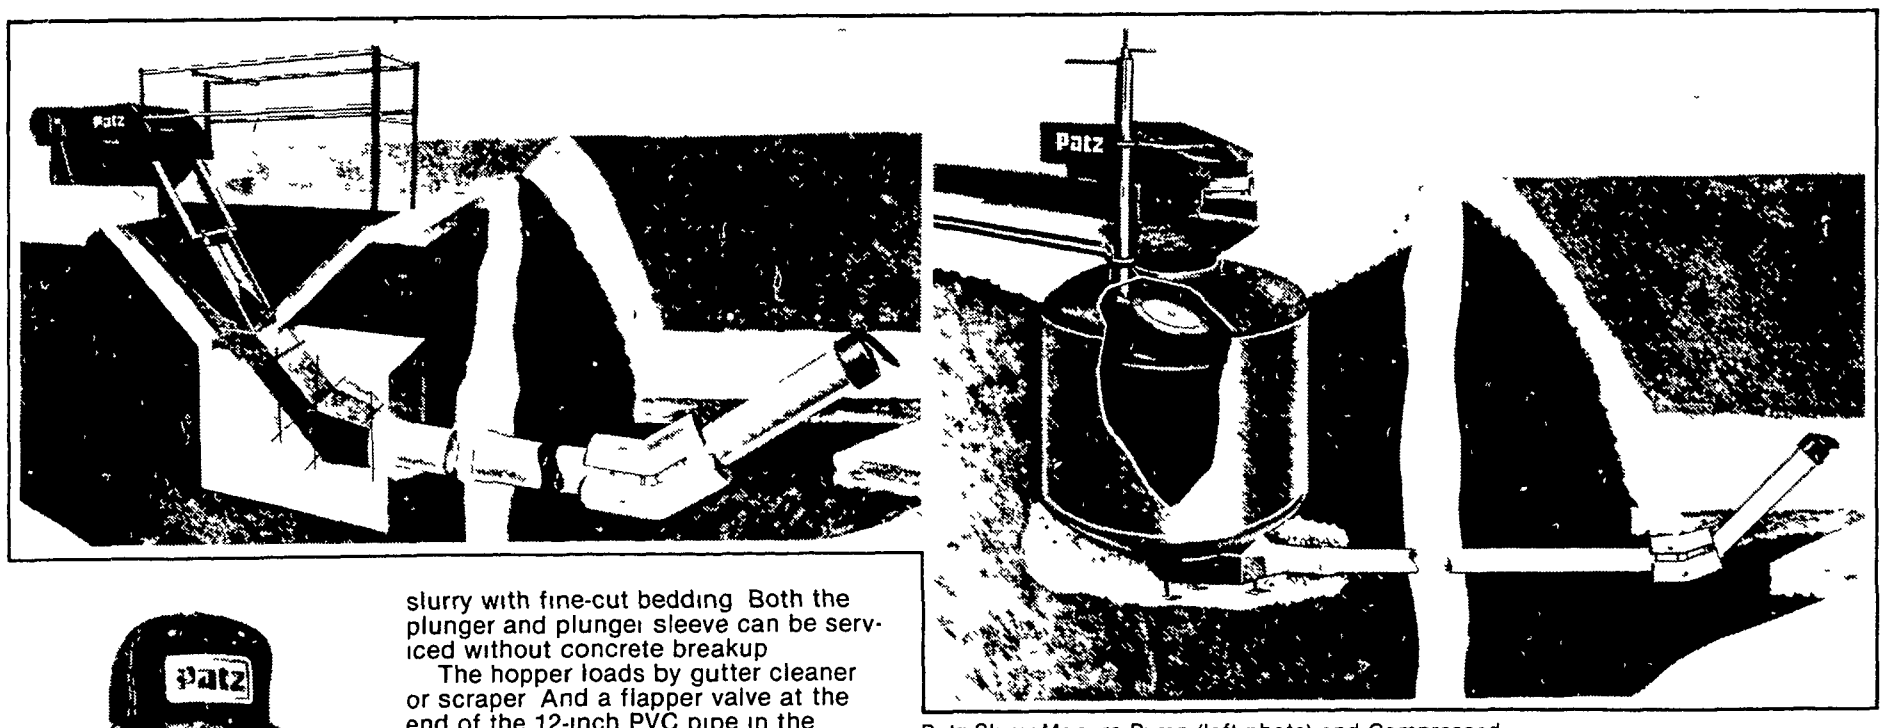
Growers pointed out that they already are the most efficient producers of mushrooms. On a square foot basis they produce more

(Turn to Page D10)

U.S. Senator John Heinz addressed growers Wednesday afternoon and was sympathetic to their requests. Boxes of mushrooms on the floor were distributed to congressional offices all over Capitol Hill.

Among those making the trip to Washington to ask for government support of the U.S. mushroom industry were Dick King, local chairman; Bob Carroll; Jim Davis; Ken King; and Marjorie Edwards. All are from the Oxford-Nottingham area.

THE PATZ SOLUTION: Controlled Manure Management



Patz Slurry Manure Pump (left photo) and Compressed Air Manure Mover (above photo)

More farmers are turning to controlled manure management to save valuable nutrients and to make manure handling easier And Patz has the equipment to help you move, store, spread and inject manure on your farm.

The Model 100 manure pump handles free-flowing manure and slurry with fine-cut bedding Both the plunger and plunger sleeve can be serviced without concrete breakup

The hopper loads by gutter cleaner or scraper And a flapper valve at the end of the 12-inch PVC pipe in the storage facility prevents manure backup.

The Model 200 compressed air manure mover features a manually-operated hatch cover and a one-way valve at the bottom of the underground tank, so wear is minimal. An air compressor provides air pressure to agitate manure in the 1,700 U S. gallon collection tank and then air pressure moves manure to your storage facility

Want to know more? Your Patz dealer will show you how to make daily manure handling push-button easy with Patz

mushrooms than any place else in the world.

But, they noted, the Taiwanese do not have to contend with the same labor problems, high hourly wages, payments into workmen's compensation and unemployment compensation funds, high taxes, regulations on spray materials, and other factors which are daily facts of life for local producers.

The growers received favorable comments from both of their U.S. Senators, Heinz, and Richard S. Schweiker. U.S. Representative Richart T. Schulze, Chester County, also promised his support.

Among the early indications of success is the fact the hearings have been moved up so the President this time around will be required to rule just before the election. Under a normal timetable, the ruling would have come just after the election.

Should the election be a close one, and should Carter need Pennsylvania to gather some more votes in November, it could be the mushroom growers will have a better than even chance of seeing the ITC take some action under Section 201.

What remains to be seen is how the industry will fare after the five year period has expired.

That is a problem which can be worked on in the interim should the growers get the temporary relief they seek.—CH

Ken King, Roy Anderson, Gene Powell, and Lou Caputo plan strategy before making their presence felt in Washington. Growers seeking relief from mushroom imports made the trip which was coordinated by Pennsylvania Farmers Union.

Robert Mullins, right, assistant legislative director for National Farmers Union, made sure Senator John Heinz knew where Pennsylvania mushroom growers stand. Heinz indicated his support of the industry.

New 4-H rifle club to start

BRIDGEPORT — All boys and girls ages 13 to 19 in Montgomery County are invited to join a new 4-H Rifle Club to start June 21; 10 a.m. at the Bridgeport Gun and Archery Club, Inc., located on route 202 and Front Street in Bridgeport.

The club will meet on alternate Saturdays up to and including August 16th, all sessions to start at 10 a.m. There is no cost to join the club but all members will be expected to pay for the ammunition that will be provided. It is recommended that you provide your own ear protection if you have it as supplies are limited.

The program is sponsored by the Montgomery County 4-H Clubs in conjunction with the instructors at the Bridgeport Gun and Archery Club.

For further details and to register in advance, call Steve Behmke at 215/279-4595 or County Agent Nancy Kadwill at 215/277-0574.

1980 small grains program closes Monday, June 16

LEESPORT — "Producers of corn, wheat, barley and sorghum should seriously consider signing up for 1980 Federal crop programs," said Mark Balthaser, Chairperson of the Berks County Agricultural Stabilization and Conservation Committee.

He added, "The 1980 Feed Grain and Wheat Program offers all grain producers commodity price and disaster insurance without an insurance premium cost. In addition, farmers will be eligible for price support loans on their crop."

The sign-up period for wheat and barley ends June 16 in southeastern Pennsylvania. Corn and sorghum sign-up must be completed by August 1, 1980.

The program offers crop price deficiency payments to producers if average market prices happen to be lower than crop target prices. For farms that are planted within the farm normal crop acreage the target prices are: Corn $2 35 per bu ; Wheat $3.63 per bu , Sorghum $2.50 per bu., Barley $2 55 per bu.

For farmers who overplanted the farm normal crop acreage, target prices are Corn $-0- per bu., Wheat $3 08 per bu., Sorghum $2.45 per bu., Barley $2.29 per bu

Low crop yields caused by natural disasters such as flood, drought, etc., will qualify enrolled producers for low yield crop payments providing the farm suffered at least a 40 percent yield loss per crop Low yield payments will be made at one-half of the target price rate Corn producers who have exceeded the farm normal crop acreage are eligible for corn low yield payments at $1.03 per bushel Producers who have been unable to plant their crop due to disaster are also eligible for benefits

"Farmers should be prepared to provide an accurate statement of planted acreage for each crop when they enroll," Balthaser said The certified crop acreage and the farm ASCS normal crop yield are the bases for all payments Producers remain eligible for target price and disaster payments whether the crop is harvested for grain or silage.

Price support loans are available for crops harvested as grain including high-moisture corn and sorghum. Price support loan rates for Pennsylvania are: Corn approx. $2.29 per bu.; Wheat $2.46 per bu.; Sorghum approx. $2.02 per bu.; Barley approx. $1.69 per bu.

All producers of grain should enroll according to Chairperson Balthaster. No set-aside is required in 1980.

Program sign-up and crop certification is being conducted by all county offices of the Agricultural Stabilization and Conservation Service. The program offers price and disaster insurance to all producers who enroll.

For further information contact your local County ASCS Office

June is dairy month

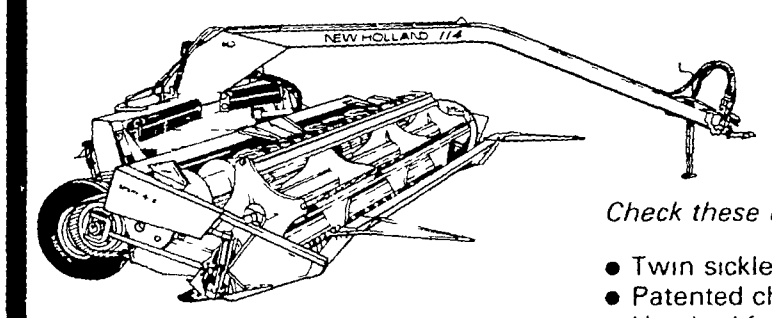
SPERRY NEW HOLLAND FINANCIAL SERVICES
MAKE IT EASIER TO HAVE THE BEST

SPERRY NEW HOLLAND ANNOUNCES

FREE FINANCE ON HAYTOOLS & FORAGE EQUIP.

WITH HAY HEADS UNTIL MARCH 1, 1981

It's new! Wide-cut, pivot-tongue windrower.



Pivot-tongue frame on the Model 114 lets you tow the windrower on either side of the tractor for cutting, or directly behind for transport. Cut both ways in the same field. Choice of 12- or 14-foot headers.

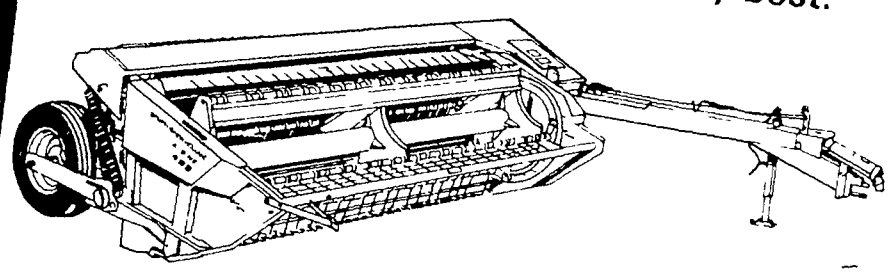
Check these exclusive features

- Twin sickles powered from both sides of the header
- Patented chevron intermeshing rubber conditioning rolls
- Header lift system raises the frame and header high off the ground — makes it easy to clear windrows and borders

See it today!

A new standard of excellence.

The Model 489 Haybine® Mower-Conditioner is designed for operators who demand the very best.



The king of the nine-footers features

- Rolls mounted in the main frame — not in the header.
- Chevron intermeshing rubber conditioning rolls
- Gear driven conditioning rolls.
- Enclosed, balanced wobble drive.

See it today

Rolareel header and self-propelled convenience.

The model 1495 Haybine® Mower-Conditioner from Sperry New Holland.

- Unique Rolareel header picks up down and tangled crop - feeds directly to rolls!
- 12-foot, 3-inch cut!
- The only 12-foot SP that lets you windrow or swath!
- 9-foot, 2-inch chevron intermeshing rubber conditioning rolls - over 36 inches longer than any competitive unit!
- Stable, four-wheel stance
- Choice of gas or diesel
- Planetary or hydrostatic drive

Ask the VMD

Leon Riegel — Tim Trayer — Edgar Sheaffer

If you have a question you would like answered by the team from Valley Animal Hospital, send it to Ask the VMD, Box 366, Lititz, Pa. 17543. Questions will be kept anonymous on request.

Atrophic rhinitis got your pig's nose out of shape?

A reader asks:

I have recently had a diagnosis of atrophic rhinitis in my swine herd. What exactly is this disease?

Dr. Trayer comments:

Atrophic rhinitis is a very common infection problem in swine herds in the Midwest, and it is becoming more of a problem in Pennsylvania.

This disease is thought to be caused by a bacterial infection of the nasal passages of the young pig, usually from one to three weeks of age.

The bacteria, bortitella bronchiceptica, invades the nasal passages and begins to invade the scrolls. These are the very circular portions of the upper airways of the nasal passage of the pig.

The bacteria distort the scrolls and cause inflamation, eventually destroying the cartilage material. This causes the nose to bleed and/or deviate to the right or left.

In the most severe cases where both right and left nasal passages are destroyed, the deviation to the left and right tend to balance one another.

If you see any of your young animals with the classical clinical signs of blood dripping from their noses or nose deviations to the left or right, you have atrophic rhinitis problems no matter what the percentage afflicted.

This disease can be a 'sleeping' disease. You can start out with what you consider to be a fairly clean herd, free of any signs of atrophic rhinitis. Then over a period of four to five years, you begin to have clinical cases.

What causes this outbreak? In your breeding program, there may be a sow that did not have enough contamination as a young animal to affect her nasal passages. But, the infection may have set up a residual bacterial growth that is now being passed on to the baby pigs in the farrowing house.

How does this happen? A baby pig can be sniffing around its mother's nose, the sow sneezes, politely infecting the baby pig as it snorts up the infection into its little nostrils.

Over several years of selection, you build up higher and higher levels of contamination in the breeding stock, eventually overwhelming the natural defenses.

That's when cases of atrophic rhinitis begin to crop up on the finishing floor or in the breeding stock with its diagnostic signs of bent and bloody noses.

Another sign that is a good indicator of the possibility of atrophic rhinitis (especially in feeder pigs or on the finishing floor) is a crescent-shaped, black 'mascasra' below the pig's eyelid.

This smear of dirt between the nose and eye is an indication of an unusual amount of tears shed by the pig. The tear tracks are actually caused by dust clinging to the moist skin under the eye.

Why is this a sign of atrophic rhinitis? As the inflamation of the upper nasal passages occurs, the swelling blocks off the duct that normally drains the fluid that lubricates the eye. This duct normally carries the fluid from the eyelid to the nose, and out the end of the nostrils.

As a result of the blockage, the tears flow over the rim of the eyelid, and the dust begins to collect under the eye.

Another tell-tale clue may be a constant sneezing when the pigs are stirred up after they've been sleeping. This, linked with other clinical signs, points to atrophic rhinitis rather than pneumonia, the other possibility.

If farm records show that over the years there has been an increase in time (over 110 days) to finish hogs from 40-220 pounds, or a decrease in feed efficiency, it may be a hint of an underlying health problem—atrophic rhinitis.

How can you be sure your herd definitely has atrophic rhinitis? The only sure way to know is to have someone who knows what to look for examine the head of the slaughtered animal. The state diagnostic laboratory or your local veterinarian will do the examinations for you.

Twenty to thirty percent of the heads should be checked. If you have clinical signs of atrophic rhinitis active in the herd, you need to consider either depopulation of the herd or a vaccination program.

The vaccination program uses a killed bacteria so that you cannot introduce the infection into your herd.

Be sure your supplier has handled the vaccine carefully. It cannot be frozen or too warm, or it is worthless. The vaccine costs between $18 to $20 per vial, so you want to be sure you're not wasting your time and money.

Be sure to use good asceptic technique when administering the vaccine or you will cause abcesses to develop.

Try to set up a vaccination program where you will use an entire vial of vaccine, not having any partial vials leftover.

Follow label directions. Some companies recommend that you vaccinate the sow prior to breeding, then again two weeks prior to farrowing, and follow by vaccinating the baby pigs 7 and 28 days after they're born.

It's easy to see where a vaccination program will mean an increase in labor and vaccination cost for at least 2 to 4 years.

Once the vaccination program has been in effect those 2 to 4 years, you will be able to stop the vaccination program. In that time period the baby pigs that have been produced under the vaccination program will have developed an immunity to the disease, and the old contaminated sows in the breeding stock should have been eliminated.

If you are starting out new or have gone the route of depopulation, you can be sure of a clean herd by buying your stock from an SPF producer, specific pathogen free hog producer.

The only disadvantage of buying from an SPF herd is that these animals must be kept in strict isolation. They do not have the same levels of immunity as other animals and are just as susceptible to all diseases affecting breeding stock.

June poultry conference to feature economics

LANCASTER — The 1980 Pennsylvania Poultry Conference on June 26 at the Host Corral in Lancaster will focus on the difficult economic situation as well as production, processing and marketing issues.

The all-day conference open to everyone will hear noted economic columnist, Robert Metz of the New York Times, speak about the "State of the Economy" and distinguished publisher of the Poultry Times, John Yarbrough, speak about the "State of the Industry".

In addition, at the separate broiler, egg, and turkey conferences, John Pedersen of Poultry and Egg Fax of Stone Mountain, Georgia, will present a "Price and Production Outlook" for each commodity.

The Broiler Conference will also include Lionel Barton, University of Arkansas, discussing "Trends in Housing and Management"; Arnold Giesemann, USDA, providing a "Processing Issues Update"; and Allon Lefever, Victor F. Weaver, Inc., providing the management perspective on "New Approaches to Feeding" with Richard Peacock, Pennfield Corporation, providing the nutritionist perspective.

The Egg Conference will include Don Bell, University of California, discussing "Cage Selection and Management"; Dan Gardner of Milton Walbaum Company, Nebraska; discussing "Marketing Techniques for Shell, Further Processed, and Dried Products"; and Edward Buss, Penn State University, discussing "Genetic Selection for Egg Shell Quality".

The Turkey Conference includes Elmo Long, Goldsboro Milling Company, North Carolina, discussing "Day-Old Debeaking"; Robert Berg, University of Minnesota, discussing "Three Stage Brooding"; and Herb Jordan, Penn State University, discussing "Automatic Waterers for Poults and Other Management Techniques".

The conference is sponsored by the Pennsylvania Poultry Federation as a service to Pennsylvania poultrymen and any interested persons.

A nominal registration fee of $15 is required to partially defray expenses, but the majority of the costs are borne by the Federation.

The conference begins at 9:30 a.m. (a continental breakfast is provided free up to 9:30 a.m.) and concludes at 4 p.m. A luncheon buffet is available from 11:30 a.m. to 1:30 p.m. for $7.

The Federation holds its Annual Banquet in the evening which is also open to all interested persons. The primary purpose of the Banquet is to announce the 1980 Broiler, Egg, and Turkey Industrymen of the Year and features a social hour, dinner, and entertainment.

Noncertified egg groups can change status

LITITZ — Assistant Secretary of Agriculture Bobby Smith said the Department of Agriculture soon will request nominations for new members of the American Egg Board and egg producer groups not already certified to nominate members may file requests for certification until July 1.

Two-year terms for nine current board members and their alternates will expire at the end of 1980. Only certified egg producer organizations, associations or cooperatives are eligible to submit names of nominees to fill these positions, Smith said.

The 18 member board administers the Egg Reserach and Promotion Order, which was authorized by the 1974 Egg Research and Consumer Information Act. Sixty organizations are certified by the Secretary of Agriculture as eligible to nominate members and alternates to the board.

Representatives of organizations wishing to be certified should contact David Gpalding, Agricultural Marketing Service, Rm. 2610-S, USDA, Washington, D.C. 20250, telephone, 202/447-2068, for certification request forms and information concerning eligibility requirements.

IS YOUR HAY WORTH $140/TON?

Or Are The "Elements" Stealing Your Hay Dollars

Fertrell Nutri-Sil is a management tool that enables you to make better hay. Hay can be put up at higher moisture levels which means LESS LEAVES SHATTERING, MORE BALING TIME each day, and biggest advantage perhaps, BEATING THE "ELEMENTS" OF THE WEATHER.

An application cost of about $2.50 could give you an increased nutritional dollar value of $30-$40/Ton or more.

Based on a recent test, Fertrell Nutri-Sil hay had a nutritional value worth $140/ton. Dollar value was based on 44% soybean meal and ear corn for equivalent values for protein and energy.

NUTRI-SIL FORAGE INOCULANT

A Probiotic culture providing the bacteria required to cut hay losses and improve quality.

- Easy to apply
- Reduces nutritional loss
- Helps control heating
- Improves palatability
- Improves digestability
- Helps eliminate spoilage
- Non-corrosive, nontoxic
- Non-chemical, safe to use

Bradford County names new dairy princess

BY JANE BRESEE
Staff Correspondent

TROY — Miss LuAnn Shedden of Troy, R1, daughter of Mr. and Mrs. Dale F. Shedden was crowned as the new 1980 Bradford County Dairy Princess at the annual Dairy Princess Pageant, held Saturday at the Troy High School Auditorium.

Miss Shedden will be a senior at Troy High School this fall and after graduating plans to become a legal secretary. She plays an active part helping her parents run a 60 Holstein cow Dairy Farm which has been in family for 70 years.

Miss Sharron Earls, daughter of Mr. and Mrs. William Earls of Bentley Creek was named Miss Congeniality by the other contestants. She was also awarded the prize of $25 as Second Runner-Up.

The First Alternate, winning a $40 award, was Miss Pat Avery of Gillett, daughter of Mr. and Mrs. William Avery.

Other contestants were: Bonnie Elvidge, of R1 Milan; Eileen Saxton, R3 Troy; Carolyn Bean, R2 Athens; and Carol French of Athens R2.

Judges for the contest were Janet Hart of Forksville, Pennsylvania; Marsha Meister, of Greene, New York; and Jeff Patton of Wilkes-Barre, Pennsylvania.

Crowned Saturday as 1980 Bradford County Dairy Princess, Miss LuAnn Shedden sits on the throne holding a bouquet of red roses. Miss Penny Allen, 1979 Dairy Princess, stands beside her.

Master of Ceremonies for the occasion was Bruce Bresee of Ulster. The singing group, The Late Bloomers of Canton, provided the entertainment.

Miss Penny Allen, 1979 Dairy Princess, was completely surprised by an award presented by Brian Harris of East Smithfield, general chairman of the event.

For meeting and surpassing certain standards set by the Dairy Princess Pageant of the State such as number of news articles and appearances, she was given $100. She was given an additional $100 from the local Dairy Princess Committee.

The Dairy Princess Pageant climaxed a day long list of events starting with a 74 unit parade, one of the largest in the 17 year history of the Dairy Festival. Other activities creating much old-fashioned fun and excitement for the large crowd, were a milking contest, a square dancing exhibition, a milk chugging competition, exhibition of antique dairy equipment, a pie baking contest, and a variety of food booths.

Miss LuAnn Shedden, the new Bradford County Dairy Princess, will be appearing at the Pennsylvania State Dairy Pageant in September sponsored by the Keystone Milk Marketing Council, Inc.

Mr. and Mrs. Dale Shedden are the proud parents of the new Bradford County Dairy Princess, LuAnn Shedden.

ZERO TURNING RADIUS MOWERS
DIXON ZTR

INTRODUCING.. The Newest Innovation In Grass Mowing
"The Energy Saver"

DIXON ZTR mowers save your time at every turn.

DIXON ZTR mowers save time every place ordinary mowers waste it: trimming corners, around trees, at every turn! That's Mowbility

Owners tell us that Zero™ Turning Radius saves up to half their mowing time, and sometimes even more. They tell neighbors how easy the mower operates, how they enjoy using it, what a great job it does — and most of all, it leaves them mower time for fun

But don't take our word for it; try it yourself A few quick turns to get the feel of its simple hand levers, and before you know it you'll turn yourself into a DIXON owner! Come in for your free test drive at any one of these participating Dealers

DEALER INQUIRIES INVITED

Kick the cucumber beetle off vine crops

UNIVERSITY PARK — It is practically impossible to grow cucumbers, melons, and squash if you're not controlling the cucumber beetle, says Penn State's Robert Tetrault, Extension entomologist.

According to Tetrault, the striped cucumber beetle is about ¼ inch long. It has a black head set against a bright yellow thorax (section behind the head).

The beetle's wings are yellowish green in color and are decorated with three black stripes.

A slight variation to the striped cucumber beetle is its cousin the twelve-spotted cucumber beetle. This close relative is distinguished by its six black spots on each wing cover.

Finding a safe, warm place to rest out the cold Winter, these crafty beetles wait out the coming of Spring. So that they are well prepared for their attack on the seasons vine crops, they emerge before their favorite foods are available.

As plants start to emerge, they eagerly move to their favorite hosts. The female beetles lay about 100 eggs over a long period of time, producing one generation each year.

With the hatching of the eggs, the young cucumber beetle worms begin to feast on roots, fruits, and vines.

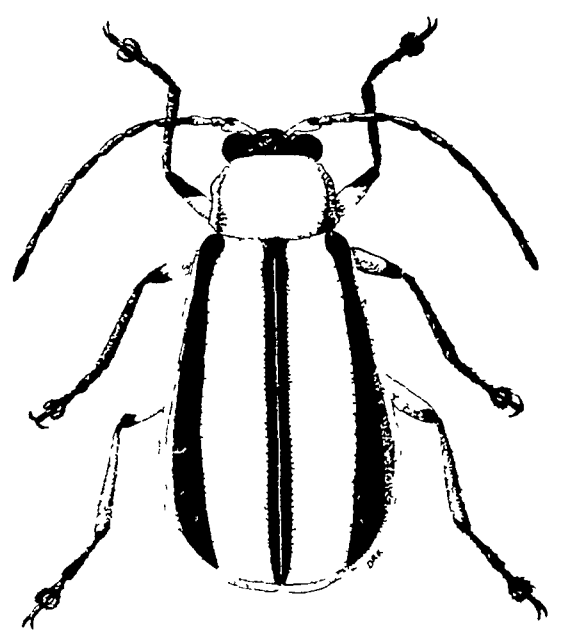
The adult beetle finally makes its debut in late Summer or early Fall.

The baby and adult beetles do the most damage to the young plants emerging from the soil. The shock of having huge holes chewed in their tender leaves severely stunts or even kills the plants.

As if deforming the plant and causing its death wasn't bad enough, the beetle's attack opens the door for other plant enemies, such as bacterial wilt. If the plant might have survived the beetle's onslaught, it rarely can survive the bacterial invasion.

How can the skirmish with the cucumber beetle be avoided. In some instances, a practical defense is obtained by covering the young plants with hot caps or netting.

When the protection is removed, sprays are usually required to control the beetles. Penn State advises that plants be sprayed weekly with methoxychlor 50 percent wettable powder—2 tablespoonfuls per gallon of water.



Thomasville 4-H meets

BAIR — The monthly meeting of the Thomasville 4-H club was held May 27, 1980 at the 4-H Center, Bair.

The following upcoming events were discussed: June 6, 1980, Family Movie Night and Strawberry Roundup; June 10, 1980, five county day camp; June 21, 1980, Chicken Bar-B-Que; June 23-27, 1980, Leadership Congress.

The next meeting will be June 24, 1980 with practice for the 4-H Olympics.

Brief answers to short questions

Sheila's Shorts

By Sheila Miller

To farm or not to farm . . .?

How many of us have heard someone say, "If I knew then what I know now . . ."?

Most of the time, that person is referring to a major decision in life that might have turned their life around if they would have made the 'right' decision.

Young or old, there are times when everyone would like to know whether they are making the right decisions for their lives.

Take for instance Mr. and Mrs. W.R. Leonard of Magnolia, New Jersey.

Mr. Leonard writes:

I am 40 years of age and would like to get into farming (preferably dairy) for making a living.

I have had an interest in farming for many years and have worked for a farmer in Bordentown, N.J. during my vacations. He feels, after working with me and showing me the 'ropes', I could make it.

As of now, I have a 10 year old, beautiful bi-level home in New Jersey that I could sell very easily. I have a nice paying job in Philadelphia. And, I have a wife and four elementary-school-age children.

I would like to sell my home and go into farming either on a full or, if need be until I can get started, a part-time basis.

But, I need someone to go over the many, many questions that plague me before making that final move. I have talked with a county agent in Burlington who tried to discourage me from going into the farming business.

I would like to know if it would be best to go into a small farm and keep my present employment, which would insure me of a decent income or leave the position I'm in now, sell my home, and go into a larger farming operation full-time (which is what I really want).

The main problem would be supporting my family when just getting started in a field with which I have very limited knowledge.

I am extremely ambitious and hard work doesn't bother me at all, especially when it's for something I thoroughly enjoy.

Could you please tell me who I could get in touch with to go over my plans and questions I need answered so badly?

Well, if you get any of the feelings I got after reading Mr. Leonard's letter, you'll be filled with mixtures of 'Good for you' and 'You're absolutely crazy'.

How do you answer a question like that . . . one that could influence this person and his family for the rest of their lives?

First off, Mr. Leonard, I know of many people who would be glad to answer your question of "to farm or not to farm", but they would be biased toward their own interests.

If you talk to a realtor about a particular farm, they will be the first ones to tell you how great the farm is for raising kids, getting away from the rat-race of city life, and maybe even raising some animals and crops.

Your financial advisor will probably tell you there are better places to put your money, and it won't take any effort on your part to make money.

Let's face it, unless you have at least ten years of experience, all your equipment and cows, plus a cheap farm in the works, most bankers and county agents will wrinkle their foreheads and sharpen at least a dozen pencils when you sit down.

Who should you talk to? I recommend you sit down and talk to yourself first. Sounds abit crazy, huh?

You need to ask yourself 'Am I ready to make the sacrifices that farming demands? Can I live without a four-week paid vacation? Can I give up a job that provides a steady salary with predictable hours?'

Try to put yourself in the farmer's boots 12 months out of the year, 24 hours a day because those are the hours of a full-time farmer.

Next, ask yourself, 'Do my wife and children want to farm, too?'. If you don't have their support, you've already got one strike against you on an uphill battle.

Once you're sure you have the farming 'bug' in your blood and you're ready to get up before the sun rises and go to bed long after it sets, you're ready for the next advisors.

Arm yourself with all your financial records, tax returns, property values, et cetera, and sit down with your accountant, lawyer, loan officer, or farm management specialist.

The important thing to remember is to consult someone who will more than likely remain objective. You need their unbiased assessment of the economic feasiblity of your proposed farming venture. You're too wrapped up in the emotional desires of wanting to farm to be 100 percent realistic

Once the figures have painted a picture of financial loss or income, you will be able to see whether you still want to forge ahead with the farming idea or give it up.

If you're like most of us, even if the economists say there is no way to make money in farming, you'll probably still go ahead.

There are so many factors that come to play in whether a farm operation is a success or failure. These types of things will depend on where you plan to farm, the cost of the land, the length of growing season, the types of crops that can be raised, the closeness of markets, the cost of livestock and equipment, and your experience.

In farming there are no guarantees—it's a gamble whether you're just starting out or have been in business for years.

My recommendation is, pick an area where you and your family would like to settle; scout out the area for farm sales; talk to some of the farmers, especially dairy farmers if that is the direction you're heading; find out who they ship their milk to and if they have any problems with handlers, inspectors, housing developments, planning commissions, or anything else.

Once you have a specific area and farm narrowed down, it will be a little easier coming up with estimated costs of establishing your farm operation.

Then you can go to the local USDA offices for information on loans available to help farmers, support programs in case of crop failures, and conservation programs. This information can be obtained from the Farmers Home Administration and the Agricultural Stabilization and Conservation Service.

The Soil Conservation Service can take a look at the soils on your prospective farm and tell you what crops will grow best, what the expected yields would be, and if there are any special limitations.

You can always contact an agricultural university in the state you plan to settle in, and talk with their farm management specialists about your plans and ideas.

In Pennsylvania, you could contact either Penn State or Delaware Valley College for their wealth of specialists in just about any phase of agriculture.

Look to the leaders in the area where you want to settle and talk to them. Study the various management set-ups, cropping systems, equipment, and breeds that other farmers have in their operations.

Start attending special training workshops, taking short courses in record-keeping, feeding, and other areas where you might need more information. And, read newspapers, periodicals, and books so that you keep up-to-date and develop a reference file for special problems.

From what you've said in your letter, I would recommend you get into farming gradually over a five year period or longer. The fact that you are 40 years old won't affect you in farming where there is no mandatory retirement age.

This will give you the time and experience you need to learn first-hand the in's-and-out's of farming. The outside income of another job will help to smooth over some of the mistakes without making financial set backs into life-or-death situations.

You might even consider working for another dairy farmer full time, compensating the normally lower salary with the education and the first hand experience your family can have living on the farm.

It's a tough decision, no matter how you look at it. And, no one will have all the answers for you.

The main thing to remember is not to become discouraged with pessimistic people. Most farmers will tell you they don't make any money, and farm specialists will tell you that you can't get into farming without money, and a lot of it.

On the other hand, don't just talk to farmers with white-board fences, milking parlors, and show champion cows. Those types of operations are nice to dream about and aim for, but they take time, effort, and dollars to come true.

I guess what I'm trying to say is 'How badly do you really want to farm?'. 'Are you willing to lose everything you've got now if you should fail?'

If this doesn't make you miss a stride in your steps to become a farmer, then climb aboard the tractor. I'm sure you'll find your fellow farmers supportive, full of helpful advice and willing to teach a semi-greenhorn like yourself.

Like one dairy farmer said to me several years ago, "Just shut your eyes and jump into farming with both feet. When it comes down to whether you sink or swim, you'll paddle alot faster if you're in the water rather than standing safely on the shoreline just thinking about getting your feet wet."

4-H teens receive statewide recognition

HAMBURG — Two of Pennsylvania's outstanding 4-H members had been named to attend the West Virginia Older 4-H Members' Conference, June 22 to 28, 1980 at Jackson's Mill, West Virginia.

Recipients of this trip are Danielle Yoder of Hamburg, Pa. and Todd Grice of Washington, Pa

Danielle is the daughter of Mr and Mrs. Daniel Yoder of Hamburg. She will be a senior at Hamburg Area High School in the fall where she is a member of the National Honor Society as well as a member of the varsity hockey, basketball, and track teams; and is a nine year member of the Tilden Community 4-H Club of which she served as club president in 1979.

Danielle has a variety of interests which are reflected in her 4-H project work: wildlife, clothing, ecology, bicycle, pet care, entomology, work with the handicapped, crocheting, terrarium, plantarium, hiking, photography, canoe safety, CPR, recreation, cake decorating, citizenship project involving senior citizens, and teen leadership.

The Conference at which Danielle will be representing Pennsylvania 4-H will be a week long program consisting of discussion groups, arts & crafts, drama, music, recreation, dance and a variety of heritage type activities. The theme is "Pushing The Positive" as we move into the eighties.

The Conference is sponsored by the Division of 4-H Youth Development Center for Extension and Continuing Education, West Virginia University.

York 4-H hort club meets

YORK — The York County 4-H Horticulture Club met at the 4-H Center on May 29.

As part of the program, flowers were planted around the Center. The horticulture, flower and vegetable judging teams met, along with other interested members. A slide show on identifying weeds and insects was presented.

After the meeting, a party was held for Tom Markovits, who was leaving his extension post.

USDA to study need for equine testing

WASHINGTON, D.C. — Assistant Secretary of Agriculture P. R. "Bobby" Smith has called for the naming of a panel of experts to study the need for the testing of imported horses for equine piroplasmosis.

The department's Animal and Plant Health Inspection Service had published a notice in the April 27, 1979, Federal Register proposing that EP testing be dropped. Much controversy has been expressed relative to the pros and cons of such action.

Therefore, before any final action is taken, a panel will be selected to hold a public meeting on the proposal. The objective of the meeting is to obtain more information relative to the seriousness of the disease and the impacts of removing the test requirement from the regulation.

According to Francis J. Mulhern, APHIS administrator, the department is particularly interested in receiving information from scientific experts, who have had firsthand experience with the disease, both in the U.S. and abroad.

Equine piroplasmosis is caused by a tick-born microscopic parasite that destroys red blood cells. Although the disease is rarely fatal and some infected horses may never show symptoms, it can weaken horses through anemia and liver damage.

The members of the panel will be announced in a future issue of the Federal Register together with the date and place for the public meetings. Anyone interested in further information may contact David Herrick, APHIS import veterinarian, 6505 Belcrest Road, room 817, Hyattsville, Md. 20782, phone 301/436-8530.

Food At Auction

Door-to-door contracts can be canceled

YORK — Magazines, encyclopedias, children's photographs, home improvements and cosmetics – these are just a few of the products and services sold door-to-door. Unfortunately, says Joan Lamberson, home economist some salespeople take advantage of consumers.

The consumer should be aware that he is protected by federal and state laws. For contracts over $25 signed in your home, sellers in Pennsylvania must:

Give you a copy of the receipt or contract with the date of the sale, the seller's name and address, and – near where you sign your name – a statement informing you of your right to cancel without penalty within three business days.

Give you a Notice of Cancellation form which contains, along with the sale date and seller's name and address, a full explanation of your right to cancel without penalty. This also tells you how to proceed with the cancellation as well as the final date by which you can cancel.

If you wish to cancel your contract – whether a magazine order, your new roof, or the downspouting you realize you can't afford – you must then sign, date and return the Notice of Cancellation form to the seller within three business days.

The state Bureau of Consumer Protection recommends that you send the letter by certified mail. Keep the receipt to prove that you did send the cancellation notice on time.

Once you have followed this procedure, the seller must: return your money within 10 days. Pick up the merchandise with 20 days. If the seller fails to retrieve his merchandise, you may use it or dispose of it in whatever way you wish.

MR. AND MRS. RICHARD ERICKSON

York winners chosen for national awards program

YORK — Thirty-six York County 4-H'ers were selected as the 1980 county winners for the 4-H National Awards Program.

They were chosen for their depth in project work, participation in local, county and state events, and their leadership skills. These 4-H'ers records are being judged on the state level.

The top six 4-H'ers in each project area from across the state will be interviewed and the state winners will be selected. Last year York County had 23 Keystone Interviews, five State winners and three out of four National Winners in Pennsylvania.

York County's outstanding 4-H'ers include: achievement - Steve Trostle, Red Lion; agricultural - Robert Livingston, Dover; automotive - Jon Miller, Seven Valleys; beef - Brenda Walter, Airville.

And bicycle - Jon Janney, Brodbecks; bread - Dawn Raubenstine, Hanover; citizenship - Linda Brown, Loganville; clothing - Joanne Haskins, Spring Grove; commodity marketing - Christine Sunday, York; conservation - Joanne Haskins, Spring Grove; dairy - Jon Miller, Seven Valleys; dairy foods - Nancy Eisenhart, Thomasville; dog - Dave Detter, Dover.

Also, electric - Bryan Palmer, Loganville; entomology - Hans Spahr, Dover; field crops - Roy Thompson, East Berlin; food conservation and safety - Michele Bankert, Hanover; foods and nutrition - Nancy Eisenhart, Thomasville; food preservation - Kathy Bortner, Hanover; forestry - Carol Haskins, Spring Grove; gardening - Rita Laughran, Dallastown.

Also honored were health - Lisa Dobrosky, Glen Rock; home environment - Kathy Bortner, Hanover; home management - Dawn Raubenstine, Hanover; horse - Brenda Walter, Airville; leadership - Laurie Dobrosky, Glen Rock; petroleum power - Roy Thompson, East Berlin; photography - Linda Brown, Loganville; poultry - Marcia Lecrone, Lineboro, Md.; public speaking - William Wise, Spring Grove; recreation - Judy Waltersdorff, York; safety - Bryan Palmer, Loganville; sheep - Lisa Dobrosky, Glen Rock; swine - Steve Trostle, Red Lion; veterinary science - Susan Janney, Brodbecks; and wood science - Laurie Dobrosky, Glen Rock.

Dairy art contest set

SCHUYLKILL HAVEN — Children from kindergarten to grade six are eligible to participate in the 1980 Dairy Art Contest to be held at the Fairlane Village Mall on June 21, 1980, in cooperation with Schuylkill County Agriculture week.

Art supplies will be available from 10 a.m. till 3 p.m. for the youngsters to stop by and create their version of the theme — "Milk's the One."

Judging will occur at 4:00 p.m. with two awards being presented for best expression of theme and one for best design in two age categories — kindergarten to grade 3, and grade 4 to grade 6.

Contestants need not be present to win.

CHEESE

Lebanon to choose new dairy princess

LEBANON — The Lebanon County Municipal Building auditorium will be the scene for our 1980 Lebanon County Dairy Princess Contest. The date is Saturday evening, June 28th at 7:30 p.m.

M C for the evening will be Alan Hostetter. Judging the contestants will be Jay Kopp, dairy farmer from Dauphin County; Mrs. Ruth Krebs, elementary reading specialist, and Debra Kreider, Kreider Dairy Farms, Manheim

Present Lebanon County Dairy Princess, Miss Dianne Maulfair, will give her farewell speech and crown one of our five contestants 1980 Lebanon County Dairy Princess.

The following girls are competing in the contest:

Debra Berger, a 1980 graduate of Northern Lebanon High School. She is 18 years old and daughter of Ray and Marian Berger of Route 1, Fredericksburg. Her family has a herd of 27 cows and 37 heifers.

Melody Ann Bomgardner, of 490 Royal Road, Annville, is 16 years old. Her parents are Mr. & Mrs. LeRoy Bomgardner. Melody will be a senior at Annville-Cleona High School Her family owns a herd of 32 Holstein cows.

Beverly Burkholder is the 17 year old daughter of Ivan and Gloria Burkholder of Route 4, Lebanon. Beverly will be a senior at Annville-Cleona High School. Her family owns a herd of 75 Holstein cows.

Kathy Kettering of 1733 Russell Road, Lebanon, is the daughter of Perry and Jeanette Kettering. She is 18 years old and a graduate of Annville-Cleona High School. Her family owns 18 Holstein cows.

Elaine Maulfair is the 17 year old daughter of Paul and Marian Maulfair of Route 1, Jonestown. She is the graduate of Northern Lebanon High School, Class of 1980. Her parents have a herd of 40 Holstein and Ayrshire cows.

The public as well as family and friends are invited to attend. Refreshments will be served in the cafeteria following the contest.

On Wednesday evening, June 25th at 7:30 p.m. in the Lebanon Mall, the girls running for the 1980 Lebanon County Dairy Princess contest will be present making butter and handing out samples to the public. Come out and meet and talk with the girls.

PUBLIC AUCTION

OF VALUABLE FARM REAL ESTATE

TO BE SOLD BY RECEIVER

Approximately 585 Acre Dairy Farm Somerset County, Pennsylvania. (Real Estate of Gnagey Brothers A Partnership, to be sold by receiver).

WEDNESDAY, JUNE 25

At 11:00 A.M.

Sale Site: Main farm complex located in Elk Lick Township, along Legislative Route L.R. 55017 in St. Paul, near Meyersdale, Somerset County, Pennsylvania, approximately 30 miles South of Exit 10 (Somerset) of the Pennsylvania Turnpike.

PROPERTY: Real Estate will be divided into 2 distinct farms described below, which will first be auctioned separately. The highest separate bids will then be subject to a higher single bid for the 2 combined forms.

A. Main farm consists of approximately 295 acres and includes 3 barns, silos, milking parlor, bulk tank building with 1,000 gal. tank, miscellaneous outbuildings, and 3 residential houses, 1 of which is subject to a life interest of an individual aged middle 80's.

B. Second farm is located 1½ miles from main farm and consists of approximately 290 acres with large wooded section, and includes frame bank-type barn, miscellaneous outbuildings and a residential house.

Terms: 10% down sale day, certified or cashiers check, or regular check accompanied by irrevocable bank letter of credit. Sale is not conditioned on buyer's obtaining financing. Sale will be with reserve and is subject to court confirmation.

Farm will be open for inspection Saturday, June 14, from 9:00 to 4:00. For appointment call Merle Mishler, Auctioneer.

Erdenheim Farm to sponsor judging clinic

FLOURTOWN — Erdenheim Farm, Flourtown, in cooperation with Penn State Cooperative Extension Service, is sponsoring a 4-H and FFA Judging Clinic on June 18 starting at 9:30 a.m.

The day will start with a general tour of the farm owned by Eugene Dixon, followed by an explanation of judging of beef, sheep and swine. Official for the clinic is Chet Hughes, Northeast Field Manager of the American Angus Association.

Following the presentation of judging a class of each species will be presented for those attending to place. Ribbons will be presented to the top ten individuals in the Junior, Senior, and Adult Division with plaques going to the highest individual in each division.

The clinic is open to all 4-H and FFA members and their families with an interest in livestock.

For further information contact Nancy Kadwill, County Agent, 400 Markley Street, Norristown, 19401 215/277-0574.

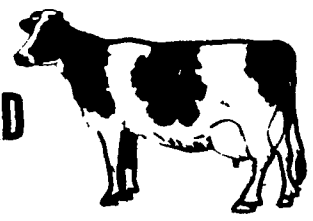
WATKINS COMPLETE HERD DISPERSAL


Located just off Rt. 15 on Canoe Camp Creek Rd., 5 miles from Mansfield, Pa. Watch for auction arrows.
TUESDAY EVENING, JUNE 17, 1980
At 8:00 Sharp
96 REGISTERED AND HIGH GRADES 96
65 Hi-Grade Holsteins - 26 Brown Swiss, 12 reg. 4 Jerseys. 1 Red & White Holstein.
Herd consists of 55 mature cows in all stages of lactation, 16 yearlings, 25 calves ranging from 1 to 7 months. Preg. ex. interstate tested, charts day of sale.
SOME OF THE TOP COWS:
No. 10. A grade Fleetridge Monitor purchased at the Winston Rumsey sale had 108 lbs. of 3.6M for tester; proj. for 20,861m, 689F, 4.0T. You will like this cow. No. 3 milked 91.3 of 4.4M preg. for 17,681m, 796F,No. 18 milked 80.8 proj. for 17,707M, 682M, No. 75 milked 66.5 proj for 17,092M, 717F, No. 34 milked 73.3 proj. for 17,129M, 704F, No. 86 milked 87.3 proj. for 16,455M, 620F
Sales Mgr. Note: Butch & Becky have just recently begun to feed these cows to get good production until just the last 2 mo. They had a small amount of grain, pool hay and fairly good silage. I think that most of these cows have just begun to milk at their potential. A good group of calves and heifers

To Be Held At

SMOKETOWN QUALITY DAIRY SALES, SMOKETOWN, PA. Rt. 340, 5 miles East of Lancaster, 5 miles West of Intercourse.

There are 47 head of cows, including 1st and 2nd calf heifers. All home raised - calfhood vaccinated. T.B. & Blood tested within 30 days. Last winter this dairyman shipped a ton of milk a day. For the month of May he was shipping 3900 lbs. every two days. Creamery test 3.8-3.9. Herd was sold due to illness of owner. This is a good uddered herd and was never pushed for high production.

They are strong rough boned cows that will make good foundation cows for the future. About 75 percent of this herd are due from June to Nov. The rest are strictly fresh or just bred back. Average age of this herd is 4 yr. 1 m.

This herd of cows are bred by the Eastern A.I. sires, and out of A.I. sires.

Selling 20 Reg. cows our pick out of a herd of 48 cows, 4 just fresh, 4 dry and 12 fall and bred back cows. Fresh cows milking over 80 lbs. and bred back cows still milking up to 50 lbs. per day.

Sires include - Provin MTN. Ivanhoe - 87 pts. due July 30. Bred to Thonyma East Star.

Sire - Rockway Golden Gem. 86 pts. due June - Bred to Rippchen Boot-Nick.

Sire - Amberley Burley Laird - 83 pts. - Fresh.

Sire - Wilbur Holm Model Fob - 82 pts. - Fresh.

Sire - Amberley Burley Laird - Bred to Thonyma East Star.

4 yr. - Amberley Burley Laird - Granddam made over 200,000M, and still milking.

Other sires include: Five - Ecraso Worthy Master; Five - Rockaway Golden Gem; One - Lime Hollow Famous Ned.

Some of these cows are bred to these following bulls - Hanover Hill Triple Threat Red, Poverty Hollow Mile Stone, Pen Mar Apollo Topper, Penn Gate Reflection Admiral.

All A.B.S. and Eastern Bulls

Sire - Born - 3-76 - Reg. Maplewood Prince - Red Due July 14 - to CA-Lill Standout Calvier

Sire - Born 1-76 - Reg. Aled Peb Pat due anytime to Sinking Springs Per Sterling.

Sire - Easter Trade Mark - due 6-24 Last yr. 364d. 19,218m 4% 795F.

Also selling Grade Red & White cow milking 81 lbs., per day. Top uddered cow. Sire - J. Argo Fascination - Dam had 18,000M 650F. Maternal sister made 19,000m. Grade 2 yr. old - sire Snowman. Dam - Taragon 305d. 13,000 4.5T, 305d. 19,000 4.6T.

1 Reg. Red & White Bull - Sire Hanover Hill Triple Threat Red 89. Dam Glen-Moore Performer Sue V.G. 86; 6 yr. 4m. 305d. 20,970m. 3.4T 713F, 7 yr. 11m. 305d. 20,250m. 3.7T 759F, 9 yr. 5M. 305d. 22,320m. 3.7T 822F - 324d. 22,840m. 3.7T 845F

Dams Sire - Romandale Dividend Performer.

1 Reg. Holstein Bull - Sire Milu Ivanhoe Betty Chief, Dam - Pen Octo Kenny - 2 yr. 7m. 305 - 16,482m. 597F., 3yr. 10m. 305 - 20,404m. 784F, 3.8T - 3.9T.

Sire - Round Oak Rag Apple Elevation - Fresh - 2nd Calf 365d. 17,352m. 3.6T - 620F. milking 55-60 lbs. Dam - Ivanhoe Star 88 pts., 5 yr. 8M. 366d. 24,737 - 3.9T - 95F. 3 records over 19,000 lbs.

Sire - 5 yr. Selling Rockman - springing close - bred to Character. Record over 17,000m.

June is dairy month and this is a good milking herd of cows for this dispersal sale.

Special June Sale

MEL KOLB, INC.

THURSDAY NIGHT, JUNE 19

At 7:30 P.M.

Cows & Heifers Purebreds & Grades

150 HEAD ALL HAND PICKED BY US.

Location: At my Maryland Farm located one-half mile Northwest of WOODSBORO, on Route 550 in Frederick County.

Special Mentions:

40 Purebred cows several with full pedigrees & from the most popular sires. Too many to list individually.

20 Purebred first calf heifers that will suit the most particular buyer.

50 Grade cows, 2nd & 3rd calf cows. Really a fine group, some milking up to 100 lbs. per day.

40 first calf grade heifers that show lots of quality with fancy udders, milking up to 70 lbs. per day.

June is dairy month

FARMERS, June is Dairy Month so we went all out and tried to select the best for this Sale. If you need cows or heifers, COME & LOOK for yourself. You'll like what you see!

Also, nice Purebred stock bulls will be sold & several open heifers. Set this date aside and come & see a fine barn full of cattle. Approximately one-half will be just fresh and the rest close springers. Some Purebred calves from these great cows will be sold.

Thank you,

MEL KOLB, Sales Manager
Residence: 717-393-7459

WITH TODAY'S MARKET...
A HOG PRODUCER NEEDS TO BE EFFICIENT.

DON'T JUST BUY A BAG OF FEED — BUY A RESEARCH PROVEN PROGRAM

No one offers more

- Hog Chow® Rations
- Kleen Leen
- Health Products

A little more than 70 years ago, Purina began providing specialized products, total management programs and professional guidance to hog producers. As the pork industry expanded, Purina's involvement in swine nutrition and research grew to meet your needs. Today, Purina offers Hog Chows, Health Products, breeding stock and professional expertise in research, management, nutrition, marketing, health and sanitation. It's all available through your local Purina Dealer. For the whole story, stop by or give him a call today.
